# Monthly Economic Survey

JANUARY - FEBRUARY 2024

Monthly Economic Survey January-February 2024

## Summary:

| INTRODUCTION  | 4  |
|---|----|
| G01: Contributions of Components to the Annual Change of Consumer Prices in the Euro Area at February End | 5  |
| G02: Annual Change of Consumer Price Index in BH for the First Two Months                                 | 5  |
| G03: Electric Energy Prices, German KWK Index   | 5  |
| G04: Key Interest Rates of Leading Central Banks, the Selected Countries                                  | 6  |
| G05: Annual Changes of Average Wages, February End  | 6  |
| G06: The Total Newly Approved Loans   | 6  |
| G07: Annual Contributions to the Change of the Total Deposits   | 7  |
| G08: Average Funds in Reserve Accounts with the CBBH and Implicit Rate                                    | 7  |
| G09: Foreign Exchange Reserves and Currency Board Coverage  | 7  |
| G10: Monthly Changes of Reserve Money and Monetary Multiplication   | 8  |
| G11: Liabilities and Deposits of the General Government with Commercial Banks, Monthly Changes            | 8  |
| G12: Issues of Republika Srpska Five Year Bonds   | 8  |
| G13: Monthly Changes of Indirect Taxes  | 9  |
| G14: General Government Sector Foreign Debt Repayment   | 9  |
| G15: Exports by the Main Product Groups, Annual Changes   | 9  |
| G16: Annual Changes of Export Value by the Main Trade Partners  | 10 |
| G17: Annual Change of Industrial Production by Areas  | 10 |
| G18: Imports by the Main Product Groups, Annual Changes   | 10 |

#### Editors:

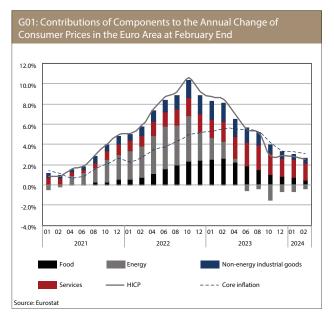

- Elma Hasanović, M. Sc.
- Emina Milišić, M. Sc.

#### INTRODUCTION

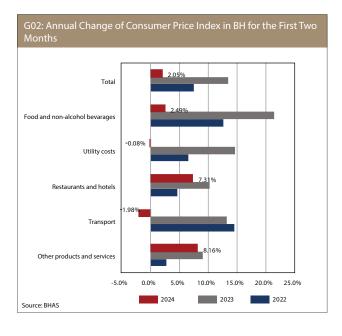

In the beginning of 2024, the slowdown trend of the growth of average consumer prices continued both in the euro area and in BH. Regardless of the slowdown trend of the growth of average consumer prices in BH, core inflation stayed well above the headline inflation rate, indicating the increasing growth of the domestic prices (Graphs 01 and 02). Electric energy prices in the European market stayed on a downward trend, mainly as a consequence of diversification of electric energy production sources (Graph 03). Leading central banks did not change their benchmark interest rates (Graph 04). Stabilisation of inflation pressures in BH, with nominal wage growth, resulted in a significant growth of real wages in February (Graph 05).

The total loans and deposits in BH continued to increase in the beginning of 2024 (Graphs 06 and 07). Given the deposit growth, the base for required reserves calculation increased, while excess holdings above required reserve decreased. Due to a significant decline of excess reserves, in the observed period, balances in banks' reserve accounts decreased, which affected a decrease of the implicit required reserve rate (Graph 08). A growth of the foreign exchange reserves was seen in February, and, due to the monetary liabilities trend in relation to the foreign exchange reserve trend, the coverage ratio increased (Graph 09). The growth of reserve money and the monthly growth of monetary aggregate M2 resulted in increase of monetary multipliers in the first two months of the current year (Graph 10). In February, a slow monthly increase of liabilities and decrease of general government deposits with commercial banks were recorded (Graph 11). Since the beginning of the year, the Federation of Bosnia and Herzegovina did not issue public debt, while in the same period, Republika Srpska recorded four public debt issues (Graph 12). Positive trends of net collection of indirect tax revenues in nominal amounts were recorded during the first two months of 2024, which ensured the sustainability of foreign debt repayment (Graphs 13 and 14).

