INTRODUCTION

In July 2023, leading central banks continued the application of restrictive monetary policy with the aim of stronger transmission of monetary policy to the money market (Graph 01). The lowest annual price growth rate in the last 18 months was recorded on the domestic market and in the surrounding area, but also a higher growth rate of core inflation. The annual growth rate of core inflation in BH for the first seven months of 2023 exceeded the average growth rate recorded for 2022 (Graphs 02 and 03). In the second half of the year, there was also an increase in oil prices, which is a consequence of positive expectations related to demand from China, but also a decrease in supply (Graph 04). In June 2023, the nominal effective exchange rate (NEER) recorded an annual appreciation due to the nominal appreciation of the EUR against the Turkish lira, while the real effective exchange rate (REER) depreciated, which is a consequence of the average higher inflation rates in the countries of the main trading partners in relation to in Bosnia and Herzegovina (Graph 05). Exports of goods from BH recorded negative annual growth rates for the fifth month in a row, primarily due to the decrease in demand on BH goods (Graph 06). The annual decrease in the value of imports is caused primarily by the decrease in the value of imports of products of mineral origin, primarily oil and oil derivatives, as well as base metals (Graph 07). After five months of contraction, the volume of industrial production in BH recorded a slight annual growth rate in July 2023 (Graph 08). In the observed period, a strong increase in the total number of overnight

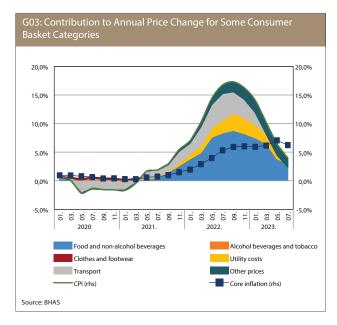

stays by domestic and foreign tourists on a monthly and annual basis was recorded (Graph 09). Due to the change in the excise duty payment regime on tobacco products and the low base from the previous period, in July 2023, an increase in revenues from indirect taxes was recorded due to the increase in excise duties (Graph 10 and 11). The collection of revenues from indirect taxes is still stable and ensures the sustainability of debt repayment (Graph 12). In July, net foreign exchange reserves recorded a monthly growth due to the positive balance of KM purchase and sale transactions (Graph 13). On a monthly level, an increase in reserve money was recorded, but the state of reserve money is still lower than the average recorded for 2022, which is mostly a consequence of the decrease in bank deposits with the monetary authorities, and the monetary aggregates M1 and M2 recorded a significant monthly increase (Graph 14). Total bank deposits recorded an increase compared to the previous month, due to a significant increase in deposits of non-financial companies and cantonal government deposits (Graph 15). As a result, the base for calculating the required reserve continued its growth trend, with a simultaneous decrease in the surplus above the required reserve (Graph 16). Credit growth compared to the previous month was recorded in the household sector, while in other sectors almost no significant monthly changes were recorded, (Graph 17). In July 2023, there were no publishing of public calls for the issuance of securities in the FBH, while the Republika Srpska issued bonds twice (Graph 18).

The leading central banks continued to implement restrictive monetary policies with purpose of stronger monetary policy transmission in money market. In July 2023, the ECB raised its key interest rates by additional 25 bp, being the fifth increase of interest rates during the year. In this way, deposit facility rate reached its historical high of 3.75% (which had been recorded only once in 2000). At the same time, the ECB made a decision on decrease of remuneration paid on reserve requirement. By the mentioned decision, applied from 20 September 2023, the remuneration on reserve requirement of the euro area was decreased by 375 bp to amount to 0%. The key interest rates of the FED were also increasing in the reporting period reaching the level of 5.5%. The ECB approach to gradual increase of key interest rates makes possible a better perception of the received information on core inflation generators and the strength of monetary policy transmission.

