## INTRODUCTORY SUMMARY

With a monthly decrease, foreign exchange reserves still recorded a significant increase in relation to the end of the year (Graph 1). Excess funds in reserve accounts continuously exceeded the amount of the average required reserves (Graph 2). The growth of money supply was continued which was mainly determined by the growth of the most liquid components (Graph 3). A significant growth of the total deposits, which was recorded in the first part of the year, was still present (Graph 4). With the stagnation of the banking sector deleverage abroad, in October, there was an increase of foreign assets at the monthly level (Graph 5).
At the same time, the total loans continued to record a very modest annual growth (Graph 6). The general government sector was more active in borrowing by issuing securities, so, with regard to that, a growth was recorded compared to the same period of the previous year. Since February, this sector recorded a decrease of borrowing on the basis of loans (Graph 7). In October, again, negative rates were recorded in issuing treasury bills of FBH (Graph 8). As expected, after the tourist season, the payment transactions recorded a decrease (Graph 9).
In the first ten months, there was a growth of the total net revenues compared to the same period of the previous year (Graph 09). At the monthly level, a negative contribution of excise duties was recorded, while VAT increased, despite high reimbursements (Graph 10). The revenues based on tolls recorded high annual growth rates due to the collection of a special toll for the construction of highways (Graph 11).

Both at the
monthly level and annual level, a growth of industrial production was recorded, and also the increase of the average net wages in industry (Graph 12). At the monthly level, there was a growth of prices, which was the most intensive since the beginning of 2011, while at the annual level, there was still deflation (Graph 13). The decrease of the number of unemployed persons in BH was continued, which was particularly prominent over the previous two years as a result of the increased employment, but also negative demographic changes (Graph 14).
Trade deficit in the first ten months decreased, as a result of increased exports, with the stagnation of imports (Graph 15). The decrease of trade deficit was mainly affected by a decrease of the exchange with Russia, and Croatia (Graph 16). REER recorded an annual decrease which had a positive impact on the competitiveness of our products abroad (Graph 17).

G02: Reserve Account Balances with the CBBH

Source: Table 18

G03: Monthly Changes of M1 and Quasi Money and the Trend of Broad Money

Both average required reserve and excess funds in reserve account recorded growth. So, the average balance in reserve account in October amounted to KM 4.16 billion, with the excess funds still above the amount of average required reserve.

After a significant growth recorded during the summer months because of tourist season and calendar impact, there was a decrease of foreign exchange reserves and banks' reserve accounts. So, the reached level of foreign exchange reserves amounted to KM 9.35 billion, with the growth of even KM 739.9 million ( $8.6 \%$ ) compared to the end of the previous year. Banks' reserve account, on the other hand, recorded a stagnation compared to the end of the previous year, and it was at the level of KM 4.09 billion.

Money supply growth was continuous and intensive since the beginning of the year. In the end of the month, broad money amounted to KM 19.8 billion. The growth continued to be determined mainly by the growth of monetary aggregate M1 including the most liquid components of money supply, transferable deposits in the domestic currency and cash outside banks. On the other hand, the increase of quasi money was quite modest.

Source: Tables 10 and 11
The total deposits amounted to KM 17.46 billion in the end of October, which represents an increase of $6.9 \%$ at the annual level. The growth of deposits at the monthly level was recorded with all the sectors, and the major contribution to the growth of the total deposits came from deposits of the government sector ( $48.5 \%$ of the total increase).

G05: Monthly Changes of Foreign Assets and Foreign Liabilities of Commercial Banks and the Position of Net Foreign Assets

Source: Table 07
G06: Loans, Annual Growth Rates

- Non-financial Companies

In October, an increase of foreign assets (10.8\%) and increase of foreign liabilities ( $0.3 \%$ ) of commercial banks were recorded at the monthly level. Foreign assets increased mainly due to the increase of other deposits with correspondent banks ( $77 \%$ of the total increase of foreign assets was related to this item) and also increase of foreign currency in the vault. Loans from non-residents continued their downward trend and they additionally decreased by $2 \%$, while deposits of non-residents increased which caused the increase of the total positions of foreign liabilities.