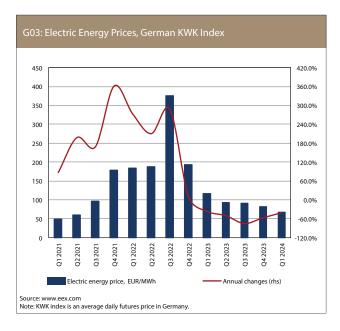

The annual decline of the value of commodity exports from BH in the first two months of 2024 resulted directly from decreased demand for BH goods in the main trading partner countries, the mentioned decline of demand being particularly strong in case of trade in electric energy and coal, and base metals (Graphs 15 and 16). On the other hand, industrial output in February recorded annual growth (Graph 17). Following the nine successive months when an annual decline of the value of commodity imports in BH was recorded, positive growth rates were recorded in the first two months of 2024 (Graph 18).

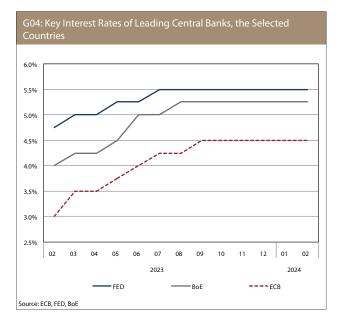

The annual inflation rate in the euro area in February 2024 was 2.6% which is lower by 5.9 pp compared to the price growth rate from the same month of the previous year. The slowdown of the price growth in the category of food and non-alcohol beverages continued, so the annual price growth rate in this category in February amounted to 3.3%. In February, the largest contribution to the overall price growth in the euro area was that of the category of services (1.7%), while the contribution of the category of food was lower by 2.2 pp compared to the same month of the previous year. Core inflation in February 2024 reached the lowest value since the beginning of 2022 (3.1%). The growth rate of prices of services recorded the same value for the fourth successive month, exceeding the growth of core and headline inflation in February by 1.4 pp and 0.9 pp, respectively.

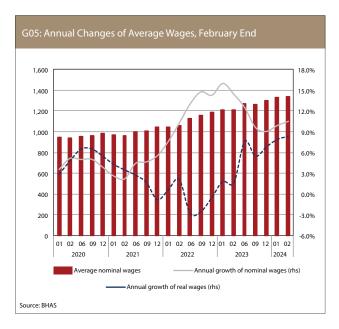

In the beginning of 2024, a moderate growth of average consumer prices was continued, having been recorded since October 2023. In February, core inflation amounted to 4.8%, which is still well above the headline inflation rate (by 2.7 pp), indicating the increasing growth of the domestic prices. The highest annual growth rates of prices in February were recorded for the categories of alcohol beverages and tobacco (4.6%), hotels and restaurant services (8.0%), and other products and services (8.1%), while the category of food and non-alcohol beverages recorded the lowest growth rate (2.1%) since mid 2021. The contribution of the category of food and non-alcohol beverages was only 0.8 pp, which is lower by 6.8 pp compared to the same month of the previous year. Besides, the largest contribution to the growth of average consumer prices came from the categories of restaurant and hotel services, and other products and services.

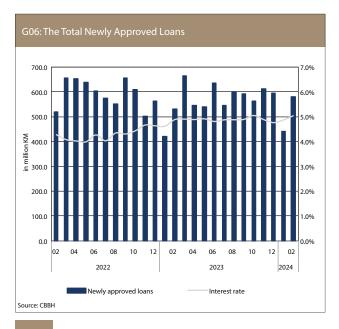

Following the historic peak in the third quarter of 2022, brought about by the shock in supply due to the war in Ukraine,a downward trend of electric energy prices in the European market started, which was continued in the first quarter of 2024. The prices in the German electric energy market in the first three months of this year were lower by 41.6% compared to the same period of the previous year, mainly resulting from diversification of the sources for electric energy production. The increase of solar energy production in combination with the increase of electric energy production by using wind energy contributed to decline of the prices in most markets. In addition, a modest level of economic activity impacted a decrease of electric energy consumption in developed economies.

