INTRODUCTORY SUMMARY

The first five months of 2017, in the area of real economy, were characterized by the growth of industrial production of 2.0%, compared to the same period of the previous year (Graph 01). After a two year long decline of consumer prices, their trend changed, where the highest contribution to the general growth of prices came from the prices of transport and food and non-alcohol beverages (Graph 02). In May, following four years of deflation, a positive growth rate of prices (inflation) was recorded, mainly due to the increase of the prices of energy sources in the global market (Graph 03). After a two year long depreciation trend, there was an increase of real effective exchange rate (REER), which had a negative impact on the competitiveness of our products abroad (Graph 04). The indicators of the labour market pointed out a decrease of the number of the unemployed (Graph 05). Due to the growth of imports exceeding the growth of exports, the trade deficit deepened. Such increase of imports resulted from the increase of the value of imports of oil and oil derivatives (Graph 06). In the trade with China and Italy, the deficit significantly deepened at the annual level (Graph 07). In the first five months, the government sector increased its debt on the basis of the issue of securities, while the borrowing from commercial banks in the form of loans was with a lower intensity (Graph 08). Republika Srpska issued five year bonds in May (Graph 09). Government sector revenues on the basis of the revenues from indirect taxes increased in the first five months (Graph 10), primarily due to the collection of VAT ... as a slow increase was recorded in the collection of excise duties (Graph 11). The CBBH foreign exchange reserves and banks' reserve accounts increased over the previous two months, due to the demand for the domestic currency of banks and their customers (Graph 12). The base for the required reserve calculation had been stable for a rather long period of time, so the level of the required reserve was constant since the beginning of the year (Graph 13). Interbank payment transactions increased in May, both in giro clearing and RTGS (Graph 14). A more intensive growth of the loans extended to non-financial companies, with the continued lending to households, resulted in the increase of the annual rate of the total loans (Graph 15). Regarding deposits, companies recorded positive changes, while household deposits decreased after several month long growth (Graph 16). The deleverage process continued, by further decrease of non-resident deposits, while banks increased the funds placed with correspondent banks. So, the increase of net foreign assets was recorded (Graph 17). With the stable growth of monetary aggregate M1, a stronger growth of quasi money was also continued, which had been present since October last year (Graph 18).

G01: Contribution to Monthly Rates of Industrial Production Trend in Bosnia and Herzegovina

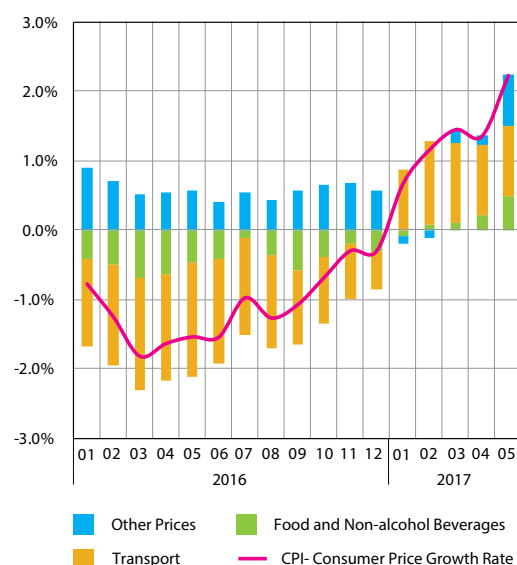

Source: BHAS

In May 2017, a decline of industrial production was recorded both at the monthly and at the annual level, due to a significant decrease of the production and distribution of electric energy. In the period January - May 2017, compared to the same period of the previous year, the increase of the industrial production output by 2.0% was recorded.

Observing the structure of the annual growth rate, in May, a growth was recorded in the industrial areas of manufacturing industry (2.0%) and mining (10.0%), while the production and distribution of electric energy and gas recorded a decline of 14.4%.

G02: Contribution to the Annual Rates of Change of Consumer Prices in Bosnia and Herzegovina

Source: BHAS

The several year long downward trend of consumer prices, at the annual level, was ended in the beginning of the current year, which was followed by a stronger growth of consumer prices.

A positive contribution in the change of the annual rate of consumer prices was recorded with the transport prices (1.0 pp), and the prices of food and non-alcohol beverages (0.5 pp). The overall contribution of the prices of other groups of products and services was 0.7 pp in May, primarily due to a significant growth of the average prices in the section of dwelling and other utility expenses, the increase of which in May amounted to 5.8% at the annual level.

