## INTRODUCTION

In October, the inflation rate in the euro area was slightly lower compared to the previous month (Graph 01). At the same time, yield trends in the EU point to only a slight decline, in line with inflation developments and expectations about the ECB's monetary policy (Graph 02). Unlike the euro area, BH recorded a higher inflation rate compared to the previous month, mostly due to a strong increase of the prices of restaurant and hotel services, food, as well as utility costs (Graph 03).

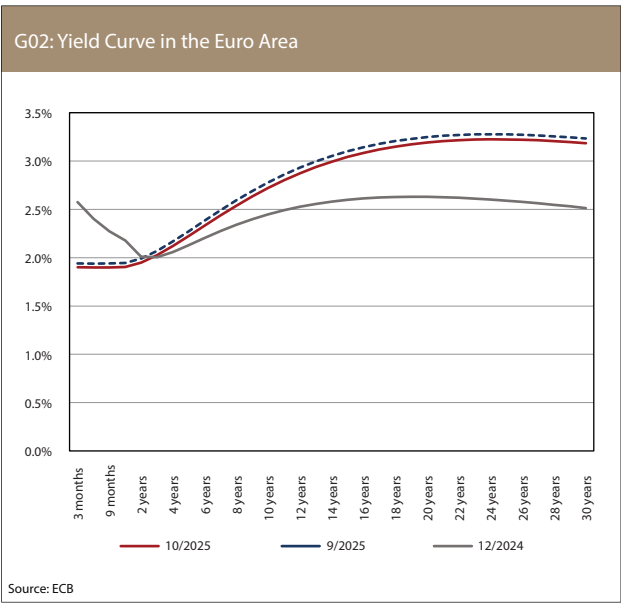

In October, the monthly growth of the total loans and deposits continued in BH, and the annual growth rates of both loans and deposits were significant (Graphs 04 and 05). The base for the required reserve calculation recorded an increase at the monthly level, while the excess holdings above the required reserve recorded a slight decrease (Graph 06). Net foreign exchange reserves recorded a strong monthly growth in October, and due to a slower growth of monetary liabilities, the coverage ratio was increasing (Graph 07). The growth of reserve money, together with the strong growth of transferable deposits in domestic currency, led to a monthly increase of the monetary aggregates M1 and M2. Stronger growth of reserve money, compared to more moderate growth of M1 and M2, resulted in a slight decrease of the multiplier for both aggregates in October (Graph 08).

In October, a monthly increase of the general government liabilities with commercial banks was recorded, with a simultaneous slight increase of deposits (Graph 09). On the other hand, a monthly decline of the net collection of indirect tax revenues was evident (Graph 10). In 2026, lower repayment of the general government external debt is planned, with the largest part of the liabilities maturing in the first half of the year (Graph 11). In October, the Federation of BH issued nine-month treasury bills, while Republika Srpska continued with regular issues of five-year bonds (Graph 12).

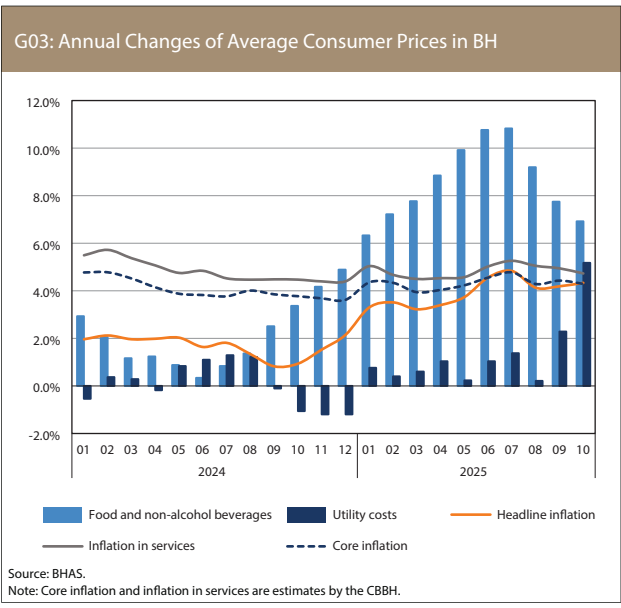

In the euro area, the industrial output recorded annual growth for the ninth successive month, while in BH a slight annual decline of industrial production was recorded (Graphs 13 and 14). In October, the real retail trade turnover index recorded the highest annual growth since the middle of the previous year (Graph 15). The values of exports as well as imports of goods also recorded annual increases in October (Graphs 16 and 17). The nominal effective exchange rate (NEER) appreciated in September, largely as a result of the significant nominal appreciation of our anchor currency against the Turkish lira. The real effective exchange rate (REER) also recorded an appreciation, primarily due to higher inflation rates in BH on average, compared to those of the main trading partners (Graph 18).