With the decline of annual inflation rates closer to target rates, in January and February 2024, the FED, the ECB and the Bank of England did not change their reference rates. The terms of financing in the euro area remained restrictive, with earlier interest rate increases strongly transmitted to demand, which contributes to further inflation decrease. With regard to the continuing price pressures in the euro area, due to strong increase of wages and decrease of work productivity among other reasons, and a cautious position with respect to further core inflation trend, a decrease of key interest rates may be expected, but only in the second half of 2024. With respect to open market operations, the ECB announced a continuation of policy of reinvesting the principals of due bonds purchased within the PEPP (Pandemic Emergency Purchase Programme) in the first half of 2024, and complete ending of the reinvestment in the end of the year. The policy of ending the reinvestment of principals within the Asset Purchase Programme (APP) continued.

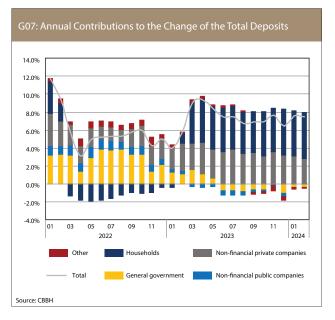

The upward trend of nominal wages was continued in the beginning of this year. The annual growth of nominal wages in February 2024 was 10.5%, while the activities of agriculture, forestry, fishing, and art, entertainment and recreation recorded the highest annual growth rates of wages. The stabilisation of inflation pressures, with the growth of nominal wages, resulted in a significant growth of real wages, which recorded the annual growth rate of 8.2% in February. The growth of wages was mainly due to the union agreements signed earlier, the emigration of working population, and further growth of minimum wages which only in the beginning of the year increased in FBH by 3.9% and in RS by 28.6%.

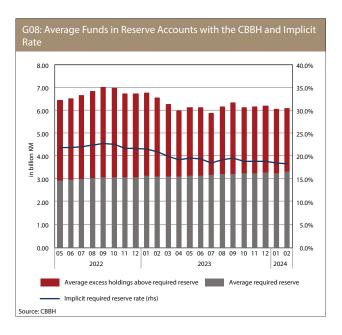

The total loans increased at the annual level by 7.5%, and, after the seasonal decline of newly approved loans in January, the monthly growth in February amounted to 0.8%. The average weighted interest rate on the total loans in February was slightly higher than in the end of 2023. Compared to July 2022, when the ECB restrictive monetary policy cycle started, the lending interest rate in February was higher by 100bp.

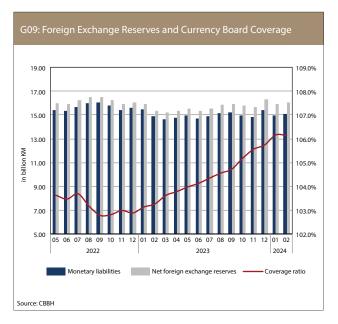

Compared to December last year, the interest rate on other household loans slightly increased, as well as the interest rate on the total loans to non-financial companies. In the mentioned period, the interest rate on loans to non-financial companies with the initial interest rate fixation period above five years increased most (by around 50 bp). These loans account for about 20% of newly approved loans to non-financial companies.

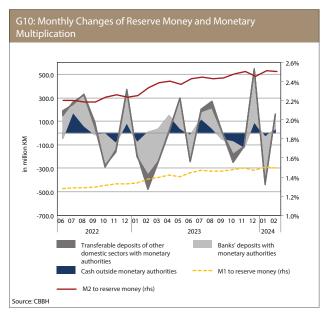

The intensity and structure of deposit growth in February did not change compared to the second half of 2023. The contribution of household sector to the total annual deposit growth was still increasing, while the contribution of the sector of non-financial private companies decreased. The annual growth rate of the total deposits in February (7.5%) was higher by around 8 pp than in the euro area. During the last year, interest rates on deposits with contracted maturities increased by 85 bp (households), i.e. 58 bp (non-financial companies). In several recent months, the share of transaction deposits in the total deposits did not change significantly, while a possible continuation of growth of deposit interest rates or their staying at the same level could be motivating for term-deposits of households on longer maturity periods.