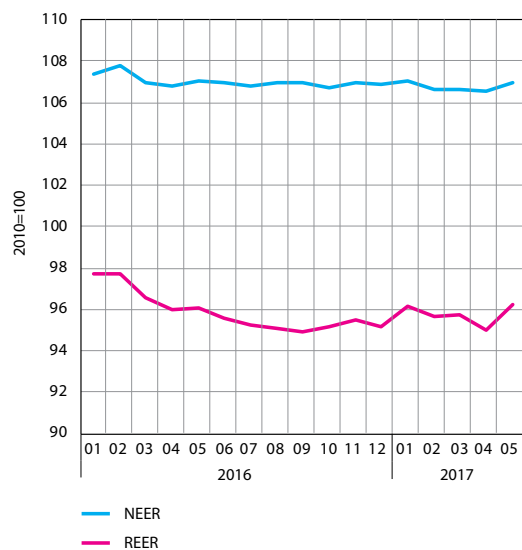

G03: Inflation in Bosnia and Herzegovina and its Main Foreign Trade Partners

Source: IMF/WEQ, 04/2017. Note: * Inflation is presented as CPI.

According to forecasts, and due to a highly expansionary monetary policy of the ECB and the growth of the energy prices, after almost 4 years (2013-2016) the annual inflation rate * in Bosnia and Herzegovina was positive. A similar pattern of the price trend was also observed in other surrounding countries, but deflationary pressures on those markets were much weaker, as these countries implemented active anti-inflation policies. In 2017 and 2018, Bosnia and Herzegovina is expected to lose its competitive advantage in foreign trade which it had due to a lower inflation rate (Croatia) or a considerably lower inflation rate (Italy, Serbia). The expected inflation rates in the end of 2017 (m/m-12) in Serbia, Bosnia and Herzegovina, Italy and Croatia are 2.62%, 1.87%, 1.35% and 0.803% respectively (IMF).

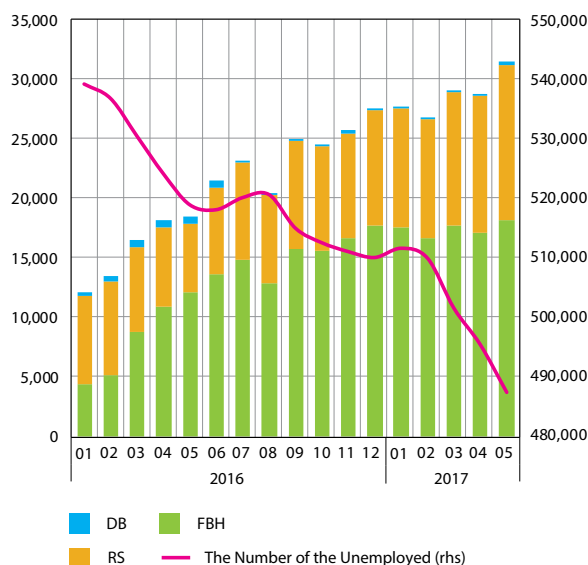

G04: Nominal and Real Effective Exchange Rates of KM (NEER and REER)

Source: CBBH

In May, convertible mark in nominal terms depreciated at the annual level against Russian ruble by 15.1%, US dollar by 2.4%, and Swiss franc by 1.4%. On the other hand, the most significant appreciation of KM was recorded in relation to Turkish lira by 18.9% and British pound by 9.8%. Eventually, in May, the nominal effective exchange rate of KM (NEER) did depreciate by 12 bp, while at the monthly level, the appreciation by 43 bp was recorded compared to April. Real effective exchange rate of KM (REER) appreciated at the annual level by 16 bp, so the two year depreciation trend was ended. At the monthly level, the appreciation was even higher, so in May, REER appreciated by 1.29 pp.