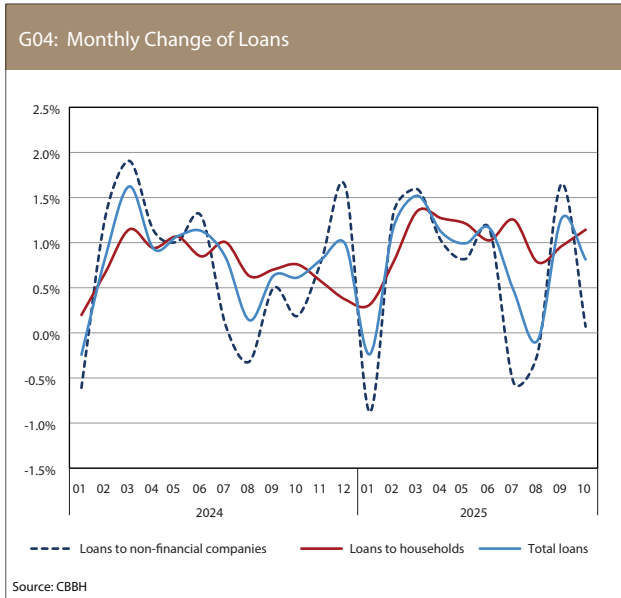

In October, the euro area recorded an annual inflation rate of 2.1%, after 2.2% recorded in the previous month. Food prices recorded the lowest annual growth rate (2.5%) since January this year, mostly due to a slowdown of unprocessed food prices growth. On the other hand, energy prices, for the eighth successive month, recorded an annual decline. The services category continued to make the largest contribution to the overall price growth in the euro area, accounting for 45.6% of the household spending. Core inflation in the euro area recorded an annual rate of 2.4% staying higher than headline inflation. Services prices recorded an annual growth rate of 3.4% in October, continuing to outpace the increases of headline and core inflation.

Expectations that the Fed will continue to cut the key interest rates, as well as the low probability that the ECB will do the same, slightly stimulated demand for the euro area bonds, increased their price and slightly lowered the yields. Factors that affect the still high yields in the long term are the unfavorable fiscal positions of some euro area countries, geopolitical tensions and the redirection of a part of investments to stock markets, where growth is expected to continue.

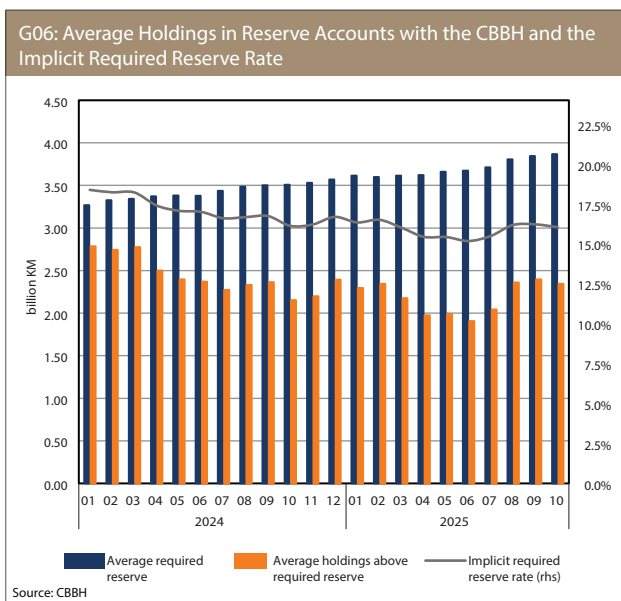

At the end of October 2025, an annual inflation rate of 4.3% was recorded, which is higher by 3.4 pp than in the same month of the previous year. The highest annual inflation rates, in October, were recorded for the categories of restaurant and hotel services (7.7%), food and non-alcohol beverages (6.9%), and health services (5.5%). The category of utility costs also recorded the strongest annual price growth (5.2%) since mid-2023, largely due to strong growth of electric energy prices. The growth rates of estimated core inflation and headline inflation were at the moment completely even, partly resulting from the strong growth of food and non-alcohol beverage prices, while the growth of core prices was significantly contributed by the growth of prices in the service sector, in which cost pressure increased following the minimum wage increase. Core inflation in October was estimated at 4.3% and inflation in services at 4.7%.

