INTRODUCTORY SUMMARY

Decision of the CBBH Governing Board, by which the base for the required reserve calculation includes deposits and borrowed funds in all the currencies, took effect in the beginning of July (Graph 01). The upward trend of foreign exchange reserves was continued, which was caused by a positive balance of KM purchase and sale (Graph 02). The mentioned transactions had an impact on the changes in the monetary base, also the amount of foreign cash in the vault with commercial banks was increased (Graph 03). Monetary aggregate M1, consisting of the most liquid components of money supply, deposits in domestic currency and cash outside banks, continued its upward trend in July (Graph 04). The highest contribution to the growth of the total deposits at the monthly level came from deposits of non-financial companies (Graph 05), and the volume of transactions in the payment system was decreased at the same time (Graph 06).

At the monthly level, the growth of production was recorded in mining and production and distribution of electric energy and gas, while a decline was recorded in manufacturing industry. Within manufacturing industry, the decline of production was recorded in 19 branches, which can result from decreased exports of manufacturing industry (Graph 07). Trade deficit for the first seven months decreased. Decrease of imports resulted from decreased imports of mineral origin products, due to still low prices of oil on the global markets, while in exports, the decrease was caused by decreased exports of mineral origin products and base metals (Graph 08). Decrease of the trade deficits with Russia and Croatia significantly impacted the decrease of the trade deficit of BH (Graph 09). The recorded growth of GDP in the euro area for the second quarter of 2016 was at the level of projections (Graph 10). The nominal exchange rate of KM against the currencies of the main trade partners mainly appreciated, mostly against the British pound, due to a decline of pound on the global markets after Brexit (Graph 11).

The total loans in the banking sector in BH exceeded the amount of KM 17 billion. The growth rates indicate the slow-down of the growth of loans to households and recovery of lending to non-financial companies (Graph 12). The government sector decreased its liabilities towards commercial banks, and at the same time, the debt of the Entity governments on the basis of the issue of securities increased (Graph 13). In July, a decline of the total net revenues from indirect taxes was recorded (Graph 14). Revenues based on tolls recorded a considerable growth (Graph 15). In a smaller BH Entity, only one issue of treasury bills was performed (Graph 16).

The unemployment decrease trend since the beginning of the current year was ended in July (Graph 17). Deflation is still prominent in BH (Graph 18).

G01: Base for the Required Reserve Calculation and Reserve Account Balances

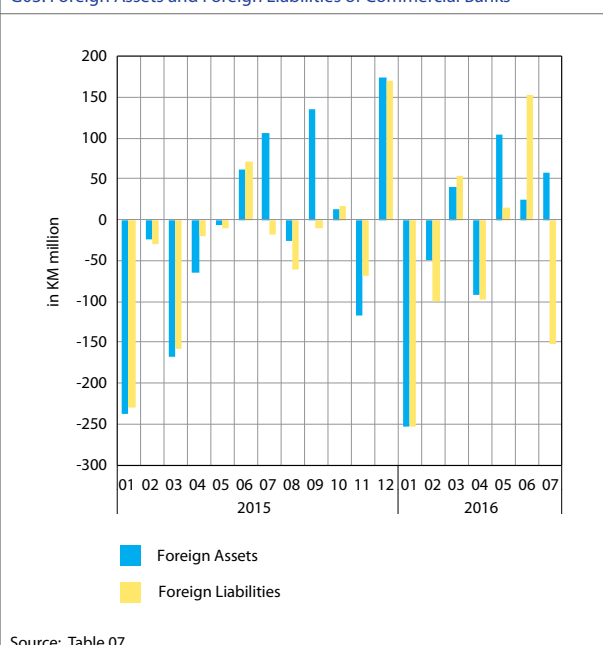

On 01 July, the Decision of the CBBH Governing Board took effect according to which the base for required reserve calculation includes deposits and borrowed funds, regardless of the currency which the funds are denominated in. In this way, the base again includes the funds which were excluded from the calculation by the CBBH Decisions from 2008 and 2009. Also, the required reserve rate applied by the CBBH on the base for required reserve calculation was set at 10%, which ended the application of differentiated remuneration rate according to the maturity of the funds. By the application of this Decision, the base for the required reserve calculation increased by KM 1.77 billion. The average required reserve increased by KM 405.4 million, while surplus funds accordingly decreased by KM 388.4 million.