The total loans placed in BH in the end of October amounted to KM 17.07 billion, which is an increase of $1.7 \%$ at the annual level (excluding the effect of exclusion of one bank from the system, the increase was $2.5 \%$ ). The slow growth of the total loans resulted from the slow growth of loans to companies of $1.7 \%$ compared to the same period of the previous year. At the same time, the loans to households recorded a slow-down, so the annual growth rate for this month amounted to 3\%.

Source: CBBH

In October, the upward trend of debt of the general government sector with commercial banks on the basis of securities was continued at slightly lower annual rates, while the debt based on loans recorded a declining trend since February of the current year. Compared to the same period of the previous year, claims of commercial banks based on securities of the general government sector recorded a growth of KM 226.0 million (26.3\%), while loans compared to the same period of the previous year recorded a decline in the amount of KM 87.8 million ( $-7.7 \%$ ).

G08: Issue of Nine Month Treasury Bills of the Federation of Bosnia and Herzegovina

In October, for the first time after December 2015, the Federation of Bosnia and Herzegovina issued nine month treasury bills. The demand for the issue was very high, and the spread of the offered yield rates was very low. The yield to maturity rate on nine month treasury bills was negative and amounted to $-0.017 \%$. The low rate of yield was a part of the general trend of decreasing costs of financing public debt of BH Entities which was partly caused by negative interest rates in the euro area. Negative and low rates of yield to maturity decrease the costs of borrowing of BH Entities on the primary market.

G09: Monthly Growth Rates of Turnover in RTGS and Gyro Clearing

- RTGS
- Gyro Clearing

## Source: CBBH

Seasonal adjustment was done by applying X13 method for the period 01/2001-10/2016
Regardless of a large difference in the ratio of turnover in two components of internal payment system which was in October 82.95\% (RTGS) in relation to 17.05\% (Gyro Clearing), there is a very high degree of interdependence between the monthly growth rates of turnover. In October, the turnover growth rate in RTGS and in Gyro Clearing was $-2.63 \%$ and -2.59 \% respectively ( $\mathrm{m} / \mathrm{m}-1$ ), and the annual growth rates were $5.67 \%$ and $2.34 \%$ respectively ( $\mathrm{m} / \mathrm{m}-12$ ). Monthly decline of turnover in October in RTGS was a result of a seasonal impact. According to seasonally adjusted data, the monthly growth rate in RTGS was 1.96\%, and in Gyro Clearing it was $-4 \%(m / m-1)$.

Source: Indirect Taxation Authority
G11:Tolls, Annual Growth Rates

Source: Indirect Taxation Authority

Revenues based on tolls recorded high annual growth rates in 2016. In the first ten months, KM 294.1 million was collected which was higher by $11.6 \%$ (KM 30.6 million) compared to the same period of the previous year. The main contribution to the high growth rates of revenues on this basis was a special toll collected for the contruction of highways.

In October, there was a small decline of the total net revenues from indirect taxes at the monthly level ( $-0.6 \%$ ), while at the annual level, their growth was recorded (5.6\%). The main negative contribution to the monthly net revenues was recorded with excise duties. A positive monthly contibution to net revenues was recorded with VAT, despite high reimbursement amounts. In the first ten months, KM 4.55 billion was collected, which was higher compared to the same period of the previous year by KM 181.0 million.

G12: Industrial Production Index in BH and the Average Wages in Industry

- Average Wage in Industry
- Industrial Production Index

In October, after the growth of industrial production in September of $2.5 \%$, observed at the monthly level, again a growth was recorded of $4.8 \%$. At the same time, in October, at the annual level, the growth was $4.2 \%$. Observed by the classification of industrial production activities, in October,at the monthly level, a growth was recorded in the production and distribution of electric energy and gas (19.4\%), production in mining (3.7\%), and manufacturing industry ( $0.3 \%$ ). Average net wages in industry, compared to September, recorded a slight decline, while at the annual level they were higher by $2.6 \%$. Observed by the activities, in October, at the monthly level, the growth of net wage was $0.7 \%$ in manufacturing industry, while a decrease of wages was recorded in the production and distribution of electric energy and gas of $1.7 \%$, and in mining of $0.4 \%$.