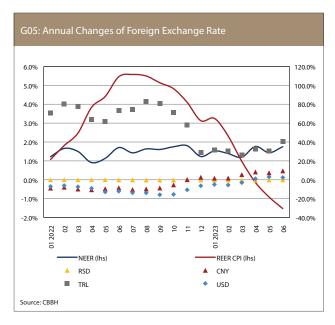

In July 2023, the lowest annual growth rate of prices in the previous 18 months was recorded (5.3%). Compared to the same period of the previous year, prices were lower by 3.6 pp. At the same time, at the annual level, core inflation of the euro area continued to show a significant resillience to monetary policy measures, amounting to 5.5% at July end, which is higher by 1.4 pp compared to the same period of the previous year. Energy prices had a negative contribution to the overall price growth over the reporting period, with only five countries of the euro area recording low annual growth rates for this category of price indices in July 2023. The strongest contribution to price growth in Juy 2023 was recorded for the prices of services (2.47%), food prices (1.90%) and the prices of other goods.

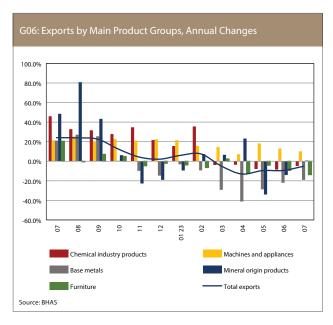

The annual price growth rate in July 2023 reached its record low of 3.97% for the previous 20 months. At the same time, annual growth rate of core inflation during the first seven months of 2023 exceeded the average growth rate recorded in 2022. The main categories of consumer basket such as food and non-alcohol beverages and utility costs recorded significantly lower annual gowth rates in July 2023 (8.7% and 7.6% respectively). In the previous five months of 2023, a decline of prices was recorded in the category of transport, and clothes and footwear at the annual level. The largest annual contribution to price growth in the end of July 2023 came from the categories of food and non-alcohol beverages and utility costs (2.96% and 1.13%). Contribution of other categories of consumer basket amounted to 1.62%.

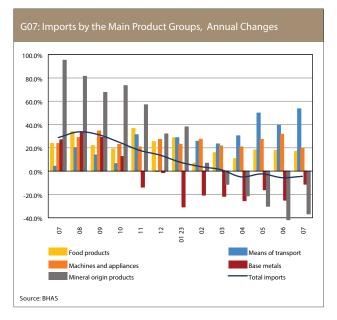

Since July, the Brent oil price started to grow in international market, so trading in August was done at the price of USD 85 per barrel, which is still lower by 13% compared to the same period of the previous year. The growth of oil prices resulted from positive expectations related to demand from China, the largest oil importer, but also a decrease of offer. Leaders of the OPEC+ Saudi Arabia and Russia extended the programe of reduced deliveries by the end of the year, while US oil stocks were decreasing for four successive weeks. According to the latest available data, in the beginning of September,oil price reached USD 90 per barrel, which is equal to the level from September of the previous year.

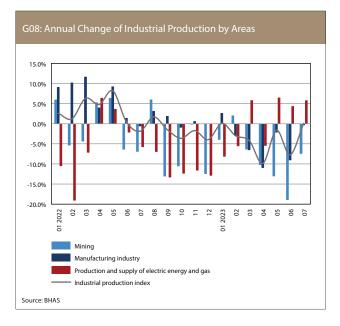

Nominal effective exchange rate (NEER) in June 2023 appreciated by 1.7% compared to the same month of the previous year. Appreciation of NEER was mainly brought about by a significant nominal appreciation of EUR, our peg currency, against Turkish lira, which in June, at the annual level, amounted to 40.5%. On the other hand, real effective exchange rate (REER), where the consumer price index was used as a deflator, recorded annual depreciation in June by 1.5%. Depreciation of REER is a result of average higher inflation rates in the countries main trade partners, firstly Turkey, Serbia, Croatia and Italy, compared to BH.

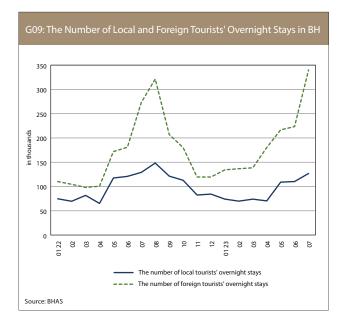

The value of exported goods from BH in July 2023 amounted to KM 1.39 billion, representing an annual decline of 5.1%. Exports of goods from BH recorded negative annual growth rates for the fifth successive month as a result of decreased demand for BH goods in the countries which are the main trade partners, but also high values from the base period. Decline of export value resulted from the decline of exports of some of the most important product groups: base metals (19.1%), furniture (13.8%) and chemical industry products (4.9%), whereas exports of machines and appliances recorded annual growth of 10.2%. Exports of mineral origin products, with dominating share of electric energy, was slightly above the last year's level (0.8%).

