INTRODUCTORY SUMMARY

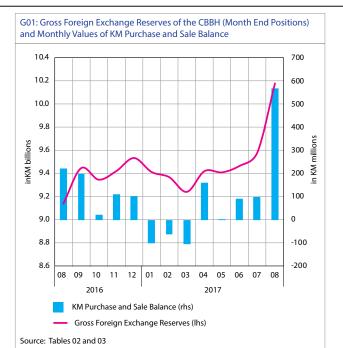

Under the impact of tourist season, a strong growth was recorded in the foreign exchange reserves and banks' deposits with the CBBH which recorded considerable deviations compared to the average values (Graphs 1 and 2). The growth of the foreign exchange reserves was affected by the payment of the Russian clearing debt which resulted also in the growth of the Government deposits, and the increase of the total deposits (Graph 3). At the same time, the total loans recorded a high annual growth rate due to the increase of long-term lending to households and non-financial companies (Graph 4). Quasi money which includes term deposits recorded significant growth rates since October of the previous year, which provides good preconditions for the continuation of lending (Graph 5). Foreign liabilities, after the increase in the previous months, recorded a monthly decline in August (Graph 6). The value of payment transactions through giro clearing and through RTGS recorded an increase at the annual level (Graph 7).

Republika Srpska issued two issues of public debt (Graph 8), so the overall debt of the general government sector towards commercial banks in the form of loans and securities remained high (Graph 9). Tourist season influenced the growth of the revenues from VAT (Graph 10). At the same time, a considerable amount of the revenues was collected on the basis of excise duties (Graph 11).

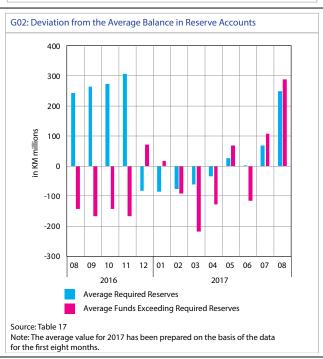

Since the beginning of the year, a stronger growth of consumer prices was present (Graph 12). The average net wages recorded an increase as well, although the trends by activities were not equal (Graph 13). Industrial turnover index points out that the value of turnover follows a similar trend as the industrial production index, although a short time lag between the industrial production and sale is evident (Graph 14).

Foreign trade trends recorded significant growth rates (Graphs 15 and 16). The nominal effective exchange rate (NEER) of KM recorded a slow increasing trend over the previous two months. The real effective exchange rate of KM (REER) measured by consumer prices was much lower compared to the REER measured by producer prices (Graph 17).

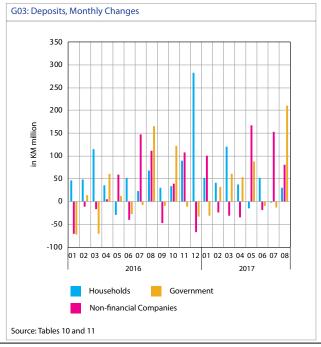

In the euro area, the stagnation of the unemployment rate was recorded with the slow-down of credit growth (Graph 18).

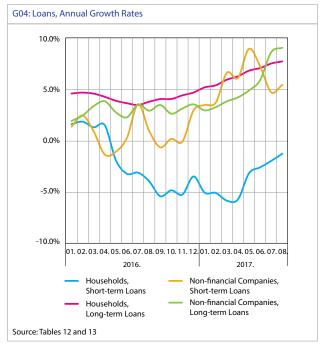

The foreign exchange reserves reached their historical maximum value and exceeded the level of KM 10.0 billion. The increased demand for the local currency due to tourist season and the arrival of BH citizens from foreign countries mainly influenced such growth of the foreign exchange reserves. The total balance of KM purchase and sale amounted to KM 567.3 million. The growth of the foreign exchange reserves and the positive value of the balance was affected by the payment of the Russian clearing debt in the amount of KM 206.0 million.

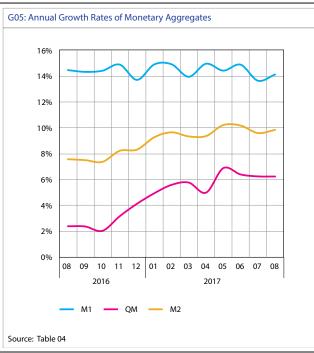

The total average balance of reserve accounts in August reached the record value of KM 4.55 billion and a considerable deviation was recorded from the average balance recorded in the first eight months of the current year. The already mentioned demand for the local currency and a significant growth of the deposits in the local currency resulted in such increase in the reserve account.

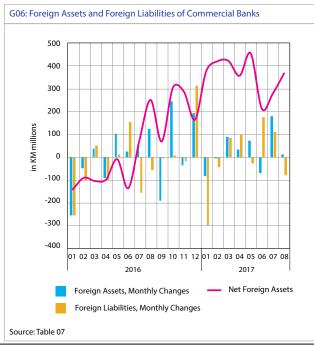

The total deposits in BH banking sector reached the level of KM 19 billion. The increase of the total deposits in August at the monthly level was brought about by the growth of the government deposits, resulting from the payment of the Russian clearing debt to the BH authorities. The household deposits, and also the deposits of non-financial companies recorded also an increase over the observed period, by KM 29.6 million and KM 80.9 million, respectively.