— Monthly Growth

Source: BHAS
Monthly growth of prices in October amounted to $0.8 \%$ which is the most intensive growth of prices recorded since the beginning of 2011. Annual deflation rate amounted to $0.7 \%$ and compared to the previous month it was lower by 40 basis points. In October, the highest impact on monthly growth at the general level of prices came from the growth of prices in the sections of dwelling, water, electric energy, gas and other energy sources (6.2\%), where the growth of prices of electric energy, gas and other energy sources was particularly intensive (8.2\%). At the same time, the decline of the general price level, observed at the annual basis, was mainly determined by a decline of prices in the sections related to transport (annual rate of price decline was $2.7 \%$ ), food (annual rate of price decline $1.0 \%$ ) and clothes and footwear (annual rate of price decline $8.5 \%$ ).

G14: The Number of the Unemployed

Source: BH Agency for Work and Employment

In October, the downward trend of the number of the unemployed in BH was continued, which was particularly intensified over the previous two years as a result of the increased employment, but also negative demographic changes. The number of the unemployed in October was decreased compared to the previous month, so the number of the unemployed was lower by 2,439 or $0.5 \%$. At the annual level, the number of the unemployed was lower by 24,406 persons or $4.6 \%$. Negative demographic changes are reflected in a more prominent unemployment decrease, than the change in the number of employees. The number of employees in October at the annual level was higher by 18,662 persons or $2.6 \%$.

G15: Exports, Imports and Trade Deficit (Nominal Annual Changes)

In the first ten months of 2016, at the annual level, there was a slight decrease of imports by $0.1 \%$, while exports were higher by $2.6 \%$. Trade deficit in the first ten months decreased by KM 207.1 million or $3.6 \%$ and in the first ten months it amounted to KM 5.5 billion. Regarding exports, all the main product groups had positive growth rates, except for base metals and exports of mineral origin products, so the negative growth rates of these two groups impacted a low rate of growth of the total exports. Decrease, or more precisely, stagnation of imports resulted from a continuous decrease of imports of mineral origin products, due to still low prices of oil at the global market, although the oil price was increasing over the previous three months.

Source: BHAS
If trade deficit is observed according to geographic distribution of imports and exports, the largest contribution to the decrease of trade deficit in the first ten months was recorded in the exchange with Russia by KM 243.3 million due to the decrease of the value of imports of energy sources from this country. The trade deficit was decreased also with Croatia by KM 110.6 million, where the value of imports decreased by $6.5 \%$, but the growth of exports to this country increased by $2.4 \%$. On the other hand, the largest contribution to the deepening of trade deficit was recorded in the exchange with Italy, where exports to this country decreased by $9.2 \%$, while imports from Italy increased at the annual level by $6.5 \%$.

G17: Nominal (NEER) and Real Effective (REER) Exchange Rate of KM

Nominal effective exchange rate of KM (NEER) had a downward tendency since the beginning of the year, resulting from depreciation of KM against the currencies of the main trade partners, at the monthly level. NEER at the monthly level depreciated by 41 bp . At the annual level, appreciation of NEER continued, so NEER in relation to the same month of the previous year was higher by only 21 pp . The continued appreciation of NEER at the annual level resulted from depreciation of British pound by 16.8\% and Chinese yuan by $4.7 \%$. On the other hand, REER at the monthly level appreciated by 17 bp , while at the annual level REER depreciated by 1.34 pp . Annual decline of REER has a positive reflection in the competitiveness of our products abroad.

Source: CBBH

G18: Unemployment Rate in the EU, Euro Area and the Selected Countries

The unemployment rates in the euro area and EU slightly increased, and the difference in these rates was maintained. In October, the unemployment rates in the EU and the euro area were $8.3 \%$ and $9.8 \%$ respectively. Unemployment rates in Germany (4\%), Austria (5,4\%) and USA ( $4,7 \%$ ) were decreasing, and that in Croatia was stable. The unemployment rate in BH which remained very high, compared to the benchmark markets, and also the absence of changes in the economy structure, bring about the continued outflow of workers from our country. In the structure of persons looking for employment*, as of 31 October 2016, the largest share was taken by unskilled workers, 137336 thousand or $26.8 \%$, followed by skilled workers ( $33.16 \%$ ) and workers with university education (8.05\%).

## Note:

* UW - unskilled worker,

SW - skilled worker,
UE - university education.

Notes applicable for tables 4, 5, 7, 8, 9, 10, 11, 12, 13.