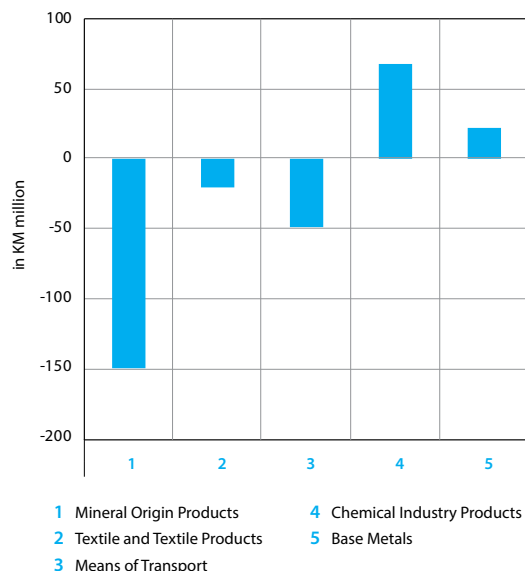

G05: Decrease of the Number of the Unemployed, Annual Changes

Source: BH Agency for Work and Employment

In May, the downward trend of the number of the unemployed was continued in BH, which was particularly intensive since the beginning of 2014, as a result of the increased employment, due to the growth of the economic activity and the increased control of the working status of employees. The number of the unemployed in May decreased compared to the previous month by 7,981 persons or by 1.6%. At the annual level, the number of the unemployed was lower by 31,433 persons or 6.1%.

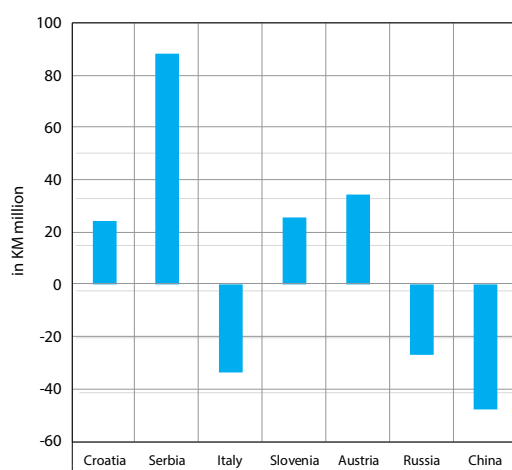

G06: Decrease/Deepening of Trade Deficit by Product Groups

Source: BHAS

During the first five months, due to the growth of imports exceeding the growth of exports, the trade deficit deepened. The trade deficit increased by KM 99.1 million (3.8%). Imports increased by KM 735.4 million or by 11.7%, while exports increased by KM 636.2 million or by 17.3%. The most important effect on the trade deficit deepening came from the increase of the deficit in the exchange of mineral origin products, due to a significant increase of the import value (57.3%). On the other hand, the trade deficit was improved in the exchange of chemical industry products and base metals.

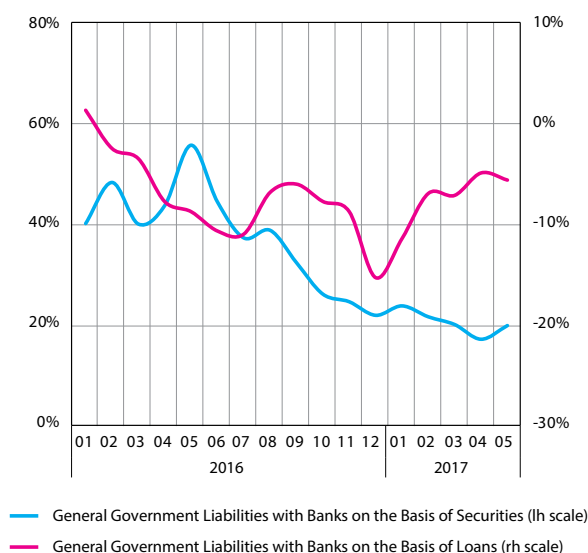

G07: Decrease/Deepening of Trade Deficit by Trade Partners

Source: Tables 25 and 26

The most significant decrease of the trade deficit in the first five months (compared to the same period of the previous year), observed by the trade partners, was recorded in the exchange with Serbia and Austria. In the first five months, the exports to Serbia increased at the annual level by 47.3%, while the imports increased by 5.8%. The exports to Austria increased by 21.3%, while the imports also recorded a growth (13.4%). The most considerable deepening of the trade deficit was recorded in the exchange with China and Italy. The deepening of the deficit with Italy took place due to the increase of the imports by 7.1%, while the exports increased by 4.2%. The deepening of the trade deficit with China resulted from the increased imports from this country by 6.2%.