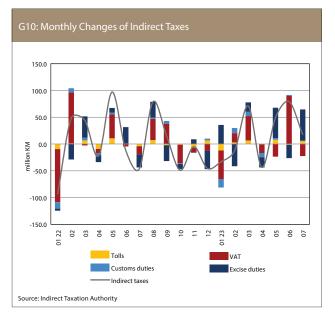

Imports of goods in BH in July of this year reached the value of KM 2.36 billion, representing a decline of 4.5% compared to the same month of the previous year. The annual decline of import value resulted from decreased value of imports of mineral origin products, mainly oil and oil derivatives, as well as base metals of 36.6% and 11.1%, respectively. Positive effect on import value in July was that of imports of means of transport (growth of 53.5%), a group of products recording very high annual growth rates since the beginning of 2023. Also, imports of machines and appliances recorded an annual growth of 19.8%, and also those of food products by 17.0%.

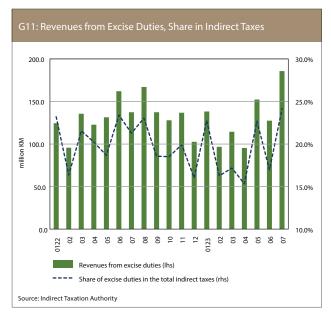

Following five months of contraction, industrial production volume in BH in July 2023 recorded a negligible annual growth rate by 0.1%. The low level of industrial production volume resulted from annual decline of the area of mining (7.5%) and manufacturing industry (0.3%). On the other hand, area of production and supply of electric energy had a positive impact on the growth of industrial production volume. Within manufacturing industry, majority of the most significant areas recorded annual decline: production of base metals (10.1%), production of food products (2.1%) and processing of wood and wood products (8.5%), while the production of finished metal products increased by 1.4%.

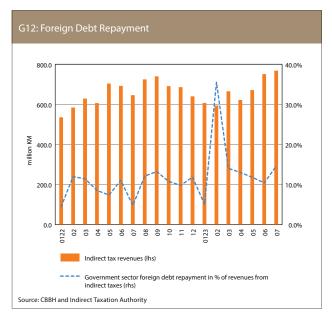

In July, there was a strong growth of the total number of overnight stays of tourists in BH, with the number of foreign tourists' overnight stays being higher than that of local tourists' overnight stays, both at the annual and monthly level. The highest growth of the number of overnight stays was recorded for tourists from Turkey, the increase at the annual level being 146.0%. They are followed by tourists from Croatia (34.4%) and Slovenia (20.2%). The total number of overnight stays in BH for the first seven months was 1.37 million, which is higher by 329 thousand overnight stays compared to the same period of the previous year.

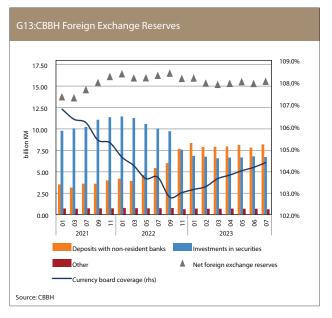

In July, a monthly growth of net collection of indirect tax revenues (2,4%) was seen, mainly due to the growth of excise duties, which was higher in July due to the low base from the previous period, which resulted from the changed regime of excise payment on tobacco products. For other kinds of indirect taxes, there were usual monthly oscillations. During the first seven months of the year, refunds were higher by KM 133.7 million (11.7%) compared to the same period of the year. In cumulative terms, net indirect tax revenues in the first seven months amounted to KM 4.68 billion, representing a growth of KM 282.0 million (6.4%) at the annual level.