G02: CBBH Foreign Exchange Reserves and Monetary Base

The foreign exchange reserves recorded a significant growth since the beginning of the year which was particularly intensified in the previous two months. The basic factor of growth was a positive balance of purchase and sale recorded by the CBBH with commercial banks which in July amounted to KM 176.6 million, whereas a low negative balance was recorded with the CBBH depositors in the amount of KM 27.5 million. So, the foreign exchange reserves amounted to KM 8.94 billion. These transactions with banks resulted in similar changes in the monetary base.

G03: Foreign Assets and Foreign Liabilities of Commercial Banks

The increase of foreign assets (2.6%) was recorded in July and also decrease of foreign liabilities (6.4%) of commercial banks at the monthly level. Foreign assets increased mainly due to the increase of foreign currency in vaults with commercial banks. The decrease of foreign liabilities was recorded due to the decrease of other deposits with non-resident banks, and payment of dividends with one commercial bank.

G04: Annual Growth Rates of Monetary Aggregates

Source: Table 04

Money supply measured by the broadest monetary aggregate M2 continued to record considerable growth rates. While less liquid components of quasi money recorded a considerable slow-down, monetary aggregate M1 recorded two digit growth rates since October last year. M1 includes the most liquid components of money supply, deposits in domestic currency and cash outside banks.

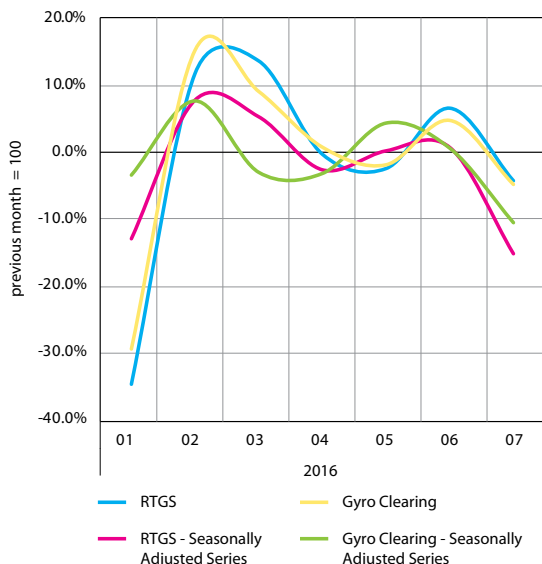

G05: Deposits

Source: Tables 10 and 11

In July, the upward trend of household deposits was continued, but the intensity of growth of these deposits decreased. Annual growth rate of household deposits amounted to 6.2% in July, which was lower by 3 percentage points compared to the last year's July level. The largest contribution to the growth of the total deposits at the monthly level came from deposits of non-financial companies. The growth of deposits of companies (KM 146.8 million) was caused to a lower extent by the inflow of funds from foreign countries and to a higher extent due to regular activities in this sector.

G06: Turnover Growth Rate in RTGS and Gyro Clearing

Source: CBBH. Seasonal adjustment was carried out by the application of X13 method, and the time series includes the period from January 2001 to July 2016.

Despite a strong seasonal impact which every year in July brings about the growth of the value of internal interbank transactions, the turnover at the monthly level in July this year declined. According to the original data series, the turnover in July in RTGS and in Gyro Clearing was lower by 4.32% and 4.85% respectively (m/m-1). Taking into account the seasonal impact* the decline of the value of turnover in RTGS and Gyro Clearing was even higher amounting to 15.3% and 10.55% respectively (m/m-1). The value of turnover in July in RTGS in Gyro Clearing in the amount of KM 5.8 billion and KM 1.26 billion respectively were quite close to the trend values of turnover in the amounts of KM 5.9 billion and KM 1.3 billion respectively.