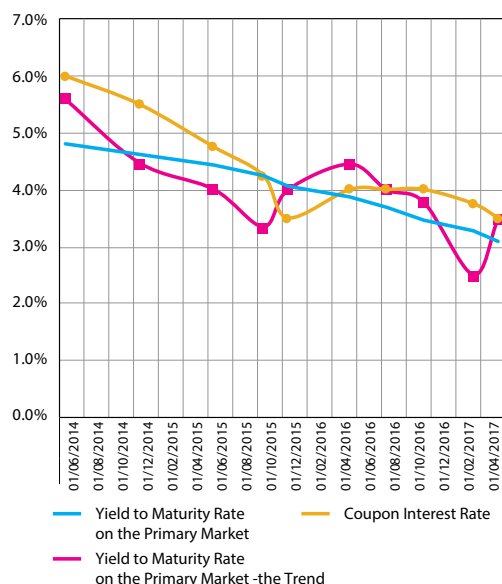

G08: General Government Debt with Commercial Banks

Source: CBBH

In May, a slow growth of the liabilities on the basis of the issued securities of the general government was registered, and the liabilities on the basis of loans recorded a declining trend with a slightly weaker intensity. In the end of May, the total debt of the general government sector on the two mentioned bases amounted to KM 2.37 billion, which represented the annual increase of KM 175.4 million or 8.0%. The banking sector exposure to the general government sector was 8.8% of the total banking sector assets.

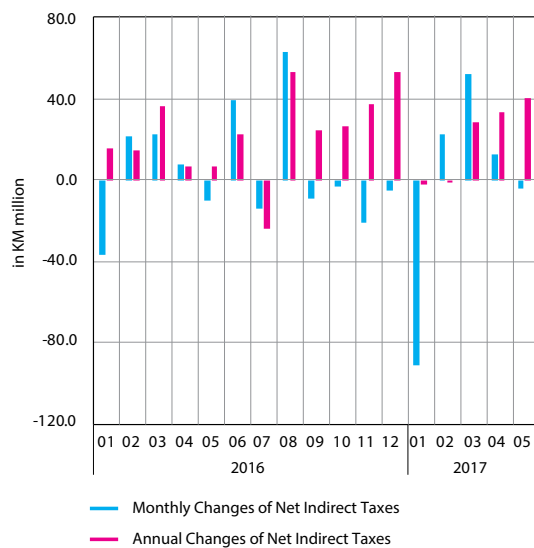

G09: The Five Year Bond Market of Republika Srpska

Source: www.blberza.com. Note: * The issue date is presented on the x axis.

During May, Republika Srpska implemented one public debt issue, which included five year bonds. Compared to the previous issue of five year bonds, the demand for this issue was significantly lower. Yet, the yield to maturity rate was (slightly) lower compared to the coupon interest rate. The issue was sold with the bid to cover ratio of 1.31, and in the previous two issues, the bid to cover ratios were between 2.47 and 2.27. Although the coupon interest rate was at the historically lowest level (3.5%), the yield to maturity rate significantly increased from 2.5% (the issue as of 13 March 2017) to 3.49% and it was at the moment above the trend line.

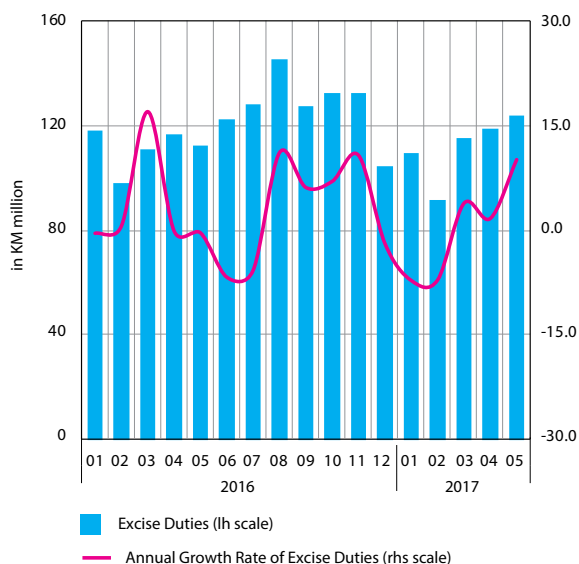

G10: Net Indirect Taxes, Changes

Source: ITA

During the first five months, KM 2.20 billion of net indirect taxes was collected, which was a growth of 4.8% compared to the same period of the previous year. After the quarterly growth of the revenues at the monthly level, a slow decline in the collection of the revenues was recorded in May (KM 4.4 million), primarily as a result of a lower collection on the basis of VAT and a higher amount of reimbursements from the revenues.