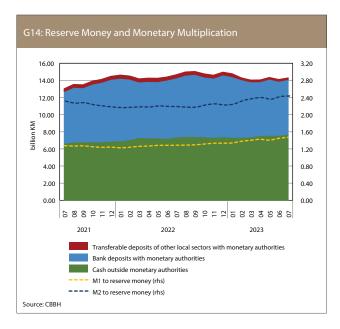

In July, revenues from excise duties increased considerably at the monthly level, mainly to changes of tax policy referring to collection of excise duties on tobacco products. The changed regime of excise payment on tobacco products includes payment of excise duties in imports of tobacco products instead of the previous practice of collection of excise duties when taking over excise duty stamps. Due to a changeover to a new collection system, there was a one-off loss of revenues in the previous period, so the base was lower. In the first seven months, the cumulative collected net amount was KM 910.1 million on the basis of excise duties, which is slightly higher compared to the same period of the previous year (KM 1.1 million or 0.1%).

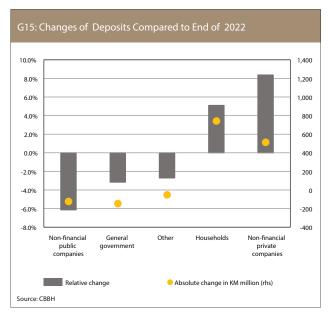

The total funds in the amount of KM 1.19 billion were planned for general government sector foreign debt servicing in 2023, which is 14.6% of the projected indirect tax revenues for 2023. A significant amount was repaid in July (KM 111.9 million), which is 14.6 in percents of indirect tax revenues for the mentioned month. The stable collection of revenues from indirect taxes ensures the sustainability of debt repayment.

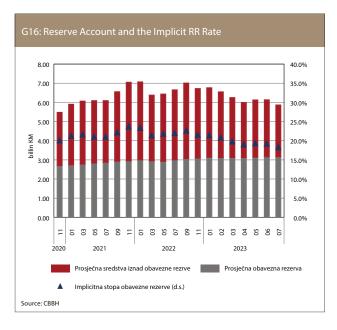

Following a decrease of net foreign exchange reserves recorded in June 2023, a monhtly growth was again seen in July in the amount of KM 247.9 million, while the balance of foreign exchange reserves was KM 15.56 billion. The strongest contribution to the growth of foreign exchange reserves was that of a positive KM purchase and sale balance in the amount of KM 190.8 million. KM 111.9 million was the amount of foreign debt repayment in July 2023. At the same time, a significant decrease of foreign exchange reserves by KM 700.00 million was seen at the annual level, along with that of monetary liabilities, which affected a further growth of coverage ratio, amounting to 104.36% at the end of the reporting period. In the reporting period, a continuing monthly growth of deposits with non-resident banks was seen in the foreign exchange reserve structure.

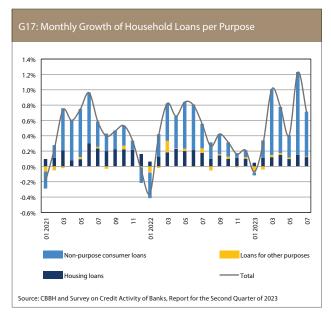

In July 2023, an increase of reserve money by KM 181.8 million was seen at the monthly level, the reserve money balance still being lower than the average recorded for 2022 by KM 317.33 million, i.e. by 373.2 million compared to the same period of the previous year. The largest contribution to the annual decline of this component came from decrease of bank deposits and deposits of other local sectors with monetary authorities by KM 467.7 million and KM 203 million respectively. At the same time, in 2023, there was a continuing monthly growth trend of cash outside monetary authorities except in June, as well as growth at the annual level. A significant monthly growth trend of monetary aggregates M1 and M2 by KM 632.6 milion and KM 629.0 million respectively was mainly a consequence of the growth of transferable deposits in the local currency (KM 511.9 million). Consequently, a growth of monetary multipliers at the monthly and annual levels was recorded.