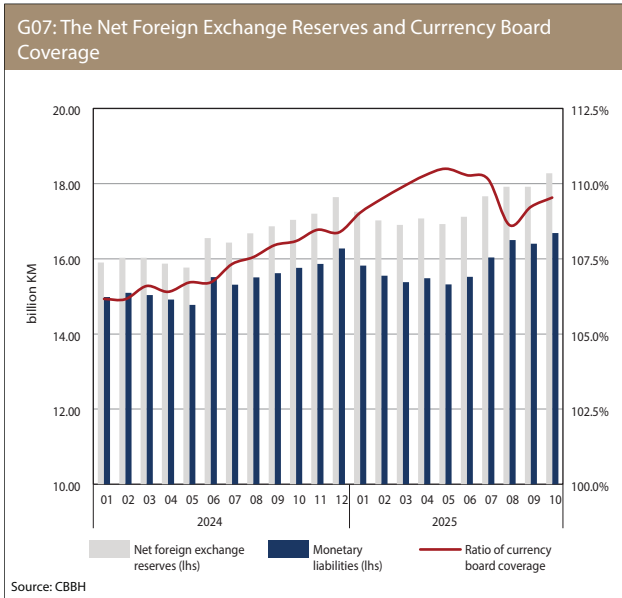

In October, an increase of the total bank loans was recorded, and the annual credit growth of 10.4%, the highest since April 2009. Unlike previous months, household loans contributed to the overall credit growth. According to banks' expectations on demand and credit standards, announced in the Bank Lending Survey for the fourth quarter of this year, such high credit dynamics is highly probable to be maintained. Interest rates on loans were not changed significantly compared to the previous month.

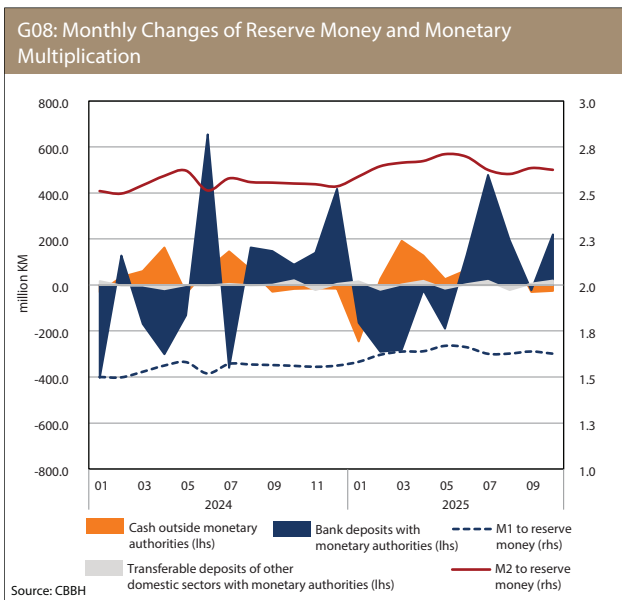

The total deposits recorded a monthly increase of 1% in October. The largest contribution to this increase, in the amount of 0.6 percentage points, comes from household deposits. At the same time, there was no strong growth of deposits of private non-financial companies, while this sector, together with the sectors of non-financial public companies, the general government and other non-financial institutions, individually contributed to the overall monthly growth by 0.1 percentage points each. In the last four months, there has been no significant change in the structure of annual deposit growth. The annual growth rate of deposits was 10.7%, which represents the highest recorded growth since the beginning of 2022. At the same time, deposit interest rates decreased on monthly basis, while interest rates on newly contracted deposits of non-financial companies decreased as well.

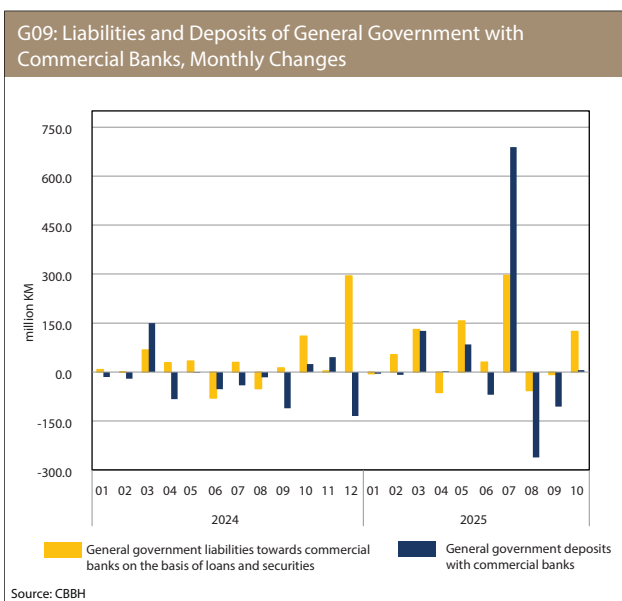

In October 2025, the average base for the required reserves calculation amounted to KM 38.68 billion, which represents a monthly growth of KM 245.2 million. Compared to the same month of the previous year, the base increased by approximately KM 3.59 billion. The average balance of the required reserve account in October amounted to KM 6.21 billion, of which KM 3.87 billion was related to the required reserves amount, while KM 2.34 billion represented an excess holding above the required reserve. The excess holding above the required reserve recorded a monthly decline of KM 52.2 million in October. In line with the above-mentioned developments in the reserve accounts, the implicit reserve requirement rate increased by 18 basis points amounting to 16.24% at the end of October. At the same time, the reserve requirement rate and the remuneration on funds in the reserve accounts with the CBBH remained unchanged in the reporting period.