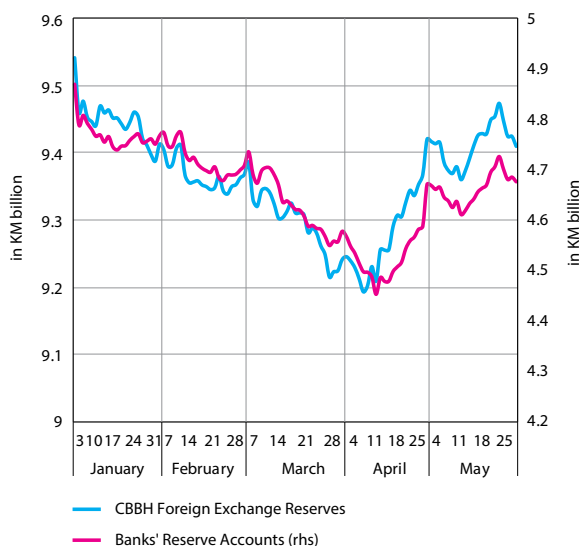

G11: Excise Duties, Annual Growth Rates

Source: ITA

In May, the upward trend of the revenues from excise duties was continued at the annual level (10.2%). During the first five months, KM 558.5 million was collected on the basis of excise duties, which was a low growth of KM 2.2 million (0.4%) compared to the first five months of the previous year. The annual growth of the revenues on this basis was primarily the result of the effects of amendments and supplements of the Law on Excise Duties of BH.

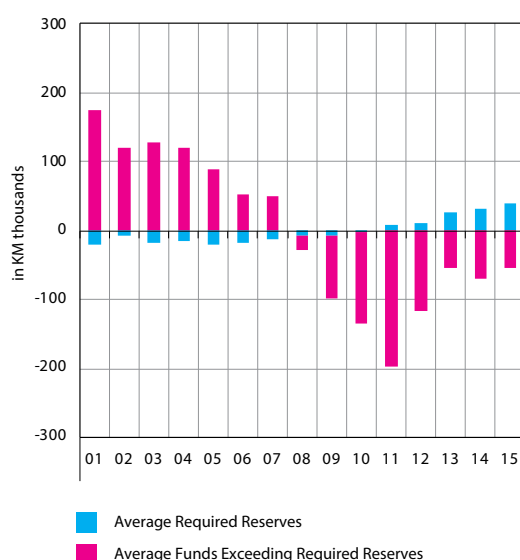

G12: The CBBH Foreign Exchange Reserves and Banks' Reserve Accounts, Daily Positions

Source: CBBH

The declining trend of the foreign exchange reserves and banks' reserve accounts had been present since the beginning of the year and was ended in the end of the first ten day period of April. The decrease of the foreign exchange reserves since the beginning of the year was seasonal due to the pressure of repayment of the foreign debt of the public and private sectors in the first quarter. The demand for domestic currency by banks and their clients through a positive balance of KM purchase and sale resulted in the increase of the foreign exchange reserves and the balances of banks' reserve accounts over the previous two months.

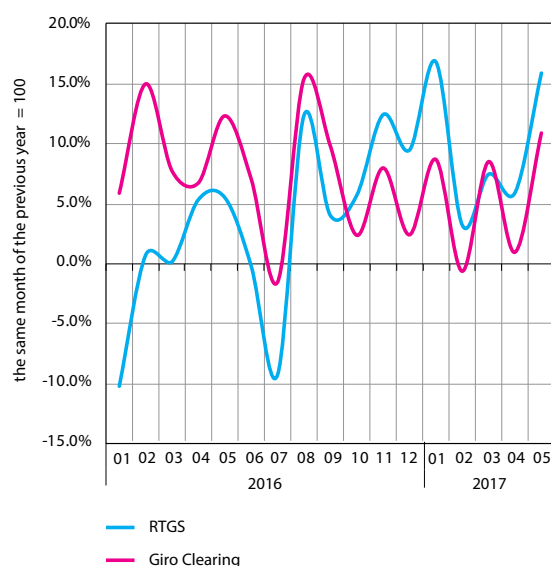

G13: Deviations from the Average Balances in Reserve Accounts

Source: Table 17

The base for the required reserve calculation was stable for a longer period of time. So, the level of required reserves was almost constant since the beginning of the year. The funds exceeding required reserves recorded some oscillations, indicating a continuous decrease which was present since the beginning of the year. The largest decrease was recorded in April in the amount of KM 200 thousand. Excess funds in May were quite stable amounting on the average to KM 1.95 billion.

