INTRODUCTORY SUMMARY

The economic prospects of the euro area remained quite favourable (Graph 01). The inflation in BH was under the effect of the growth of the excise duties on oil and oil derivatives (Graph 02), the industrial growth was moderate (Graph 03), and the number of the unemployed decreased (Graph 04). Resulting from changed prices in the international market, the value of the exports of base metals, mineral origin products, and machines, appliances and electric devices significantly increased (Graph 05), and the changes of similar intensity and direction (except for the mineral origin products) took place in imports as well (Graph 06).

Compared to the previous year, in the first two months of 2018, the deficit decreased in trade with four trade partners, while it additionally deepened in the trade with China (Graph 07). The KM purchase and sale balance in the first two months was positive, the foreign exchange reserves increased (Graph 08), as well as money supply (Graph 09). The highest contribution to the deposit growth came from household deposits (Graph 10), and excess funds above the required reserve significantly increased (Graph 11). Both foreign exchange assets and foreign exchange liabilities of banks decreased but the net effect of these changes was positive, and the decline of foreign liabilities was under the effect of a decrease of residents' deposits (Graph 12).

In its largest segment (RTGS) interbank internal payment transactions continuously increased at the annual level (Graph 13). Regarding the bank lending, there was a constant annual growth trend of the loans to non-financial companies (Graph 14). The bank exposure to the general government in the credit market declined significantly while increasing in the financial market (Graph 15). The demand for the public debt issues of the entities remained high, and the bonds were sold above the nominal value (Graph 16). In the first two months, the revenues from excise duties increased compared to the same period of the previous year (Graph 17), as well as the total indirect taxes (Graph 18).

G01: Purchasing Manager's Index (PMI) in the Euro Area

Source: www.investing.com.

Note: *Purchasing Managers' Index

Although a decrease of the PMI value took place in February, the economic prospects of the euro area remained quite favourable. The value of the PMI above 50 indicates positive expectations, whereas the value of the PMI below 50 indicates negative expectations. In December 2017, the record value of the PMI for manufacturing was reached, the highest one since June 1997. The composite PMI and PMI for services were modified only in February, and in January 2018, the highest values were recorded since February 2011.

G02: The Contribution to the Annual Rates of Change of Consumer Prices

Source: BHAS

The several year long downward trend of consumer prices, at the annual level, was ended in the beginning of the previous year, which was followed by a stronger growth of consumer prices. In both observed months, a positive contribution to the change of the annual rate of consumer prices was recorded in the prices of food and non-alcohol beverages (0.3 pp and 0.2 pp), and in the prices of transport (0.1 pp and 0.7 pp). The prices of transport in February at the monthly level increased by 5.1% as a result of the increase of the excise duties on oil and oil derivatives. The contribution of the prices of other groups of products and services, overall, in January was -0.1 pp, while it was 0.0 pp in February. Although most of the prices of other products and services increased, there was no positive contribution to the change of the consumer price rate mainly because of a significant decrease of the average prices in the clothes and footwear section.

G03: Contribution to the Monthly Rates of the Industrial Production Trend

Source: BHAS

In January 2018, a usual decline of industrial production was recorded at the monthly level due to seasonal impact. In February of the current year, industrial production increased at the monthly and annual levels. Observing the period January - February 2018, compared to the same period of the previous year, a growth of the industrial output by 5.9% was recorded.

Observing the structure of the annual growth rate, a strong growth of production was recorded in February in the distribution of electric energy and gas (17.2%), and a slow growth of mining (0.5%). On the other hand, the production of food products stagnated at the annual level (-0.1%).

G04: Changes in the Number of the Unemployed

Source: BH Agency for Work and Employment

After a slow growth of the number of the unemployed in January, at the monthly level, the downward trend of the number of the unemployed persons was continued in February, resulting from negative demographic changes and increased employment, due to the increase of economic activity and enhanced control of the working status of employees. The number of the unemployed in February decreased compared to the previous month by 2,584 persons. Observed at the annual level, the number of the unemployed was lower by 36,950 persons or 7.2%.