G07: Contribution to the Monthly Rates of Industrial Production Trend in BH

Source: BHAS

In July, a decline of industrial production was recorded at the monthly level (-3.6%), and seasonally adjusted indices showed a monthly decline of 4.4%. At the annual level, the decline was 0.2%. It is a positive fact that in the first seven months of 2016, compared to the same period of the previous year, the growth of industrial production was by 4.0%. Observing the monthly trend of industrial production, in July, there was a growth of production in mining (6.2%) and production and distribution of electric energy and gas (0.6%), while a decline was recorded in manufacturing industry (-6.4%). Within manufacturing industry, a growth was recorded only in five branches (mainly in branches without a high share), while a decline of production was recorded in 19 of them. The decline of external demand (exports of manufacturing industry compared to June were lower by 11.4%) probably had a strong impact on the decline of production.

G08: Exports, Imports and Trade Deficit (Nominal Annual Changes)

Source: Table 27

In July, at the annual level, there was a decrease of exports by 4.4%, while imports were lower by 10.0%. Observing the first seven months, the decrease of exports at the annual level was much lower 1.8%, while a decrease of imports was 0.8%. Trade deficit in the first seven months decreased by 4.1%. Regarding exports, the decrease of exports of mineral origin products and base metals was a basic reason of decline of the total exports, as the other main product groups recorded positive growth rates. The decrease of imports was a result of the decrease of imports of products of mineral origin due to still low prices of oil on the global markets, and decreased imports of machines and devices (1.0%).

G09: Deepening/Decrease of Trade Deficit by Trade Partners

Source: BHAS

If trade deficit is observed according to the geographic distribution of imports and exports, the largest contribution to the decrease of trade deficit in the first seven months was recorded in the exchange with Russia by KM 172.0 million due to the decrease of the value of imports of energy sources from this country. The trade deficit was decreased with Croatia by KM 101.4 million, where the value of imports decreased by 7.5%, while exports increased by 5.5%. On the other hand, exports to Serbia in the first seven months decreased by 10.0%, while imports increased by 6.2% which brought about the deepening of the deficit by KM 106.3 million.

G10: GDP Growth Rate in the Euro Area and Selected Countries

Source: Bloomberg, FT.

In Q2 2016, the recorded and forecasted rates of economic growth were equal (May 2016) in the euro area. GDP of the euro area increased by 1.6% (Q/Q-4), and GDP of Germany by 3.1%. Beside German economy, the growth of Greek economy was also above the expectation. In Italy and Portugal, the countries with high levels of debt, like Greece, the GDP growth was lower than forecasted. At the quarterly level (Q/Q-1), the growth in the euro area in Q2 2016 was lower by half compared to the growth in the previous quarter and it was at the lowest level since 2015. The economy of the euro area in Q2 2016 increased by 0.3% (in Q1 by 0.6%), and German economy by 0.4% (in Q1 by 0.7%). The slow-down of economic growth, if continued, will contribute to the maintenance of the difference between the monetary policy in the euro area and the monetary policy of USA, with implications on the depreciation of euro and domestic currency.

G11: Nominal and Real Effective Exchange Rate of KM

Source: CBBH

In July, the nominal exchange rate of KM against the currencies of the main trade partners mainly appreciated. The most prominent appreciation of KM was in relation to British pound (18.8%), due to decline of pound on the global markets after Brexit. The trend of appreciation of KM against Russian ruble was also continued although the downward trend of Russian ruble was slower since the beginning of the year. KM appreciated against Russian ruble in July by 13.3% compared to the same month of the previous year. Therefore, nominal effective exchange rate of KM (NEER) at the annual level was higher by 2.2 pp, so, the appreciation trend is still present, whereas there was depreciation of NEER at the monthly level by 25 bp. Real effective exchange rate of KM (REER) at the annual level slightly appreciated by 31 bp, while at the monthly level a slow depreciation was recorded by 52 bp.

G12: Loans

Source: Tables 12 and 13

The total loans placed in BH in July exceeded the amount of KM 17 billion. Annual growth rates of loans indicate the slow-down of growth of loans to households. In the sector of non-financial companies, the growth of the annual and monthly levels of the total placements was continued.

G13: Debt of the General Government, Annual Rates

Source: CBBH

Debt of the general government with banks on the basis of securities continued to grow at very high annual rates. So, in July, the annual growth of debt on this basis was 37.4% (KM 299 million). At the same time, the debt of the general government on the basis of loans with banks continued to decline. The annual decline was 7.7% (KM 125.8 million). The total bank exposure to the general government on the mentioned two bases was KM 2.12 billion.