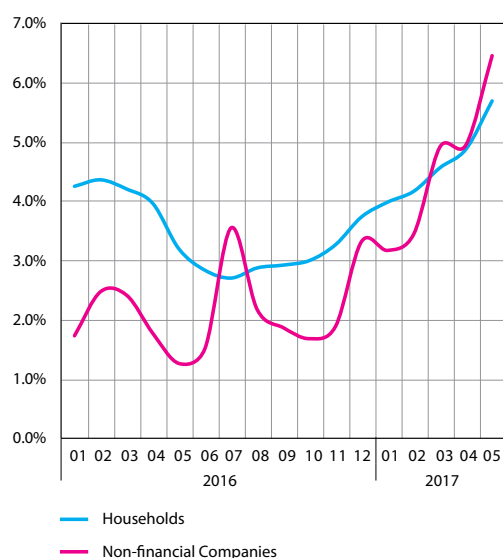

G14: Interbank Payment Transactions

Source: CBBH

In May, a sudden increase of the growth rates of the values of transactions both in Giro Clearing and RTGS took place. Compared to May of the previous year, the transactions in RTGS increased by 15.82%, and those in Giro Clearing by 10.89%. The total amount of KM 8.01 billion was reached in the total of 3.5 million transactions, out of it, the transactions in Giro Clearing accounted for 17.58%. Compared to the same period of the previous year, the total value of interbank payment transactions increased by 14.92%, and compared to the previous month, the total transactions increased by 6.82%.

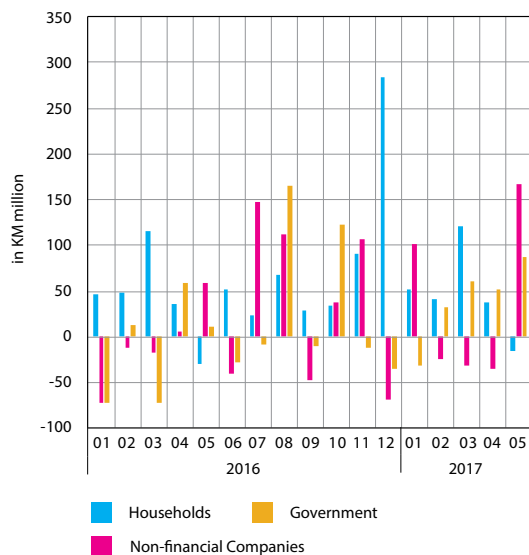

G15: Loans, Annual Growth Rates

Source: Tables 12 and 13

The total loans placed in BH in the end of May amounted to KM 17.74 billion which was an increase of 5.4% at the annual level. The stronger growth of the total loans resulted from a more intensive growth of the loans to companies (6.4%) and those to households (5.7%) compared to the same period of the previous year.

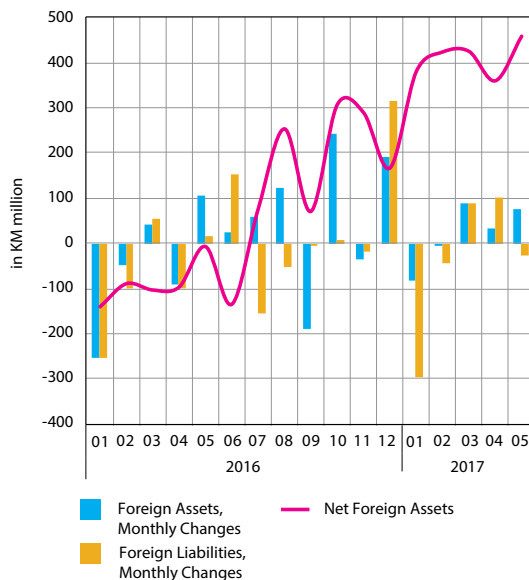

G16: Deposits, Monthly Changes

Source: Tables 10 and 11

The total deposits increased by KM 255.9 million and in that way they reached the level of KM 18.44 billion in May. The highest increase at the monthly level was recorded with non-financial companies and the government sector. After a several month long growth, household deposits decreased in May at the monthly level.

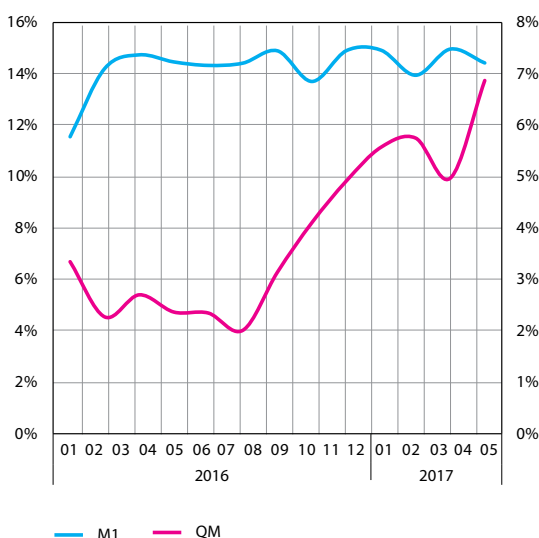

G17: Foreign Assets and Liabilities of Commercial Banks

Source: Table 07

Net foreign assets increased by KM 98.5 million at the monthly level which resulted from the increase of foreign assets and a decrease of foreign liabilities. Foreign assets increased mainly due to the increase of deposits with correspondent banks, while a decrease of foreign liabilities was mainly caused by a decrease of non-residents' deposits.