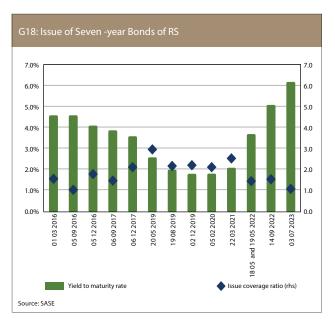

As in May, in July, too, the total bank deposits increased. The monthly growth rate is 1%, and the annual growth rate is 7.5%. The recorded increase in deposits in July was a consequence of the increase in deposits of non-financial companies (KM 271 million), and cantonal deposits also increased significantly (KM 200 million). Thus, in July, the deposits of non-financial companies entered the sixth consecutive month of growth at a double-digit annual rate. Observing in particular the private (households and non-financial private companies) and the public sector (non-financial public companies and the general government sector) in the period from the end of last year to the end of July this year, we notice a completely different trends of deposits by sector.

The average base for the calculation of RR has recorded continuous growth since April 2023, which is mostly a consequence of the growth of the base in the domestic currency, and only in July the base is higher by KM 186.68 million compared to the previous month. At the same time, the average balance of funds in the reserve account at CBBH in July was lower by KM 267.14 million on a monthly basis, which is entirely related to the reduction of the surplus above the required reserve (KM 272.54 million). From 1 July 2023, the Decision of the CBBH Governing Board, which stipulates a change in the remuneration rate for the required reserve, is applied. The Decision defined that a fee rate of 50 basis points (0.50%) is paid to commercial banks on required reserve funds as per the base in the domestic currency, while on required reserve funds as per the base in foreign currencies and in the domestic currency with a currency clause, the fee at a rate of 30 basis points (0.30%) is paid to commercial banks. The rate of RR in the observed period did not change and amounts to 10%.

After the extremely high monthly growth of total loans of 1.4% was recorded in June, last time a such was recorded in March 2017, in July the loan growth was 0.4%. Credit growth was almost completely realized due to the still relatively high demand for loans from the household sector, while almost no significant monthly changes were recorded in other sectors. Household loans have been growing for the sixth month in a row, although banks have started to tighten credit terms since the second quarter of 2022, and further tightening of credit standards is expected in the third quarter of this year. In the last year, banks have been tightening lending conditions month by month in terms of collateral and the amount of the interest margin. The average interest rates on household loans did not change significantly compared to the previous month. The interest rate on housing loans (3.9%) is lower by 10 b.p., and the interest rate on other loans (5.7%) is slightly reduced (by 4 bp).

In July, Republika Srpska (RS) issued long-term debt (bonds) twice. The first issue, with a nominal value of KM 45 million, was for five years, and the second issue, with a nominal value of KM 30 million, was for seven years. The issues were successfully realized, but with very low demand, and at the same yield to maturity rate (6.1%). In addition to the maturity, the issues also differ in the method of repayment. Part of the principal of the five-year bond matures each year (four years at 10% and finally 60%), while the principal of the seven-year bond matures at the end of the seventh year. According to the indicative calendar for the issuance of FBH securities for 2023, three-month treasury bills (KM 50 million) and six-year bonds (KM 30 million) were supposed to be issued, but the public call for participation in the issues was not published.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

The revised data for the period January 2006 – November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.

The data on the "complete" balance sheet, with the included passive sub-balance, are still available at: http://statistics.cbbh. ba:4444/Panorama/novaview/SimpleLogin_bs.aspx

In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM.

Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards applied in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred at the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, at the liabilities side: decrease of liabilities to non-residents in the amount of KM624 million, an increase in loan loss provisions by KM 472 million and other liabilities increased by KM 7 million.

In February 2011, one bank from BH Federation reclassified deposits in the amount of around KM 80 million, from the deposits of public companies to the Entities' governments deposits, in line with the IMF recommendations.

By order of the FBH Banking Agency, in June 2010, one bank made a reclassification of about KM 300 million of claims based on securities on domestic institutional sectors to the claims on non-residents. In December 2010, the same bank made this reclassification, retroactively, in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease in other items net.

One bank from FBH made a reclassification of financial instruments in the foreign assets amounting to about KM 40 million for the period January - August 2010. Claims on non-residents based on loans were reclassified in claims on non-residents on the basis of securities, which resulted in changes in the short- term and long-term foreign assets.

By order of the Banking Agency of Republika Srpska one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, .i.e.. the decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively, in the appropriate amounts, by months, ranging from 50 - 150 million KM.