G05: Exports by the Main Product Groups, Annual Growth Rates

Source: CBBH

In January, exports increased by one fourth, while in February, the annual growth of imports was moderate amounting to 10.9%. The beginning of the year was marked by the growth of exports of mineral origin products and base metals and machines, appliances and electric devices. So, in 2018, the growth trend of exports of mineral origin products and base metals was continued, firstly because of the growth of the prices in the global market. In February, the exports of mineral origin products increased by 15.4%, those of base metals by 26.4% and those of machines, appliances and electric devices by 22.0%. The exports of furniture and wood and wood products in February remained at the same level as in the previous year.

G06: Imports by the Main Product Groups, Annual Growth Rates

Source: CBBH

In February, the imports at the annual level slightly increased (1.3%), while the import growth rate in January amounted to 24.2%. The same as with exports, the most significant changes in the import product groups resulted from changed prices of some products in the global market. So, the imports of mineral origin products decreased by one fifth in February, while the imports of base metals increased by one fourth. The imports of machines and appliances and electric devices also increased by one fifth.

G07: Decrease/Deepening of Trade Deficit in Relation to the Main Trade Partners

Source: CBBH

The most significant decrease of the trade deficit in the first two months (compared to the same period of the previous year), in relation to trade partners, was recorded in the exchange with Serbia and Croatia. In the first two months, the exports to Serbia increased at the annual level by one third, while the imports increased by 7.4%. The exports to Croatia increased by 14.7%, while the imports increased by only 2.2%. In the exchange with Austria and Slovenia, a positive balance was recorded in trade, which increased at the annual level. The most significant deepening of trade deficit was recorded in trade with China and Italy. The imports from Italy increased by 14.1%, while the imports with China increased by 14.0%, at the annual level.

G08: The CBBH Foreign Exchange Reserves and KM Purchase and Sale Balance

Source: Tables 02 and 03

Although a negative balance of purchase and sale of KM was recorded in February, the total recorded balance in the first two months of the current year was positive. So, the CBBH foreign exchange reserves in the end of February amounted to KM 10.6 billion with the increase of KM 72.9 million (0.7%) compared to the end of the previous year. This was the continuation of the growth trend from the previous year.

G09: The Monthly Changes of the Money Supply Components

Source: Table 04

The growth trend of money supply was continued in the current year. While the stagnation was recorded in February, significant changes were recorded in January in the money supply components trends. So, a decrease of cash outside banks in the amount of KM 115.2 million was substituted by the increase of transferable deposits (KM 192.8 million). Such changes are usual after the holiday season.

G10: Deposits, Monthly Changes

Source: Tables 10 and 11

The beginning of the year was marked by the increase of the total deposits in banking sector, which reached the amount of KM 20 billion in February. The household deposits continued their growth trend, while oscillations of the deposit trend were evident in the sector of non-financial companies.

G11: Deviations from the Average Balance in the Reserve Account

Source: Table 17

A considerable growth of excess funds in reserve accounts was recorded in the beginning of the year which resulted in a significant deviation compared to the average values from the previous year. The deviation, compared to the average positions from the previous year, was also recorded in the values of required reserves. The total balance of reserve account in the first two months exceeded KM 5.00 billion. In the end of February, excess funds amounted to KM 2.78 billion, while the amount of the average required reserve was KM 2.24 billion.

G12: Foreign Assets and Foreign Liabilities of Commercial Banks

Source: Table 07

The beginning of the year was marked by a decrease of foreign assets and foreign liabilities of commercial banks. The decrease of foreign assets (KM 260.7 million) was mainly caused by a decrease of deposits with correspondent banks and foreign currency in the vault, while a decrease of foreign liabilities (KM 349.2 million) was mainly caused by a decrease of deposits of non-residents, and the continued trend of bank deleverage.