G14: Issue of Twelve Month Treasury Bills on BLSE

Source: BLSE

In July, Republika Srpska performed only one issue in the nominal value of KM 10 million and maturity of one year. The fifth issue in this maturity segment was specific for several details. The recorded yield rate of 0.3% was not only the lowest yield rate so far for this maturity segment, but it was also the lowest yield rate in the entire market of public debt of Republika Srpska. The realized bid to cover ratio of 3.6 was the highest value recorded in the market of public debt of Republika Srpska. As in the first six months of 2016 there were no significant positive macroeconomic changes, such low interest rate represents a market anomaly. During July, there were no issues in the Federation of BH.

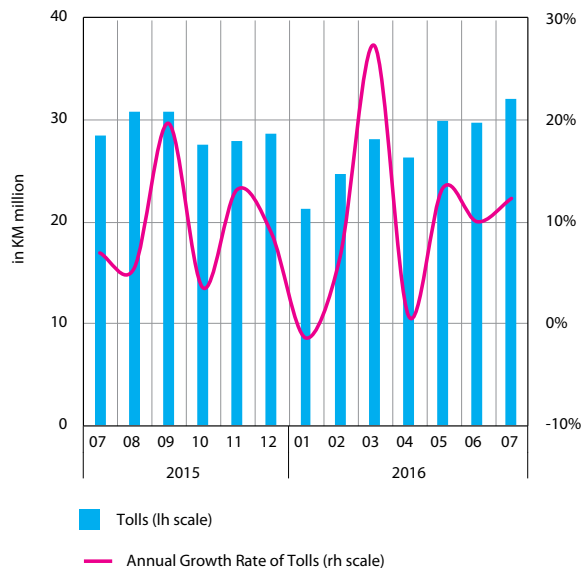

G15: Contribution to the Monthly Rates of Trend of Net Indirect Taxes

Source: Indirect Taxation Authority

In July, there was a decrease of the total net revenues from indirect taxes both at the monthly level (-3.0%), and at the annual level (-5.1%). The largest negative contribution to the monthly net revenues was recorded with VAT, as a result of higher amounts of reimbursements compared to the previous month. Positive monthly contribution to net revenues was recorded with excise duties, primarily excise duties on oil derivatives. In the first seven months, KM 3.02 billion was collected, which was higher by KM 76.9 million compared to the same period of the previous year.

G16: Tolls, Annual Growth Rates

Source: Indirect Taxation Authority

Revenues on the basis of tolls recorded high annual growth rates in 2016. In the first seven months, KM 191.7 million was collected, which was higher by 9.8% (KM 17.1 million) compared to the same period of the previous year. The main contribution to high growth rates of revenues on this basis is a special toll charged for the construction of high ways.

G17: The Number of Unemployed Persons

Source: BH Labour and Employment Agency

The decrease of the number of the unemployed persons in BH, which was present since the beginning of 2016 was stopped in July 2016. The number of the unemployed in BH compared to the previous month was higher by 2,031 persons or 0.39%. Such trend can be probably explained by the end of the school year in June, so a significant number of young people was registered at employment bureaus.

The number of the unemployed in BH in July 2016 observed in relation to December of the previous year, was lower by 17,503 persons or 3.3%, while the number of the unemployed, observed in relation to the same month of the previous year, was lower by 22,871 persons or 4.2%. In FBH, the number of the unemployed at the annual level was lower by 3.8%, and in Republika Srpska by 5.9%.

G18: Rates of Price Changes in BH

Source: BHAS

In July, there was a monthly decline of the general price level of 0.3% and the deflation rate at the annual level was 1.0%. Annual deflation rate compared to the previous month was lower by 50 basis points.

In July, at the monthly level, a decline of prices was recorded only in three sections: food and non-alcohol beverages (contribution to the decline of prices 0.22 pp), clothes and footwear (0.21 pp), and in other goods and services (0.03 pp). The prices in other sections were stagnating or slightly increased.