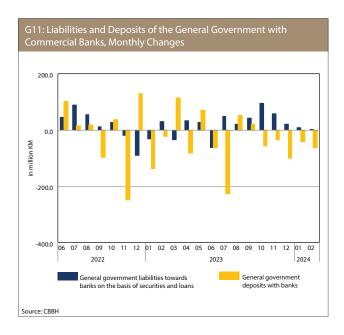

Required reserve calculation base in the end of February amounted to KM 33.25 billion and was higher than the average balance compared to the end of 2023 by KM 375.39 million. Though excess reserves increased in December 2023, its monthly decrease was again seen in the ends of January and February, amounting to KM 123.6 million and KM 42.03 million, respectively. Due to a significant decline of excess reserves, in the observed period, balances in banks' reserve accounts decreased, amounting to KM 6.06 billion in the end of February 2024. This affected a decrease of the implicit required reserve rate. Since 01 January 2024, the Decision of the CBBH Governing Board has been applied, regulating the allocation of 5% of required reserve in foreign currencies, while the rate of remuneration in reserve accounts in the first two months of 2024 did not change. The required reserve rate in the observed period amounted to 10%.

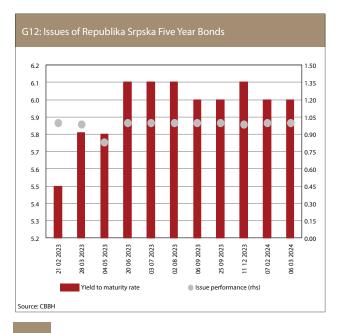

The foreign exchange reserves at the end of February 2024 amounted to KM 16.02 billion, being higher by KM 622 million at the annual level. At the monthly level, following a significant decrease of the foreign exchange reserves in January, they increased again in February. Monthly changes in the foreign exchange reserve trend in the first two months of 2024 resulted mainly from the recorded KM purchase and sale balance with internal depositors and banks. Foreign debt repayment in January and February accounted for KM 243.8 million, while the other changes affecting the foreign exchange reserve trend recorded positive developments in the first two months of 2024. Due to the trend of monetary liabilities in relation to the recorded trend of the foreign exchange reserves, the coverage ratio increased to amount to 106.16% in the end of February.

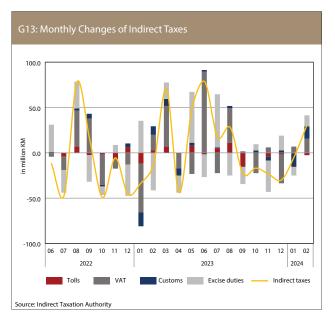

The considerable monthly decrease of reserve money in January was impacted by all the reserve money components, while the largest contribution came from a decrease of bank deposits with monetary authorities in the amount of KM 403 million. Following a significant decrease of reserve money in January, as deposits with monetary authorities increased again in February, reserve money growth was seen. Compared to the same period of the previous year, reserve money increased by KM 147.5 million. Due to the growth of transferable deposits in the local currency, and also a significant growth of other deposits in foreign currency, a monthly growth of monetary aggregate M2 was recorded. Significant increases of all categories of broad money impacted annual growth of monetary aggregate M2 at the rate of 8.4%. The recorded trend of reserve money and monetary aggregates trends resulted in an increase of monetary multipliers in the first two months of 2024.

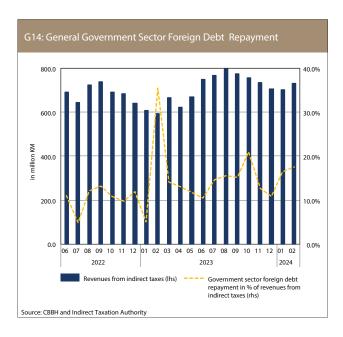

In February, there was a slight monthly growth of general government liabilities towards commercial banks in the amount of KM 0.43 million. On the other hand, there was a continuous decrease of general government deposits with commercial banks. At the end of February, the total liabilities of the general government sector towards commercial banks amounted to KM 3.42 billion, which is an annual growth of KM 261.0 million or 8.2%. Banking sector exposure to the general government sector in the end of February was 8.5% of the total banking sector assets.