G13: Transactions in RTGS

Source: CBBH

The turnover in RTGS, in February 2018, decreased at the monthly level and increased at the annual level. At the annual level, the turnover growth rate in RTGS was positive for nineteen successive months, and in February 2018, the turnover increased by 12.66%. At the monthly level, the turnover in RTGS declined for the second successive month, and the decline in February was 4.34%.

G14: Loans, Monthly Changes

Source: Tables 12 and 13

In the end of February, the total loans amounted to KM 18.5 billion, which was a growth of 6.8% at the annual level. The annual growth rate of loans to non-financial companies had a growing trend since January 2016 and reached the level of around 8% in February 2018, which indicates a recovery of the lending to this sector.

G15: The General Government Debt with Commercial Banks, Annual Changes

Source: CBBH

In February, a slower growth of the liabilities at the annual level was recorded on the basis of both issued securities of the general government and on the basis of loans. In the end of February, the total debt of the general government sector on the two mentioned bases amounted to KM 2.22 billion, which was the annual decline of the liabilities in the amount of KM 32.7 million or 1.4%. The exposure of the banking sector to the general government sector in the end of February was 7.9% of the total banking sector assets.

G16: The Issues of Five Year Bonds of Republika Srpska

In the first two months of 2018, there were no public debt issues of the FBH, while there was one issue of six month treasury bills and one issue of bonds in RS. The twelfth issue of five year bonds was the highest so far by the nominal value and amounted to KM 100 million. Until this issue, the average bid to cover ratio was 1.72, and the investors in this issue showed the under-average demand level. The bid to cover ratio was 1.47. The same as in the several previous issues, in this issue, the coupon interest rate was higher than the yield to maturity rate so the issue was sold with the issue premium of KM 350 000.

G17: Excise Duties, Annual Growth Rates

In the first two months of the current year, a strong growth was recorded in the collection of the revenues from excise duties. In the mentioned period, KM 231.0 million was collected on the basis of excise duties, which was a growth of KM 30.1 million (15.0%) compared to the same period of the previous year. The growth of the revenues on this basis came partly from the amendments of the Law on Excise Duties in the part related to tolls.

G18: Monthly Changes of Indirect Taxes

In February 2018, there was a monthly growth of revenues resulting mainly from the growth of VAT, while excise duties recorded a decline. In the first two months of the current year, KM 914.9 million of the revenues was collected from indirect taxes, which was higher by KM 118.4 million (14.9%) compared to the same period of the previous year. The tolls recorded a more significant growth as a result of the amendments of the Law on Excise Duties.

STATISTICAL APPENDIX

- T01: Main Economic Indicators
- T02: Buying and Selling of KM
- T03: Foreign Reserves of CBBH
- T04: Monetary Aggregates
- T05: Monetary Survey
- T06: Balance Sheet of CBBH
- T07: Consolidated Balance Sheet of Commercial Banks in BH
- T08: Total Deposits and Loans of Commercial Banks
- T09: Structure of Deposits and Loans of Commercial Banks by Currency
- T10: Structure of Transferable Deposits with Commercial Banks by Sector
- T11: Structure of Other Deposits with Commercial Banks by Sector
- T12: Structure of Short-terms Loans of Commercial Banks by Sector
- T13: Structure of Long -Terms Loans of Commercial Banks by Sector
- T14: Interest Rates on Loans to Households
- T15: Interest Rates on Loans to Non-financial Companies
- T16: Interest Rates on Deposits of Households and Non-financial Companies
- T17: Average Reserve Requirements
- T18: Required Reserves by Maintenance Periods
- T19: Industrial Production Index
- T20: Consumer Price Index for BH
- T21: BH Balance of Payments: Summary Table
- T22: BH Balance of Payments: Current and Capital Accounts
- T23: BH Balance of Payments: Financial Account
- T24: BH Foreign Trade Balance
- T25: Exports by Country of Destination
- T26: Imports by Country of Origin
- T27: Average Middle Exchange Rates of Convertible Mark
- T28: Foreign Debt Servicing

Note: Brief notes on methodology can be found below each table, while more detailed ones are available at www.cbbh.ba

Notes applicable for tables 4, 5, 7, 8, 9, 10, 11, 12, 13.