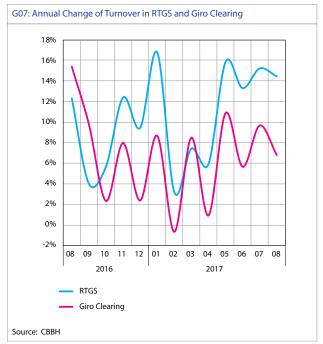

In the end of August, the total loans amounted to KM 18.03 billion, which was a growth of 6.3% at the annual level. The loans to non-financial companies recorded positive growth rates at the annual level, those being 5.4% for short-term loans and 9.0% for long-term loans. The long-term loans of households continued their slow upward trend at the annual level, which was present since July 2016, while the short-term loans extended to this sector kept the negative growth rates.

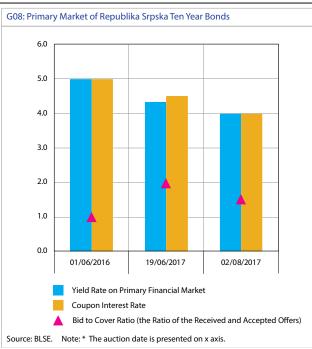

Since October last year, the acceleration of the growth trend of broad money supply was evident. While the monetary aggregate M1, representing the most liquid components of money supply, transferable deposits in the local currency and cash outside banks, continuously recorded high growth rates, such acceleration of money supply resulted from the changes in the annual rates of quasi money. The encouraging fact is that higher growth rates of other deposits were recorded again, which is a significant source for lending.

In August 2017, a small increase of foreign assets was recorded (0.4%) and a decrease of foreign liabilities (3.0%) of commercial banks at the monthly level. The items which contributed to the increase of foreign assets were term deposits and other receivable accounts with foreign banks, while foreign currency in banks' vaults recorded a considerable decrease at the monthly level. Foreign liabilities decreased due to a decrease of deposits of non-residents with domestic banks.

In August, the total of KM 9 billion in 3.5 million transactions was reached in the internal payment system, which was a growth of turnover by 11.6% (m/m-1) i.e. 13.11 (m/m-4). Although the growth rate of the turnover in RTGS in August was slightly changed, it remained a two digit number at the level of 14.42%. The annual growth rate of the turnover in Giro Clearing was changed by around 3 pp and decreased to 6.81%. Over the previous 5 months, the turnover growth rates in RTGS were considerably higher compared to the growth rates in Giro Clearing. The common feature of the turnover in both segments in August was a sudden growth of the average transaction value brought about by a faster growth of turnover compared to the growth of the number of transactions. The average monthly turnover in RTGS and Giro Clearing amounted to KM 87,901 and KM 424 respectively.

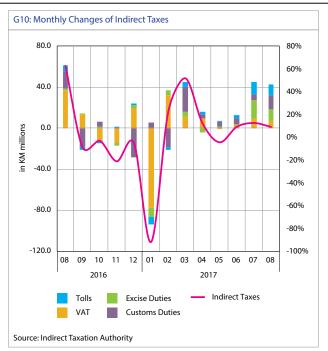

Republika Srpska issued in August two issues of public debt. For financing public expenditures, Republika Srpska collected in this way the total of KM 40 million, and the achieved issue amount was equal to the planned one. In addition to the issues of 6 m T-bills, ten year bonds were issued in August as well (KM 25 million), which extended the maturity structure of public debt. This issue was realized with the lowest coupon interest rate recorded so far and the yield to maturity rate on the primary market in the amount of 4% and with a high demand which exceeded the offer by 52%. The issue of 6m T-bills was realized at the yield to maturity rate of 0.69% and with the bid to cover ratio of 2 (the average for 2017 was 1.66). In the Federation of BH, there were no issues of public debt in August.

The total recorded value of the issues in eight months of 2017 was KM 282.9 million (Republika Srpska), i.e. KM

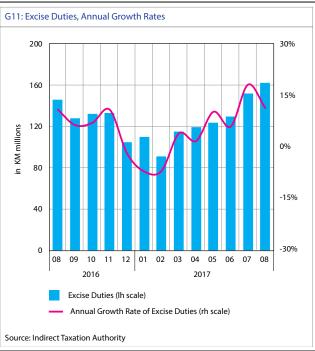

159.9 million (the Federation of Bosnia and Herzegovina).