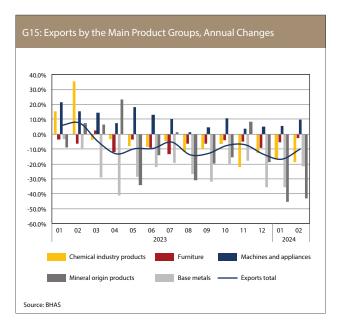

The Federation of BH did not issue public debt on SASE in the first two months. In the same period, Republika Srpska issued public debt four times, out of which, there were three issues of six month treasury bills and one issue of five year bonds. All the issues were successful, with demand exceeding the offer. The recorded yield to maturity rates in the market of short-term debt (4%) and long-term debt (6%) were at the level of those from December 2023. In the first two months, Republika Srpska collected the total of KM 90.4 million by these issues, out of which, KM 40 million was related to long-term debt. The total planned long-term debt in the local market is KM 142 million, while another issue of bonds in the nominal value of KM 40 million is planned for March 2024.

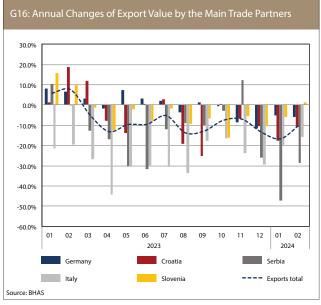

The first two months of 2024 were marked by positive trends in the collection of net indirect taxes, which had begun in the second half of the previous year. In February, a monthly growth of net collection of indirect tax revenues was recorded (4.4%), mainly due to a lower base in the beginning of the previous year, and also stabilisation of high payments of VAT refunds. The monthly growth of net revenues came from the net collection of VAT revenues (KM 15.5 million), resulting from lower refund rates, which were lower in February by 6.9% at the monthly level, and even 29.2% lower than in December 2023. Revenues from excise duties recorded a monthly growth (10.2%) after oscillations in collection due to the changed regime of payment of excise duties on tobacco products in the previous year. For the first two months, cumulative net revenues from indirect taxes amounted to KM 1.43 billion, representing a growth of KM 230.9 million (19.2%) at the annual level.

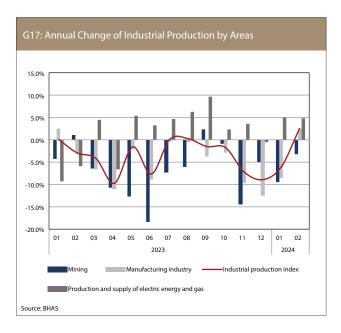

Positive trends of net collection of indirect tax revenues in nominal amounts, both at the monthly and annual level were continued in February. Stable collection of indirect tax revenues ensures the sustainability of foreign debt repayment. During the first two months of this year, KM 243.8 million was allocated for general government sector foreign debt servicing, which is 17.0% of the total amount of revenues from indirect taxes collected during the first two months of this year. In February, KM 128.2 million was repaid, which is 17.5% in per cents of indirect tax revenues for the mentioned month.

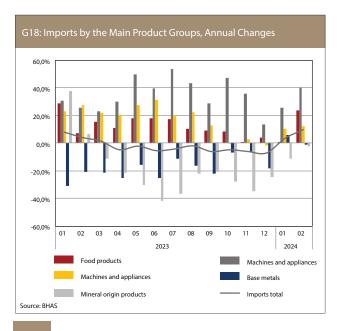

The downward trend of the value of commodity exports from BH was continued in the first two months of 2024. The value of commodity exports in January and February of this year amounted to KM 2.51 billion, which is a decrease of 13.1% compared to the same period of the previous year. The annual decline of the value of commodity exports resulted from a decline of the value of exports of majority of the most significant export product groups. The low level of economic activity in the most significant trading partner countries impacted the decreases of export value of mineral origin products by 44.2% (mainly electric energy and coal), base metals by 28.7%, chemical industry products by 17.7% and furniture by 4.3%. On the other hand, the exports of machines and appliances recorded an annual growth of value by 7.6% in the first two months of this year.

The annual decline of the value of commodity exports from BH in the first two months of 2024 resulted directly from a decline of demand for BH goods in the main trading partners countries. Decline of demand was particularly strong in case of trade in electric energy and coal, as well as base metals. Thus, the largest annual decline of export value in the first two months of the current year was recorded in exports to Serbia by 38.2%, Italy by 18.1%, Croatia by 14.1% and Germany by 5.4%. Also, a decline of demand was recorded in exports of goods to Slovenia by 2.2% and Austria by 12.8%. Exports to the EU countries, the most significant export market in BH, in the observed period, recorded an annual decline of 1.02%, while exports to the CEFTA countries were lower by 33.6%.