-The revised data for the period January 2006 – November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.

The data on the „complete“ balance sheet, with the included passive sub-balance, are still available at: http://statistics.cbbh.ba:4444/Panorama/novaview/SimpleLogin_bs.aspx

- In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM.

-Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards applied in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred at the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, at the liabilities side: decrease of liabilities to non-residents in the amount of KM624 million, an increase in loan loss provisions by KM 472 million and other liabilities increased by KM 7 million.

- In February 2011, one bank from BH Federation reclassified deposits in the amount of around KM 80 million, from the deposits of public companies to the Entities' governments deposits, in line with the IMF recommendations.

- By order of the FBH Banking Agency, in June 2010, one bank made a reclassification of about KM 300 million of claims based on securities on domestic institutional sectors to the claims on non-residents. In December 2010, the same bank made this reclassification, retroactively, in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease in other items net.

- One bank from FBH made a reclassification of financial instruments in the foreign assets amounting to about KM 40 million for the period January - August 2010. Claims on non-residents based on loans were reclassified in claims on non-residents on the basis of securities, which resulted in changes in the short- term and long- term foreign assets.

- By order of the Banking Agency of Republika Srpska one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, i.e.. the decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively, in the appropriate amounts, by months, ranging from 50 - 150 million KM.

- In accordance with new regulations of the RS Banking Agency, published in the Official Gazette of RS, no.136/10, which has regulated a new manner of recording receivables classified in category "E", accounting and bookkeeping of interest on non-performing assets and calculation of general and special provisions, RS banks , in the data for December 2010, implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of about KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to about KM 180 million within the capital account.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

Revised data for period January - December 2017.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.

Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).

Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M1 and QM.

Revised data for period January - December 2017.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data updated according to the MMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006

Notes:

The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH - monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. According to new methodology, Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey.

Revised data for period January - December 2017.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government). Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

Revised data for period January - December 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of CBBH for the long-term loans and claims on commercial banks on the basis of settlement accounts. Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Account 1 and 2). Deposits of central government with CBBH are transferable and other deposits of BH Institutions, Entity governments, Entity social security funds and those of Brčko District in domestic currency. Shares and other equity are comprised of equity, current year result, general and special reserves and revaluation/adjustment. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets.

Revised data for November 2017.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko District (from July 2001 until November 2002), NBRS (until December 1998) and the NBBH (until November 2002). Mutual claims and liabilities among the commercial banks have been consolidated. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.

Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments, Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors). Balance sheets of commercial banks of Federation of BH in addition to active sub-balance sheets include data from passive sub-balance sheets as well. Passive sub-balance sheets include liabilities arising from foreign loans and frozen foreign currency deposits of citizens, which occurred until 31 March 1992. These liabilities will be taken over, in the process of privatisation, by Ministry of Finance of Federation of BH in accordance with the entity Law on Opening Balance Sheets of Enterprises and Banks and Law on Privatisation.

Revised data for November 2017.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non-financial enterprises, private non-financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors). Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added. Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment/revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

By order of FBA in March 2010, loans to households with currency clause with one bank were reclassified, from loans in EUR to loans in KM.

From September 2004, change in structure of loans by currency is result of implementation of recommendations of IMF Mission for monetary and financial statistics in BH from May 2004. According to that, all loans in KM which include currency clause (indexed to euro), should be classified as loans in KM (domestic currency).

Data on structure of deposits and loans by currency in Republika Srpska until September 1999 are not available, so for this period the total amount of deposits and loans in RS is included in the column Total.