G18: Annual Growth Rates of Monetary Aggregates

Source: Table 04

While the annual growth rates of M1 remained stable and quite high, quasi money recorded an upward trend since October last year. So, even less liquid components of money supply started to record a considerable increase. Such growth of quasi money resulted from the growth of other deposits in the domestic currency, and transferable deposits in foreign currencies.

Notes applicable for tables 4, 5, 7, 8, 9, 10, 11, 12, 13.

The revised data for the period January 2006 – November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.

The data on the „complete“ balance sheet, with the included passive sub-balance, are still available at: http://statistics.cbbh.ba:4444/Panorama/novaview/SimpleLogin_bs.aspx

In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM.

Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred on the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, on the liabilities side: decrease of liabilities to non-residents in the amount of KM 624 million, an increase in loan losses provisions by KM 472 million and increase of other liabilities by KM 7 million.

In February 2011, one bank from the Federation of BH made the reclassification of approximately KM 80 million of deposits, from deposits of public enterprises to entity government deposits, in accordance with IMF recommendations.

By order of the Federal Banking Agency in June 2010 one bank has made a reclassification of about KM 300 million claims based on securities on domestic institutional sectors to the claims on non-residents. In December 2010 the same bank made this reclassification retroactively in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease of other items net.

One bank from the Federation of BH made a reclassification of financial instruments in the foreign assets for the period January -August 2010 amounting to about KM 40 million. Claims on non-residents based on loans were reclassified into claims on non-residents based on securities, which resulted in changes in the short- term and long- term foreign assets.

By order of the Banking Agency of Republika Srpska, one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, i.e. decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively in the appropriate amounts, by months, ranging from KM 50 - 150 million.

In accordance with new regulations of the RS Banking Agency, published in the Official Gazette of RS no.136/10, which have defined a new way of recording claims classified in category "E", accounting and recording of interest on non-performing assets and calculation of general and special provisions, RS banks, in the data for December 2010 implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to KM 180 million within the capital account.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes: Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes: The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.

Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).

Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M1 and QM.

Monetary data updated according to the MMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006.

Notes: The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH - monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. According to new methodology, Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes: Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government). Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes: The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of CBBH for the long-term loans and claims on commercial banks on the basis of settlement accounts. Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Account 1 and 2). Deposits of central government with CBBH are transferable and other deposits of BH Institutions, Entity governments, Entity social security funds and those of Brčko District in domestic currency. Shares and other equity are comprised of equity, current year result, general and special reserves and revaluation/ adjustment. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes: Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko District (from July 2001 until November 2002), NBRS (until December 1998) and the NBBH (until November 2002). Mutual claims and liabilities among the commercial banks have been consolidated. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.

Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments, Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors). Balance sheets of commercial banks of Federation of BH in addition to active sub-balance sheets include data from passive sub-balance sheets as well. Passive sub-balance sheets include liabilities arising from foreign loans and frozen foreign currency deposits of citizens, which occurred until 31 March 1992. These liabilities will be taken over, in the process of privatisation, by Ministry of Finance of Federation of BH in accordance with the entity Law on Opening Balance Sheets of Enterprises and Banks and Law on Privatisation.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes: Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non-financial enterprises, private non-financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors). Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added.

Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment/revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Total deposits represent liabilities of commercial banks of BH towards all domestic institutional sectors in domestic and foreign currency. Total loans represent claims of commercial banks of BH on all institutional sectors, in domestic and foreign currency.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

By order of FBA in March 2010, loans to households with currency clause with one bank were reclassified, from loans in EUR to loans in KM.

From September 2004, change in structure of loans by currency is result of implementation of recommendations of IMF Mission for monetary and financial statistics in BH from May 2004. According to that, all loans in KM which include currency clause (indexed to euro), should be classified as loans in KM (domestic currency).