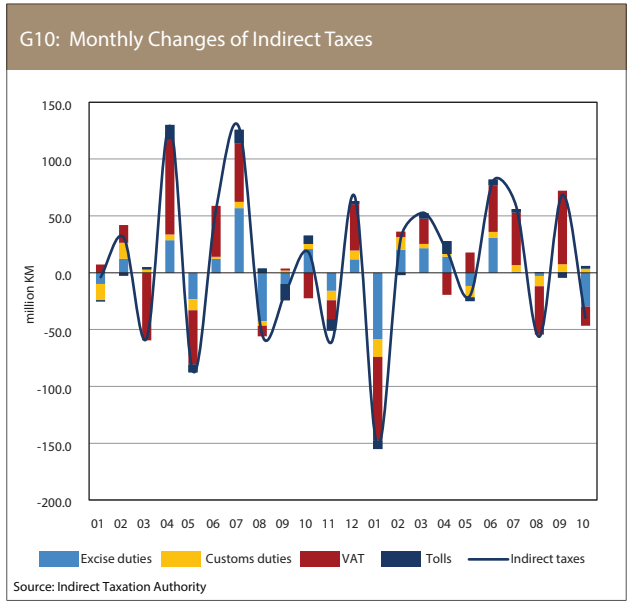

In October 2025, a significant monthly increase of net foreign exchange reserves was recorded, amounting to KM 361.3 million. In absolute terms, foreign exchange reserves amounted to approximately KM 18.28 billion at the end of October 2025. At the annual level, foreign exchange reserves increased by KM 1.24 billion. The growth of foreign exchange reserves in October 2025 was predominantly a consequence of the KM purchase and sale positive balance with banks and internal depositors of KM 191.9 million. In October 2025, the repayment of external debt amounted to KM 66.2 million. Due to the slower growth of monetary liabilities than the recorded growth of net foreign exchange reserves, the coverage ratio of the currency board increased by 31 basis points, to the level of 109.54%, at the end of October 2025.

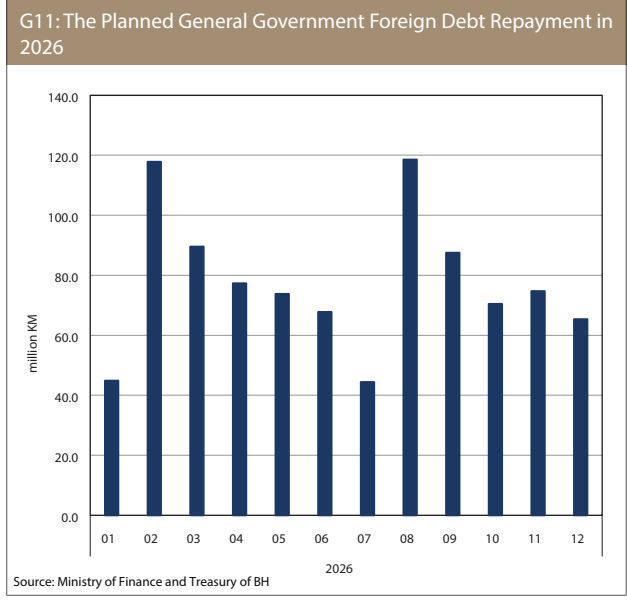

In October 2025, reserve money amounted to KM 15.92 billion, which represents a monthly growth of KM 212.9 million. The growth of reserve money primarily resulted from the growth of banks' reserves with monetary authorities. The above-mentioned increase of reserve money, together with the strong growth of transferable deposits in domestic currency and other deposits in foreign currency, led to a monthly growth of monetary aggregates M1 and M2, in the amounts of KM 159.9 and 407.8 million, respectively. Stronger growth of reserve money, compared to more moderate growth of M1 and M2, led to a decrease of the multiplier for both aggregates in the observed month.