Revised data for period January - October 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Deposits of domestic institutional sectors represent liabilities of commercial banks towards all institutional sectors. Deposits on the BH level represent deposits with commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko Branch (from July 2001 until November 2002), deposits with NBRS (until December 1998), deposits with NBBH (until November 2002) and deposits with the Payment Bureaus Sarajevo and Mostar (until November 1999). Sight deposits represent liabilities of commercial banks related to transaction accounts and sight deposits in domestic and foreign currency.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Loans to domestic institutional sectors represent claims of commercial banks on all institutional sectors. Loans at the BH level include loans extended by commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko Branch (from July 2001 until November 2002), loans with NBRS (until December 1998) and NBBH (until November 2002). The total of claims on all levels of government and funds (short-term and long-term) are shown in Table of short-term loans (columns 3,4,5,6,7) in total amount, because source data do not provide a maturity structure of claims for governments and funds. Short – terms loans represent claims of commercial banks on all domestic institutional sectors up to one year, in domestic and foreign currency. Claims on BH Institutions have been reclassified since April 2010.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:

Total claims on all levels of government and funds (short-term and long- term) are shown in Table of short-term loans (columns 3,4,5,6,7) in the total amount, because the source data do not provide the maturity structure of claims for governments and funds. Long – terms loans represent claims of commercial banks on all domestic institutional sectors over one year in domestic and foreign currency.

Notes:

From 1 July 2016, the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10%. From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts : in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to 50% of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank.

Since 01 May 2015, the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:

- on the reserve requirement amount – the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero,
- on the amount of the funds exceeding the reserve requirement – zero rate of compensation.

The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value.

From 1 September 2014, the remuneration rate has been calculated on the basis of the weighted average interest rate which was earned by the Central Bank of BH on the market in the same period on deposits invested up to a month ; and 70% is calculated on the amount of required reserve or minimum 0, while 90% of the mentioned rate is calculated on the amount of excess reserves or minimum 0.

From February 1st, 2011 the required reserves rate on deposits and borrowed assets with contracted term of maturity up to one year was declined from 14% to 10%,while the required reserves rate on deposits and borrowed assets with contracted term of maturity over one year is not changed.

From August 1st 2011. the remuneration rate is calculated by the weighted average interest rate which were earned by the Central Bank on deposits invested up to a month in the same period; 70% of this rate is calculated on the amount of required reserves while 90% of the same rate is calculated on the amount of excess reserves.

From July 1st, 2010 remuneration rate on the amount of required reserves is changed and calculated as an average of interest rates, which were earned by the Central bank on overnight deposits in the same period,while remuneration rate on the amount of excess reserves is not changed.

From January 1st, 2009 the required reserves rate is 14% on deposits and borrowed assets with contracted term of maturity up to one year and 10% on deposits and borrowed assets with contracted term of maturity over one year.From April 1st, 2009 remuneration rate is calculated as:- On the amount of required reserves is 0,5%,- On the amount of excess reserves on the rate calculated as an average of interest rates, which were earned by the Central bank on deposits invested up to u month. From May 1st, 2009 the required reserves rate is 7% on deposits and borrowed assets with contracted term of maturity over one year.

From January 1st, 2008 required reserves rate was increased from 15% to 18%. From October 11th, 2008 required reserves rate was declined from 18% to 14%.

*The base for calculation of required reserves includes deposits and borrowed funds in domestic and other currency expressed in KM.

Notes:

The share of BH exports to the country in total BH exports for 2010 was used as a criterion for presenting the country of exports. Thus, all countries with higher share of exports than 4% of the total BH exports for 2010 are separately presented, while the other countries are presented in the column "Other Countries".

Until February 12, 2007, the data on exports to Serbia and Montenegro were presented as exports to Serbia, but since then Serbia and Montenegro have been presented separately.