Data on structure of deposits and loans by currency in Republika Srpska until September 1999 are not available, so for this period the total amount of deposits and loans in RS is included in the column Total.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes: Deposits of domestic institutional sectors represent liabilities of commercial banks towards all institutional sectors. Deposits on the BH level represent deposits with commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko Branch (from July 2001 until November 2002), deposits with NBRS (until December 1998), deposits with NBBH (until November 2002) and deposits with the Payment Bureaus Sarajevo and Mostar (until November 1999). Sight deposits represent liabilities of commercial banks related to transaction accounts and sight deposits in domestic and foreign currency.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes: Loans to domestic institutional sectors represent claims of commercial banks on all institutional sectors. Loans at the BH level include loans extended by commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko Branch (from July 2001 until November 2002), loans with NBRS (until December 1998) and NBBH (until November 2002). The total of claims on all levels of government and funds (short-term and long-term) are shown in Table of short-term loans (columns 3,4,5,6,7) in total amount, because source data do not provide a maturity structure of claims for governments and funds. Short-term loans represent claims of commercial banks on all domestic institutional sectors up to one year, in domestic and foreign currency.

Claims on BH Institutions have been reclassified since April 2010.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes: Total claims on all levels of government and funds (short-term and long-term) are shown in Table of short-term loans (columns 3,4,5,6,7) in the total amount, because the source data do not provide the maturity structure of claims for governments and funds. Long-term loans represent claims of commercial banks on all domestic institutional sectors over one year in domestic and foreign currency.

Notes:

* Interest rates in table for revolving loans and credit cards and their amounts refer to the outstanding amounts.

IRF – initial rate fixation

... insufficient data to be published

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

No data for interest rates on loans in foreign currency based on credit cards and overdrafts to households.

IRF – initial rate fixation

... insufficient data to be published

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

No data for interest rates on loans in foreign currency on the basis of credit cards and overdrafts to non-financial corporations.

Notes:

From 1 July 2016, the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10%. From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts : in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to 50% of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank. Since 01 May 2015, the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:

-on the reserve requirement amount – the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero,

-on the amount of the funds exceeding the reserve requirement – zero rate of compensation.

The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value.

From 1 September 2014, the remuneration rate has been calculated on the basis of the weighted average interest rate which was earned by the Central Bank of BH on the market in the same period on deposits invested up to a month ; and 70% is calculated on the amount of required reserve or minimum 0, while 90% of the mentioned rate is calculated on the amount of excess reserves or minimum 0.

From August 1st 2011, the remuneration rate is calculated by the weighted average interest rate which were earned by the Central Bank on deposits invested up to a month in the same period; 70% of this rate is calculated on the amount of required reserves while 90% of the same rate is calculated on the amount of excess reserves.

From February 1st, 2011 the required reserves rate on deposits and borrowed assets with contracted term of maturity up to one year was declined from 14% to 10%, while the required reserves rate on deposits and borrowed assets with contracted term of maturity over one year is not changed.

From July 1st, 2010 remuneration rate on the amount of required reserves is changed and calculated as an average of interest rates, which were earned by the Central bank on overnight deposits in the same period, while remuneration rate on the amount of excess reserves is not changed.

From May 1st, 2009 the required reserves rate is 7% on deposits and borrowed assets with contracted term of maturity over one year.

From April 1st, 2009 remuneration rate is calculated as:- On the amount of required reserves is 0,5%,- On the amount of excess reserves on the rate calculated as an average of interest rates, which were earned by the Central bank on deposits invested up to a month.

From January 1st, 2009 the required reserves rate is 14% on deposits and borrowed assets with contracted term of maturity up to one year and 10% on deposits and borrowed assets with contracted term of maturity over one year.

From October 11th, 2008 required reserves rate was declined from 18% to 14%.

From January 1st, 2008 required reserves rate was increased from 15% to 18%.

*The base for calculation of required reserves includes deposits and borrowed funds in domestic and other currency expressed in KM.

Notes:

The share of BH exports to the country in total BH exports for 2010 was used as a criterion for presenting the country of exports. Thus, all countries with higher share of exports than 4% of the total BH exports for 2010 are separately presented, while the other countries are presented in the column "Other Countries".

* Until February 12, 2007, the data on exports to Serbia and Montenegro were presented as exports to Serbia, but since then Serbia and Montenegro have been presented separately.

Notes:

The share of BH imports from the country in total BH imports for 2010 was used as a criterion for presenting the country of imports. Thus, all countries with higher share of imports than 3% of total BH imports for 2010 are separately presented, while the other countries are presented in the column "Other Countries".

* Until February 12, 2007, the data on imports from Serbia included imports from Montenegro as well, while since then imports from Montenegro has been included in the column "Other Countries".