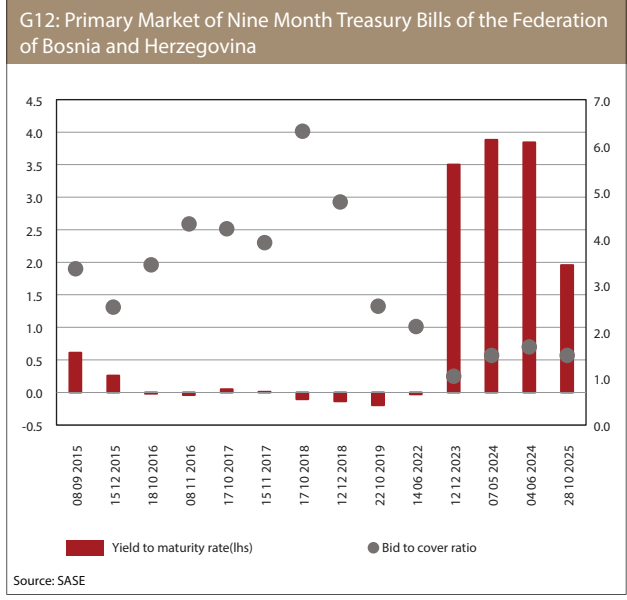

In October, there was a monthly increase of the general government's liabilities towards commercial banks in the amount of KM 124.1 million. At the end of October, the total liabilities of the general government sector towards commercial banks amounted to KM 4.53 billion, which represents a significant annual growth of KM 957.2 million (26.8%). At the same time, a slight monthly increase of the general government deposits in the amount of KM 6.0 million was seen, after their consecutive decreases in the previous two months. The banking sector exposure to the general government sector increased compared to the same period of the previous year amounting to 9.7% of the total banking sector assets.

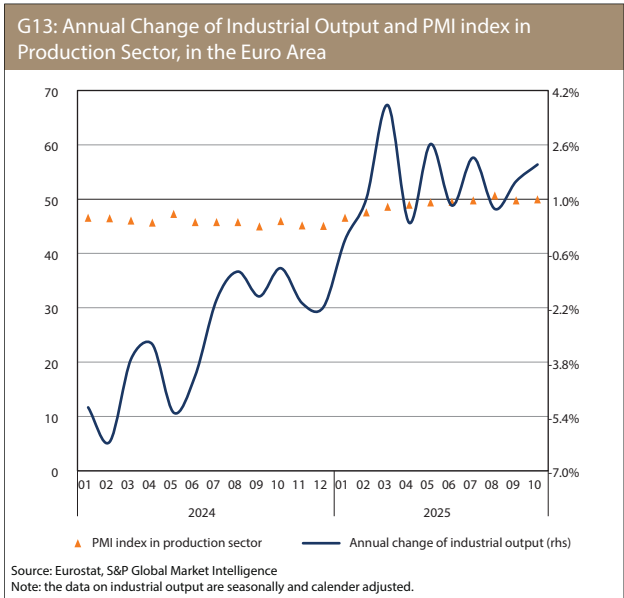

In October, a monthly decline of net collection of indirect tax revenues (-4.2%) was recorded. According to the indirect tax items, the monthly decline of excise revenues (KM 16.8 million) contributed most to this decline. In October, returns were higher by 0.4% than in the previous month. Monthly revenue growth was recorded only from customs duties and tolls at the levels of 6.8% and 3.1% respectively. For the ten months of the current year, the cumulative net revenues from indirect taxes amounted to KM 8.27 billion, which represents an increase of KM 447.3 million (5.7%) on an annual level.

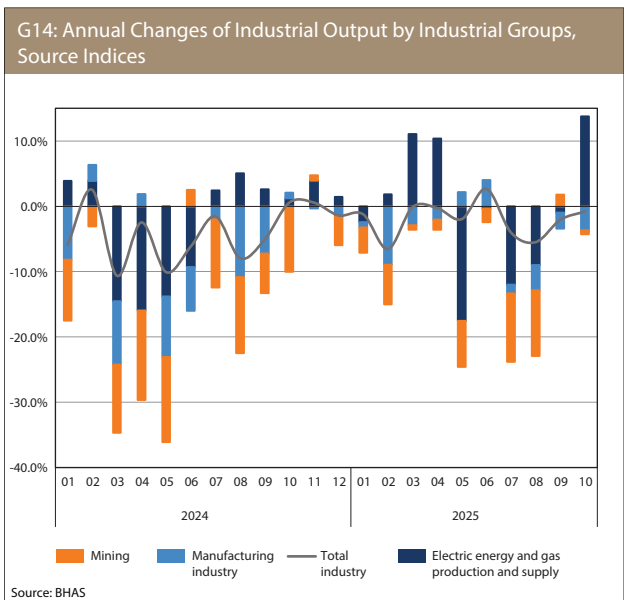

In 2026, the repayment of the external debt of the general government sector is planned in the amount of KM 932.1 million, which is lower by KM 400.7 million or 30.1% than the amount of serviced external debt in 2025. The largest amount of debt repayment is planned in the first half of the year, when the impact on foreign exchange reserves will be the strongest.