Industrial output in February 2024 recorded annual growth of 2.5%, as a result of growth of production output in manufacturing industry and production and supply of electric energy. On the other hand, mining recorded annual decline of 3.3% in February. Observing the period of the first two months of the current year, compared to the same period of the previous year, mining and manufacturing industry declined by 6.2% and 2.9%, respectively, while production and supply of electric energy increased by 4.9%. Within manufacturing industry, majority of the most significant areas recorded annual decline of production output, for the first two months of this year, compared to the same period of the previous year.

Following the nine successive months when an annual decline of the value of commodity imports in BH was recorded, positive growth rates were recorded in the first two months of 2024. The value of imported goods in BH in the first two months of the current year amounted to KM 4.27 billion, representing an annual growth of the value by 6.7%. The annual growth of commodity imports value results from the growth of the value of the most significant import product groups, so machines and appliances increased by 11% and base metals by 2.1%. Means of transport, the product group recording very high annual growth rates of import value in the post-pandemic period, recorded annual growth of 34.1% in the first two months of 2024. On the other hand, imports of mineral origin products, firstly oil and oil derivatives, recorded annual decline of 6.9%, which may be partly related with a decline of oil price in the global market.

### STATISTICAL APPENDIX

| 101: Main Economic Indicators   | 13 |
|---|----|
| T02: Buying and Selling of KM   | 14 |
| T03: Foreign Reserves of CBBH   | 15 |
| T04: Monetary Aggregates  | 16 |

| T17: Consumer Price Index for BH  | 31 |
| T18: BH Balance of Payments   | 32 |
| T19: International Investment Position (IIP)                              | 33 |
| T20: BH Foreign Trade Balance   | 34 |
| T21: Exports goods by Country of Destination                              | 35 |
| T22: Imports goods by Country of Origin                                   | 36 |
| T23: Average Middle Exchange Rates of KM                                  | 37 |

**Note:** Brief notes on methodology can be found below each table, while more detailed ones are available at www.cbbh.ba

#### Notes applicable for tables 4, 5, 7, 8, 9, 10, 11, 12 i 13.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

The revised data for the period January 2006 – November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.

The data on the "complete" balance sheet, with the included passive sub-balance, are still available at: http://statistics.cbbh. ba:4444/Panorama/novaview/SimpleLogin\_bs.aspx

In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM.

Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards applied in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred at the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, at the liabilities side: decrease of liabilities to non-residents in the amount of KM624 million, an increase in loan loss provisions by KM 472 million and other liabilities increased by KM 7 million.

In February 2011, one bank from BH Federation reclassified deposits in the amount of around KM 80 million, from the deposits of public companies to the Entities' governments deposits, in line with the IMF recommendations.

By order of the FBH Banking Agency, in June 2010, one bank made a reclassification of about KM 300 million of claims based on securities on domestic institutional sectors to the claims on non-residents. In December 2010, the same bank made this reclassification, retroactively, in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease in other items net.

One bank from FBH made a reclassification of financial instruments in the foreign assets amounting to about KM 40 million for the period January - August 2010. Claims on non-residents based on loans were reclassified in claims on non-residents on the basis of securities, which resulted in changes in the short- term and long-term foreign assets.

By order of the Banking Agency of Republika Srpska one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, .i.e.. the decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively, in the appropriate amounts, by months, ranging from 50 - 150 million KM.

In accordance with new regulations of the RS Banking Agency, published in the Official Gazette of RS, no.136/10, which has regulated a new manner of recording receivables classified in category "E", accounting and bookkeeping of interest on non-performing assets and calculation of general and special provisions, RS banks, in the data for December 2010, implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of about KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to about KM 180 million within the capital account.

#### Notes:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.

Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non- central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).

Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M1 and QM.

The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH -monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. According to new methodology, Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government). Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

 $Monetary\ data\ updated\ according\ to\ the\ IMF\ methodology\ (Monetary\ and\ Financial\ Statistics\ Manual,\ 2000),\ from\ January\ 2006.$ 

The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in the CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of the CBBH for the extended long-term loans and claims on commercial banks on the basis of settlement accounts.

Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the Central Bank (monetary authorities) and cash outside commercial banks.

The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Accounts 1 and 2).

Deposits of central government with the CBBH are transferable and other deposits of BH Institutions, Entity Governments, Entity Social Security Funds and those of Brčko District in the local currency. Shares and other equity comprise the equity, current

#### Note:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH and it represents consolidation of mutual claims and liabilities among the commercial banks. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.

Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments, Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors).

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non-financial enterprises, private non-financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors). Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added.

Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment /revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

By order of FBA in March 2010, loans to households with currency clause with one bank were reclassified, from loans in EUR to loans in KM.

#### Notes:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Deposits of domestic institutional sectors represent liabilities of commercial banks towards all institutional sectors. Deposits on the BH level represent deposits with commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH Banja Luka.

#### Notes:

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

 $No\ data\ for\ interest\ rates\ on\ loans\ in\ foreign\ currency\ on\ the\ basis\ of\ credit\ cards\ and\ overdrafts\ to\ non-financial\ corporations.$ 

 $<sup>^*</sup>$  Interest rates in table for revolving loans and credit cards and their amounts refer to the outstending amounts.

IRF - initial rate fixation

<sup>...</sup> insufficient data to be published

|                 | 02              | 33,258,883                               | 3,325,888                      | 6,067,446                               | 2,741,558     |

From July 1st, 2016, the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10%. From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts: in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to 50% of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank. Since May 1st, 2015, the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:

-on the reserve requirement amount – the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero, -on the amount of the funds exceeding the reserve requirement – zero rate of compensation.

The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value. From September 1st, 2014, the remuneration rate has been calculated on the basis of the weighted average interest rate which was earned by the Central Bank of BH on the market in the same period on deposits invested up to a month; and 70% is calculated on the amount of required reserve or minimum 0, while 90% of the mentioned rate is calculated on the amount of excess reserves or minimum 0.

From February 1st, 2011 the required reserves rate on deposits and borrowed assets with contracted term of maturity up to one year was declined from 14% to 10%, while the required reserves rate on deposits and borrowed assets with contracted term of maturity over one year is not changed. From August 1st 2011, the remuneration rate is calculated by the weighted average interest rate which were earned by the Central Bank on deposits invested up to a month in the same period; 70% of this rate is calculated on the amount of required reserves while 90% of the same rate is calculated on the amount of excess reserves.

From July 1st, 2010 remuneration rate on the amount of required reserves is changed and calculated as an average of interest rates, which were earned by the Central bank on overnight deposits in the same period, while remuneration rate on the amount of excess reserves is not changed. From January 1st, 2009 the required reserves rate is 14% on deposits and borrowed assets with contracted term of maturity up to one year and 10% on deposits and borrowed assets with contracted term of maturity over one year.

From April 1st, 2009 remuneration rate is calculated as:- On the amount of required reserves is 0,5%,- On the amount of excess reserves on the rate calculated as an average of interest rates, which were earned by the Central bank on deposits invested up to u month. From May 1st, 2009 the required reserves rate is 7% on deposits and borrowed assets with contracted term of maturity over one year.

From January 1st, 2008 required reserves rate was increased from 15% to 18%.

From October 11th, 2008 required reserves rate was declined from 18% to 14%.

\*The base for calculation of required reserves includes deposits and borrowed funds in domestic (in KM and KM with the currency clause) and other currency expressed in KM.

International investment position (IIP) for BH is compiled in accordance with the latest International Monetary Fund Methodology for compilation of Balance of payments (BOP) and International investment position statistics, sixth edition (BPM6). Compilation of the International investment position for the fourth quarter includes the regular revision of previously published data for current year in accordance with most recent available source data. Shortened versions of the applied methodological approach for the compilation of BH IIP statistics are available on the CBBH website.

Criteria for presenting country is the share of export of the country in total three-year BH export (2016, 2017, 2018).

 $Thus, all \ countries \ with share \ higher \ than \ 3,0\% \ are \ separately \ presented, \ while \ the \ other \ countries \ are \ presented \ as \ sum \ in \ the \ column \ Other \ countries.$