At the same time, observed at the annual level, a decline of prices was mainly determined by the decline of prices in sections related to transport (annual rate of contribution to decline of prices 0.87 pp), and clothes and footwear (contribution 0.42 pp). On the other hand, the highest contribution to the growth of prices was recorded in section of tobacco and alcohol beverages (0.32 pp).

Notes applicable for tables 4, 5, 7, 8, 9, 10, 11, 12, 13.

The revised data for the period January 2006 – November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.

The data on the „complete“ balance sheet, with the included passive sub-balance, are still available at: http://statistics.cbbh.ba:4444/Panorama/novaview/SimpleLogin_bs.aspx

In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM.

Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred on the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, on the liabilities side: decrease of liabilities to non-residents in the amount of KM 624 million, an increase in loan losses provisions by KM 472 million and increase of other liabilities by KM 7 million.

In February 2011, one bank from the Federation of BH made the reclassification of approximately KM 80 million of deposits, from deposits of public enterprises to entity government deposits, in accordance with IMF recommendations.

By order of the Federal Banking Agency in June 2010 one bank has made a reclassification of about KM 300 million claims based on securities on domestic institutional sectors to the claims on non-residents. In December 2010 the same bank made this reclassification retroactively in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease of other items net.

One bank from the Federation of BH made a reclassification of financial instruments in the foreign assets for the period January -August 2010 amounting to about KM 40 million. Claims on non-residents based on loans were reclassified into claims on non-residents based on securities, which resulted in changes in the short- term and long- term foreign assets.

By order of the Banking Agency of Republika Srpska, one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, i.e. decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively in the appropriate amounts, by months, ranging from KM 50 - 150 million.

In accordance with new regulations of the RS Banking Agency, published in the Official Gazette of RS no.136/10, which have defined a new way of recording claims classified in category "E", accounting and recording of interest on non-performing assets and calculation of general and special provisions, RS banks, in the data for December 2010 implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to KM 180 million within the capital account.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.

Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).

Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M1 and QM.

Monetary data updated according to the MMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006.

Notes:

The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH - monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. According to new methodology, Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government) . Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of CBBH for the long-term loans and claims on commercial banks on the basis of settlement accounts. Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Account 1 and 2). Deposits of central government with CBBH are transferable and other deposits of BH Institutions, Entity governments, Entity social security funds and those of Brčko District in domestic currency. Shares and other equity are comprised of equity, current year result, general and special reserves and revaluation/ adjustment. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko District (from July 2001 until November 2002), NBRS (until December 1998) and the NBBH (until November 2002). Mutual claims and liabilities among the commercial banks have been consolidated. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.

Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments, Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors). Balance sheets of commercial banks of Federation of BH in addition to active sub-balance sheets include data from passive sub-balance sheets as well. Passive sub-balance sheets include liabilities arising from foreign loans and frozen foreign currency deposits of citizens, which occurred until 31 March 1992. These liabilities will be taken over, in the process of privatisation, by Ministry of Finance of Federation of BH in accordance with the entity Law on Opening Balance Sheets of Enterprises and Banks and Law on Privatisation.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non-financial enterprises, private non-financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors). Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added.

Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment / revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.
 Revised data for the period January 2006 - November 2015

Notes:

By order of FBA in March 2010, loans to households with currency clause with one bank were reclassified, from loans in EUR to loans in KM.

From September 2004, change in structure of loans by currency is result of implementation of recommendations of IMF Mission for monetary and financial statistics in BH from May 2004. According to that, all loans in KM which include currency clause (indexed to euro), should be classified as loans in KM (domestic currency).

Data on structure of deposits and loans by currency in Republika Srpska until September 1999 are not available, so for this period the total amount of deposits and loans in RS is included in the column Total.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.
Revised data for the period January 2006 - November 2015

Notes:

Deposits of domestic institutional sectors represent liabilities of commercial banks towards all institutional sectors. Deposits on the BH level represent deposits with commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko Branch (from July 2001 until November 2002), deposits with NBRIS (until December 1998), deposits with NBBH (until November 2002) and deposits with the Payment Bureaus Sarajevo and Mostar (until November 1999). Sight deposits represent liabilities of commercial banks related to transaction accounts and sight deposits in domestic and foreign currency.