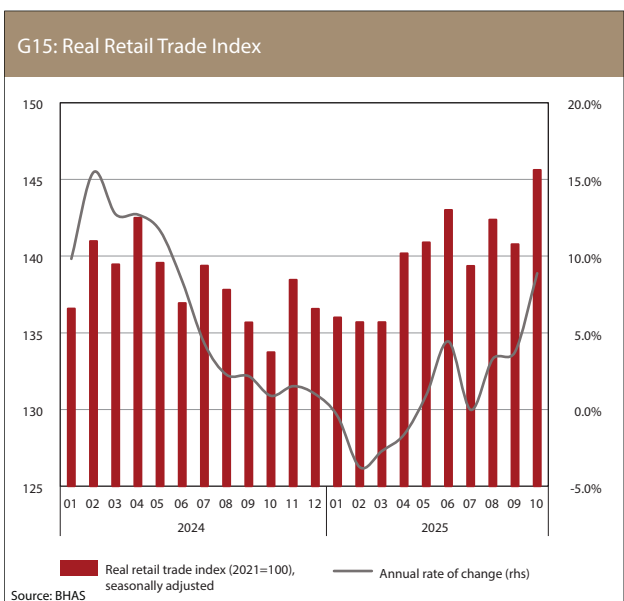

The Federation of Bosnia and Herzegovina issued nine-month treasury bills in October. KM 40 million was issued. The issue was successful, and the demand exceeded the supply by 50%. Compared to several previous issues, the yield to maturity rate was significantly lower and the range between the highest and the lowest yield rate was low. Republika Srpska continued the regular issuing of five-year bonds with annual interest calculation and principal payments at the end of the fifth year. The planned amount of the issue, KM 50 million, was overpaid by 6.7%, so the total amount of the issue was KM 53.36 million. From February 2025, this has been the seventh consecutive issue carried out at the yield to maturity rate of 5.5%.

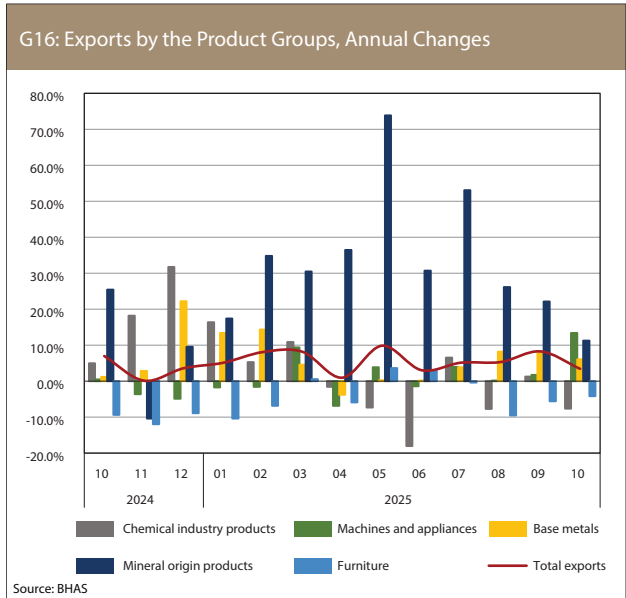

In the euro area, the industrial output recorded annual growth (2.0%) in October, for the ninth successive month. The activities of the manufacturing industry, as well as the production and supply of electric energy and gas also recorded an annual increase of production output in October, of 1.6% and 4.7%, respectively. Looking at the main industrial groups, all groups recorded an annual growth of industrial output, and the largest growth was recorded for the groups of non-durable consumer goods (4.9%) and energy (4.5%). The Purchasing Managers' Index (PMI) for the manufacturing sector recorded a value of 50.0 in October, which means that activity in the manufacturing sector stagnated compared to the previous month.

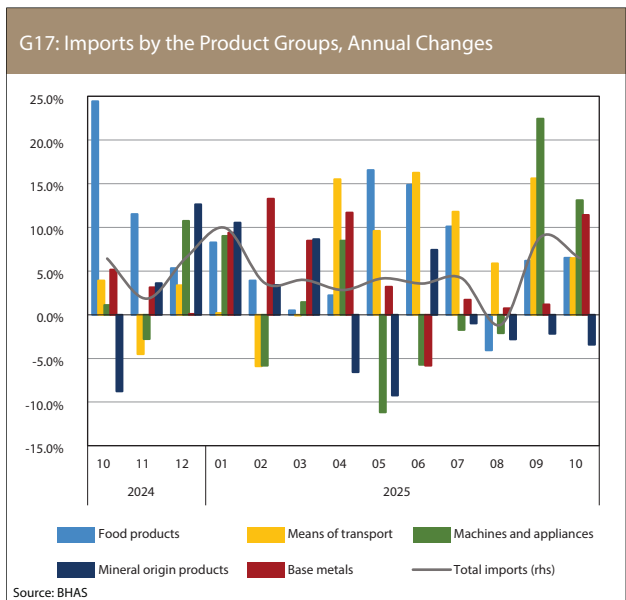

In October, the industrial output recorded a slight annual decline of 0.8%, as a result of a decline of the production output in mining (0.6%) and manufacturing industry (3.6%). On the other hand, electric energy and gas production and supply recorded a strong annual growth (13.8%). For the first ten months of 2025, the industrial output recorded an annual decline of 2.0%. Of the most important industries within the manufacturing industry, the production of base metals recorded the strongest annual decline of production output in October (21.6%). On the other hand, manufacture of finished metal products recorded an annual growth of production output of 7.1%. Looking at the main groups, the strongest annual decline of the production output was recorded by the group of durable consumer goods (25.6%), while the group of energy achieved the highest annual growth of production, of 11.4%.