The revised data for the period January 2006 - November 2015 are based on the active subbalance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.
The data on the "complete" balance sheet, with the included passive sub-balance, are still available at: http://statistics.cbbh.ba:4444/Panorama/novaview/SimpleLogin_bs.aspx

In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM.

Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred on the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, on the liabilities side: decrease of liabilities to non-residents in the amount of KM 624 million, an increase in loan losses provisions by KM 472 million and increase of other liabilities by KM 7 million.

In February 2011, one bank from the Federation of BH made the reclassification of approximately KM 80 million of deposits, from deposits of public enterprises to entity government deposits, in accordance with IMF recommendations.

By order of the Federal Banking Agency in June 2010 one bank has made a reclassification of about KM 300 million claims based on securities on domestic institutional sectors to the claims on non-residents. In December 2010 the same bank made this reclassification retroactively in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease of other items net.

One bank from the Federation of BH made a reclassification of financial instruments in the foreign assets for the period January -August 2010 amounting to about KM 40 million. Claims on non-residents based on loans were reclassified into claims on non-residents based on securities, which resulted in changes in the short- term and long- term foreign assets.

By order of the Banking Agency of Republika Srpska, one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, i.e. decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively in the appropriate amounts, by months, ranging from KM 50-150 million.

In accordance with new regulations of the RS Banking Agency, published in the Official Gazette of RS no.136/10, which have defined a new way of recording claims classified in category "E", accounting and recording of interest on non-performing assets and calculation of general and special provisions, RS banks, in the data for December 2010 implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to KM 180 million within the capital account.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.
Nots: Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.
Notes: The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.
Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non- central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).
Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M 1 and QM .

Revised data for September 2016.
Monetary data updated according to the MMF methodology（Monetary and Financial Statistics Manual，2000），from January 2006.
Notes：The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH－monetary authorities（Table 6）and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina（Table 7）．Foreign assets（net）represent the difference between total foreign assets of the CBBH－monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH－monetary authorities and commercial banks of BH．Domestic loans represent commercial banks＇ claims on all domestic sectors，but it should be noted that claims on central government are presented in net amounts，i．e．they are reduced by the deposits of central government with the CBBH and with BH commercial banks．The central government consists of BH Institutions，Entity governments，Entity Social Security Funds and those of Brčko District．According to new methodology，Social Security Funds are classified on the central government level as Entities＇off－budget funds，which has a direct impact on the data about net claims on the central government in Monetary Survey．

T05: Monetary Survey

- end of period, KM million -

Revised data for September 2016.
Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.
Notes: Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government) . Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors ( except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

T06: Balance Sheet of CBBH - end of period, KM milion -

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.
Notes: The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of CBBH for the long-term loans and claims on commercial banks on the basis of settlement accounts. Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Account 1 and 2). Deposits of central government with CBBH are transferable and other deposits of BH Institutions, Entity governments, Entity social security funds and those of Brčko District in domestic currency. Shares and other equity are comprised of equity, current year result, general and special reserves and revaluation/adjustment. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets.

Revised data for September 2016.
Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.
Notes: Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko District (from July 2001 until November 2002), NBRS (until December 1998) and the NBBH (until November 2002). Mutual claims and liabilities among the commercial banks have been consolidated. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.
Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments,Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors). Balance sheets of commercial banks of Federation of BH in addition to active sub-balance sheets include data from passive sub-balance sheets as well. Passive sub-balance sheets include liabilities arising from foreign loans and frozen foreign currency deposits of citizens, which occurred until 31 March 1992 . These liabilities will be taken over, in the process of privatisation, by Ministry of Finance of Federation of BH in accordance with the entity Law on Opening Balance Sheets of Enterprises and Banks and Law on Privatisation.

Revised data for September 2016.
Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.
Notes: Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non-financial enterprises, private non- financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors).Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added.
Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment/revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.
Revised data for the period January 2006 - November 2015
Notes:
By order of FBA in March 2010, loans to households with currency clause with one bank were reclassified, from loans in EUR to loans in KM.
From September 2004, change in structure of loans by currency is result of implementation of recommendations of IMF Mission for monetary and financial statistics in BH from May 2004. According to that, all loans in KM which include currency clause (indexed to euro), should be classified as loans in KM (domestic currency).