T11: Structure of Other Deposits with Commercial Banks by Sector
- end of period, KM million -

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.
Revised data for the period January 2006 - November 2015

Notes:

Loans to domestic institutional sectors represent claims of commercial banks on all institutional sectors. Loans at the BH level include loans extended by commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko Branch (from July 2001 until November 2002), loans with NBRS (until December 1998) and NBBH (until November 2002). The total of claims on all levels of government and funds (short-term and long-term) are shown in Table of short-term loans (columns 3,4,5,6,7) in total amount, because source data do not provide a maturity structure of claims for governments and funds. Short-term loans represent claims of commercial banks on all domestic institutional sectors up to one year, in domestic and foreign currency.
Claims on BH Institutions have been reclassified since April 2010.

T13: Structure of Long-terms Loans of Commercial Banks by Sector
- end of period, KM million -

Notes:

Revised data series on the interest rates for the period January 2012- November 2015, applying new rules of validation and editing for finding out and correction of inconsistency and significant deviations in the data series.

* Interest rates in table for revolving loans and credit cards and their amounts refer to the outstanding amounts.

IRF – initial rate fixation

... insufficient data to be published

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

No data for interest rates on loans in foreign currency based on credit cards and overdrafts to households.

Notes:

From 1 July 2016, the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10%. From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts : in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to 50% of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank. Since 01 May 2015, the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:

-on the reserve requirement amount – the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero,

-on the amount of the funds exceeding the reserve requirement – zero rate of compensation.

The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value.

From 1 September 2014, the remuneration rate has been calculated on the basis of the weighted average interest rate which was earned by the Central Bank of BH on the market in the same period on deposits invested up to a month ; and 70% is calculated on the amount of required reserve or minimum 0, while 90% of the mentioned rate is calculated on the amount of excess reserves or minimum 0.

From February 1st, 2011 the required reserves rate on deposits and borrowed assets with contracted term of maturity up to one year was declined from 14% to 10%, while the required reserves rate on deposits and borrowed assets with contracted term of maturity over one year is not changed. From August 1st 2011, the remuneration rate is calculated by the weighted average interest rate which were earned by the Central Bank on deposits invested up to a month in the same period; 70% of this rate is calculated on the amount of required reserves while 90% of the same rate is calculated on the amount of excess reserves.

From July 1st, 2010 remuneration rate on the amount of required reserves is changed and calculated as an average of interest rates, which were earned by the Central bank on overnight deposits in the same period, while remuneration rate on the amount of excess reserves is not changed.

From January 1st, 2009 the required reserves rate is 14% on deposits and borrowed assets with contracted term of maturity up to one year and 10% on deposits and borrowed assets with contracted term of maturity over one year. From April 1st, 2009 remuneration rate is calculated as:- On the amount of required reserves is 0,5%, - On the amount of excess reserves on the rate calculated as an average of interest rates, which were earned by the Central bank on deposits invested up to a month. From May 1st, 2009 the required reserves rate is 7% on deposits and borrowed assets with contracted term of maturity over one year.

From January 1st, 2008 required reserves rate was increased from 15% to 18%. From October 11th, 2008 required reserves rate was declined from 18% to 14%.

*The base for calculation of required reserves includes deposits and borrowed funds in domestic and other currency expressed in KM.

Notes:

The share of BH exports to the country in total BH exports for 2010 was used as a criterion for presenting the country of exports. Thus, all countries with higher share of exports than 4% of the total BH exports for 2010 are separately presented, while the other countries are presented in the column "Other Countries".

* Until February 12, 2007, the data on exports to Serbia and Montenegro were presented as exports to Serbia, but since then Serbia and Montenegro have been presented separately.

Notes:

The share of BH imports from the country in total BH imports for 2010 was used as a criterion for presenting the country of imports. Thus, all countries with higher share of imports than 3% of total BH imports for 2010 are separately presented, while the other countries are presented in the column "Other Countries".

* Until February 12, 2007, the data on imports from Serbia included imports from Montenegro as well, while since then imports from Montenegro has been included in the column "Other Countries".