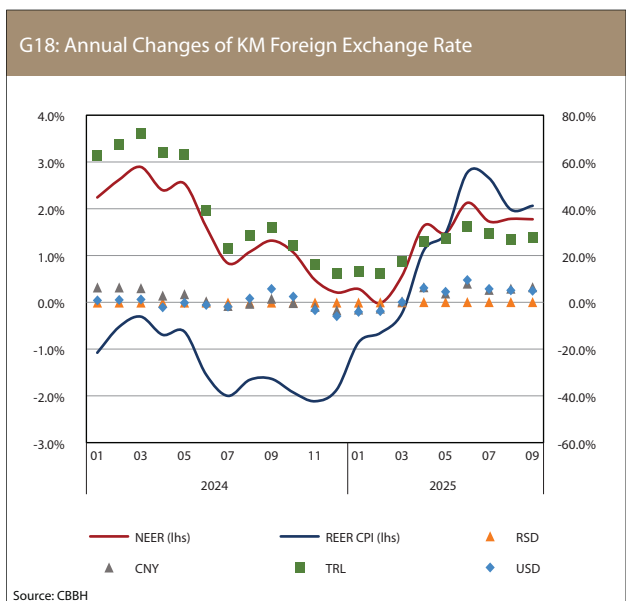

In October 2025, the real retail trade turnover index recorded the highest annual growth (8.9%) since the middle of the previous year. For the first ten months of the current year, an increase of the real retail trade turnover index of 1.2% was also recorded. A very strong annual growth was recorded for the retail trade in furniture, lighting equipment and household electric appliances, of 47.3%. On the other hand, the largest decline in retail trade in food, beverages and tobacco products, and retail trade in books, newspapers, music and video records, of 11.9% and 10.0% respectively.

Export of goods from BH in October 2025 reached the value of KM 1.56 billion, which represents an annual growth of 3.47%. The largest contribution to the annual growth of the value of exports of goods was recorded in the exports of machines and equipment, which recorded an annual growth of 13.4%, followed by products of mineral origin (11.3%), of which the largest part refers to the exports of electric energy, as well as base metals (6.1%). On the other hand, exports of chemical industry products, as well as furniture, recorded an annual decline in value of 7.6% and 4.1%, respectively. The EU is the most important export market for BH goods where 74.8% of the value of exports was placed in October, while 16.9% of the value of exports was placed on the CEFTA market.

The value of imported goods in BH in October 2025 amounted to KM 2.72 billion, which represents an increase of 6.49% compared to the same month last year. Almost all significant import groups of products recorded an annual increase of value: machines and appliances (13.1%), base metals (11.4%), food products (6.5%) and means of transport (6.5%). Imports of mineral origin products, mostly oil and oil derivatives, recorded an annual decline of 3.4% in October, which can be partly attributed to the base effect due to lower oil prices in the current year compared to the previous year. The largest part of goods was imported from the EU market (59.2%), while 11.4% were imported from the CEFTA market.

The nominal effective exchange rate (NEER) appreciated by 1.8% in September compared to the same month of the previous year. The appreciation of the NEER was largely due to the significant nominal appreciation of the EUR, our anchor currency, against the Turkish lira, amounting to 27.6% at the annual level in September. Annual nominal appreciation in September was also recorded against the Chinese yuan (6.5%) and the US dollar (4.9%). The real effective exchange rate (REER), with the consumer price index used as a deflator, recorded an annual appreciation of 2.1% in September. In addition to the nominal appreciation, the appreciation of the REER CPI is also a consequence of the average higher consumer price rates in BH in September (4.2%) compared to the main trading partners: Italy (1.8%), Germany (2.4%), Slovenia (2.7%) and Serbia (3.1%).

## Notes applicable for tables 4, 5, 7, 8, 9, 10, 11, 12 i 13.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

The revised data for the period January 2006 – November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.

The data on the „complete“ balance sheet, with the included passive sub-balance, are still available at: [http://statistics.cbbh.ba:4444/Panorama/novaview/SimpleLogin\\_bs.aspx](http://statistics.cbbh.ba:4444/Panorama/novaview/SimpleLogin_bs.aspx)

In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM.

Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards applied in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred at the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, at the liabilities side: decrease of liabilities to non-residents in the amount of KM624 million, an increase in loan loss provisions by KM 472 million and other liabilities increased by KM 7 million.

In February 2011, one bank from BH Federation reclassified deposits in the amount of around KM 80 million, from the deposits of public companies to the Entities' governments deposits, in line with the IMF recommendations.

By order of the FBH Banking Agency, in June 2010, one bank made a reclassification of about KM 300 million of claims based on securities on domestic institutional sectors to the claims on non-residents. In December 2010, the same bank made this reclassification, retroactively, in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease in other items net.

One bank from FBH made a reclassification of financial instruments in the foreign assets amounting to about KM 40 million for the period January - August 2010. Claims on non-residents based on loans were reclassified in claims on non-residents on the basis of securities, which resulted in changes in the short- term and long- term foreign assets.

By order of the Banking Agency of Republika Srpska one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, .i.e.. the decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively, in the appropriate amounts, by months, ranging from 50 - 150 million KM.

In accordance with new regulations of the RS Banking Agency, published in the Official Gazette of RS, no.136/10, which has regulated a new manner of recording receivables classified in category "E", accounting and bookkeeping of interest on non-performing assets and calculation of general and special provisions, RS banks, in the data for December 2010, implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of about KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to about KM 180 million within the capital account.

**Notes:**

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

**Notes:**

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.

Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).

Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M1 and QM.

**Notes:**

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data updated according to the MMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006

The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH - monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. According to new methodology, Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey.

**Notes:**

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government). Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

**Note:**

Monetary data updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006.

The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in the CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of the CBBH for the extended long-term loans and claims on commercial banks on the basis of settlement accounts.

Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the Central Bank (monetary authorities) and cash outside commercial banks.

The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Accounts 1 and 2).

Deposits of central government with the CBBH are transferable and other deposits of BH Institutions, Entity Governments, Entity Social Security Funds and those of Brčko District in the local currency. Shares and other equity comprise the equity, current year result, general and special reserves and adjustment/revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets.

**Note:**

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH and it represents consolidation of mutual claims and liabilities among the commercial banks. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.

Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments, Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors).

**Notes:**

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non-financial enterprises, private non-financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors). Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added.

Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment /revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

**Notes:**

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Total deposits represent liabilities of commercial banks of BH towards all domestic institutional sectors in domestic and foreign currency.

Total loans represent claims of commercial banks of BH on all institutional sectors, in domestic and foreign currency.

**Notes:**

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

By order of FBA in March 2010, loans to households with currency clause with one bank were reclassified, from loans in EUR to loans in KM.

**Notes:**

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Loans to domestic institutional sectors represent claims of commercial banks on all institutional sectors. Loans at the BH level include loans extended by commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH Banja Luka.

	10	38,680,249	3,868,025	6,210,797	2,342,772

**Notes:**

The Central Bank of Bosnia and Herzegovina (CBBH) made a Decision on increase of remuneration paid to commercial banks on required reserve, with purpose of harmonisation with the European Central Bank (ECB) policy and mitigating the impact of the ECB benchmark interest rate growth on bank operations in BH. According to this Decision, commercial banks will be remunerated at the rate of 50 basis points (0.50%) on required reserve holdings with the base in local currency KM, and at the rate of 30 basis points (0.30%) on required reserve holdings with the base in foreign currencies and local currency with currency indexation. Remuneration will not be paid for holdings exceeding reserve requirement. When making a CBBH decision on required reserve, all relevant factors were considered, including decisions of the ECB, and trends of key macroeconomic and financial sector indicators, taking care primarily of the currency board stability. The Decision will be applied from 01 July 2023.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

From 1 July 2016, the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10%. From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts : in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to 50% of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank.

Since 01 May 2015, the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:

-on the reserve requirement amount – the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero,  
 -on the amount of the funds exceeding the reserve requirement – zero rate of compensation.

The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value.

\*The base for calculation of required reserves includes deposits and borrowed funds in domestic (in KM and KM with the currency clause ) and other currency expressed in KM.

**Note:**

International investment position (IIP) for BH is compiled in accordance with the latest International Monetary Fund Methodology for compilation of Balance of payments (BOP) and International investment position statistics, sixth edition (BPM6). Compilation of the International investment position for the fourth quarter includes the regular revision of previously published data for current year in accordance with most recent available source data. Shortened versions of the applied methodological approach for the compilation of BH IIP statistics are available on the CBBH website.

**Notes:**

Criteria for presenting country is the share of export of the country in total three-year BH export (2016, 2017, 2018).

Thus, all countries with share higher than 3,0% are separately presented, while the other countries are presented as sum in the column Other countries.