Data on structure of deposits and loans by currency in Republika Srpska until September 1999 are not available, so for this period the total amount of deposits and loans in RS is included in the column Total.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.
Revised data for the period January 2006 - November 2015
Notes: Deposits of domestic institutional sectors represent liabilities of commercial banks towards all institutional sectors. Deposits on the BH level represent deposits with commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko Branch (from July 2001 until November 2002), deposits with NBRS (until December 1998), deposits with NBBH (until November 2002) and deposits with the Payment Bureaus Sarajevo and Mostar (until November 1999). Sight deposits represent liabilities of commercial banks related to transaction accounts and sight deposits in domestic and foreign currency.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.
Revised data for the period January 2006 - November 2015
Notes:Loans to domestic institutional sectors represent claims of commercial banks on all institutional sectors. Loans at the BH level include loans extended by commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko Branch (from July 2001 until November 2002), loans with NBRS (until December 1998) and NBBH (until November 2002). The total of claims on all leves of government and funds (short-term and long-term) are shown in Table of short-term loans (columns 3,4,5,6,7) in total amount, because source data do not provide a maturity structure of claims for governments and funds. Short - terms loans represent claims of commercial banks on all domestic institutional sectors up to one year, in domestic and foreign currency.
Claims on BH Institutions have been reclassified since April 2010.

T13: Structure of Long-terms Loans of Commercial Banks by Sector - end of period, KM million-

## Notes:

Revised data series on the interest rates for the period January 2012- November 2015, applying new rules of validation and editing for finding out and correction of inconsistency and significant deviations in the data series.

* Interest rates in table for revolving loans and credit cards and their amounts refer to the outstending amounts.

IRF - initial rate fixation
... insufficient data to be published
The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment ( $0 \%$ ir), they are not published.
No data for interest rates on loans in foreign currency based on credit cards and overdrafts to households.

T15: Interest Rates on Loans to Non-financial Corporations - percentages per annum -

Notes:
From 1 July 2016, the required reserves rate applied by the CBBH to the base for calculation of required reserves is $10 \%$. From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts : in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks'reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to $50 \%$ of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank. Since 01 May 2015, the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:
-on the reserve requirement amount - the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero,
-on the amount of the funds exceeding the reserve requirement - zero rate of compensation.
The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value.
From 1 September 2014, the remuneration rate has been calculated on the basis of the weighted average interest rate which was earned by the Central Bank of BH on the market in the same period on deposits invested up to a month ; and $70 \%$ is calculated on the amount of required reserve or minimum 0 , while $90 \%$ of the mentioned rate is calculated on the amount of excess reserves or minimum 0 .
From February 1st, 2011 the required reserves rate on deposits and borrowed assets with contracted term of maturity up to one year was declined from $14 \%$ to $10 \%$, while the required reserves rate on deposits and borrowed assets with contracted term of maturity over one year is not changed.
From August 1st 2011. the remuneration rate is calculated by the weighted average interest rate which were earned by the Central Bank on deposits invested up to a month in the same period; $70 \%$ of this rate is calculated on the amount of required reserves while $90 \%$ of the same rate is calculated on the amount of excess reserves.
From July 1st, 2010 remuneration rate on the amount of required reserves is changed and calculated as an average of interest rates, which were earned by the Central bank on overnight deposits in the same period, while remuneration rate on the amount of excess reserves is not changed.
From January 1st, 2009 the required reserves rate is $14 \%$ on deposits and borrowed assets with contracted term of maturity up to one year and $10 \%$ on deposits and borrowed assets with contracted term of maturity over one year.
From April 1st, 2009 remuneration rate is calculated as:- On the amount of required reserves is $0,5 \%$, - On the amount of excess reserves on the rate calculated as an average of interest rates, which were earned by the Central bank on deposits invested up to u month.
From May 1st, 2009 the required reserves rate is $7 \%$ on deposits and borrowed assets with contracted term of maturity over one year.
From January 1st, 2008 required reserves rate was increased from $15 \%$ to $18 \%$.
From October 11th, 2008 required reserves rate was declined from $18 \%$ to $14 \%$.
*The base for calculation of required reserves includes deposits and borrowed funds in domestic and other currency expressed in KM