In accordance with new regulations of the RS Banking Agency, published in the Official Gazette of RS, no.136/10, which has regulated a new manner of recording receivables classified in category "E", accounting and bookkeeping of interest on non-performing assets and calculation of general and special provisions, RS banks, in the data for December 2010, implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of about KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to about KM 180 million within the capital account.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

7,817.4

8,194.6

Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.

Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non- central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).

Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M1 and QM.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data updated according to the MMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006

The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH -monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. According to new methodology, Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government). Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

Monetary data updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006.

The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in the CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of the CBBH for the extended long-term loans and claims on commercial banks on the basis of settlement accounts.

Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the Central Bank (monetary authorities) and cash outside commercial banks.

The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Accounts 1 and 2).

Deposits of central government with the CBBH are transferable and other deposits of BH Institutions, Entity Governments, Entity Social Security Funds and those of Brčko District in the local currency. Shares and other equity comprise the equity, current

Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH and it represents consolidation of mutual claims and liabilities among the commercial banks. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.

Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments,Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors).

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non-financial enterprises, private non-financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors). Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added.

Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment /revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

Notes:

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

 $No \ data \ for interest \ rates \ on \ loans \ in \ for eign \ currency \ on \ the \ basis \ of \ credit \ cards \ and \ overdrafts \ to \ non-financial \ corporations.$

^{*} Interest rates in table for revolving loans and credit cards and their amounts refer to the outstending amounts. IRF – initial rate fixation

From July 1st, 2016, the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10%. From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts: in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to 50% of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank. Since May 1st, 2015, the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:

-on the reserve requirement amount – the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero, -on the amount of the funds exceeding the reserve requirement – zero rate of compensation.

The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value. From September 1st, 2014, the remuneration rate has been calculated on the basis of the weighted average interest rate which was earned by the Central Bank of BH on the market in the same period on deposits invested up to a month; and 70% is calculated on the amount of required reserve or minimum 0, while 90% of the mentioned rate is calculated on the amount of excess reserves or minimum 0.

From February 1st, 2011 the required reserves rate on deposits and borrowed assets with contracted term of maturity up to one year was declined from 14% to 10%, while the required reserves rate on deposits and borrowed assets with contracted term of maturity over one year is not changed. From August 1st 2011, the remuneration rate is calculated by the weighted average interest rate which were earned by the Central Bank on deposits invested up to a month in the same period; 70% of this rate is calculated on the amount of required reserves while 90% of the same rate is calculated on the amount of excess reserves.

From July 1st, 2010 remuneration rate on the amount of required reserves is changed and calculated as an average of interest rates, which were earned by the Central bank on overnight deposits in the same period, while remuneration rate on the amount of excess reserves is not changed. From January 1st, 2009 the required reserves rate is 14% on deposits and borrowed assets with contracted term of maturity up to one year and 10% on deposits and borrowed assets with contracted term of maturity over one year.

From April 1st, 2009 remuneration rate is calculated as:- On the amount of required reserves is 0,5%,- On the amount of excess reserves on the rate calculated as an average of interest rates, which were earned by the Central bank on deposits invested up to u month. From May 1st, 2009 the required reserves rate is 7% on deposits and borrowed assets with contracted term of maturity over one year.

From January 1st, 2008 required reserves rate was increased from 15% to 18%.

From October 11th, 2008 required reserves rate was declined from 18% to 14%.

*The base for calculation of required reserves includes deposits and borrowed funds in domestic (in KM and KM with the currency clause) and other currency expressed in KM.

International investment position (IIP) for BH is compiled in accordance with the latest International Monetary Fund Methodology for compilation of Balance of payments (BOP) and International investment position statistics, sixth edition (BPM6). Compilation of the International investment position for the fourth quarter includes the regular revision of previously published data for current year in accordance with most recent available source data. Shortened versions of the applied methodological approach for the compilation of BH IIP statistics are available on the CBBH website.

Criteria for presenting country is the share of export of the country in total three-year BH export (2016, 2017, 2018).

 $Thus, all \ countries \ with share \ higher \ than \ 3,0\% \ are \ separately \ presented, while \ the \ other \ countries \ are \ presented \ as \ sum \ in \ the \ column \ Other \ countries.$