G09: General Government Debt with Commercial Banks, Annual **Growth Rates** 60.0% 10.0% 50.0% 5.0% 40.0% 0.0% 30.0% -5.0% 20.0% -10.0% 10.0% -15.0% -20.0% 0.0% 01 02 03 04 05 06 07 08 09 10 11 12 01 02 03 04 05 06 07 08 General Government Liabilities with Banks on the Basis of Loans (lhs) General Government Liabilities with Banks on the Basis of Securities (rhs) Source: CBBH

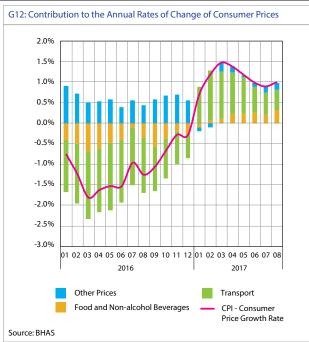

In August, the monthly decrease of the liabilities on the basis of the issued securities and general government loans was recorded. In the end of August, the total debt of the general government sector on the mentioned two bases amounted to KM 2.23 billion, which was a growth of KM 33.7 million or 1.5% at the annual level. The banking sector exposure to the general government sector was 8.1% of the total banking sector assets.

In August, the significant monthly growth of the revenues from indirect taxes was recorded. The largest contribution to the mentioned growth came from VAT in the amount of KM 32.1 million, as a result of the growth of spending, which is usually high at this time of the year, due to a higher number of tourists among other reasons. The total collected revenues from indirect taxes for the first eight months amounted to KM 3.75 billion, and compared to the previous year they recorded an increase by 6.0%. The paid reimbursements in August amounted to KM 115.2 million.

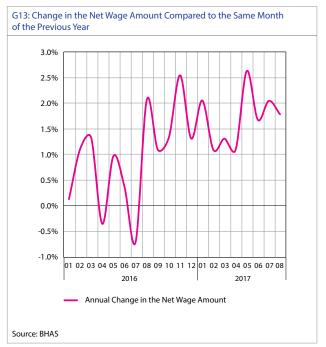

In August, the trend of high growth rates of the revenues from excise duties was continued at the annual level (11.3%). In the first eight months, KM 1.0 billion was collected on the basis of excise duties, which is a growth of KM 47.8 million (5.0%) compared to the same period of the previous year. The annual growth of the revenues on this basis was primarily the result of the growth of the revenues from the excise duties on oil derivatives and the excise duties on tobacco products.

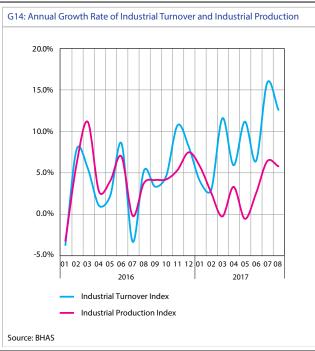

The several year long trend of decline of consumer prices, at the annual level, was ended in the beginning of the current year, which was followed by a stronger increase of consumer prices.

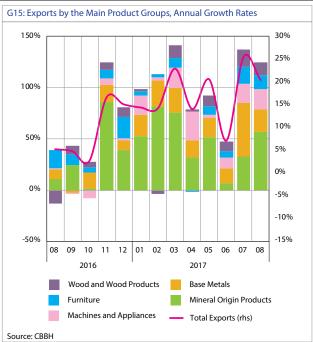

A positive contribution in the change of the annual rate of consumer prices was recorded in transport prices (0.5 pp), and the prices of food and non-alcohol beverages (0.3 pp). The contribution of the prices of other groups of products and services, collectively, in August was 0.2 pp, due to a significant increase of the average prices in the section of alcohol beverages and tobacco the growth of which in August at the annual level was 6.4%.

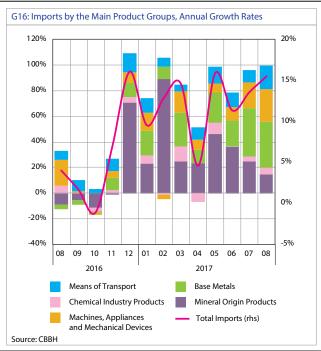

The average nominal net wage in BH in the end of August amounted to KM 858 and compared to the same month of the previous year it was higher by 1.8%. In the end of August of the current year, observed at the annual level, a decrease of the net wage was recorded in other service activities (-3.3%), financial activities (-2.6%) and the activities of art and entertainment (-1.4%). In other activities, the growth of the nominal net wage was recorded at the annual level. The highest nominal growth of the net wage was recorded in the activity related to professional, scientific and technical operations (16.6%) where wages vary significantly and are mainly related to certain projects.

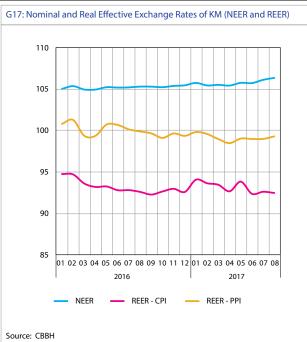

Industrial turnover index shows that the value of industrial turnover follows a similar trend as industrial production index, but a short time lag between industrial production and sale is evident. The total sale on the domestic market in the first eight months of the current year recorded an annual growth (3.4%), but a stronger growth was present in the sale in a foreign market (15.6%). Observing the structure of the annual growth rate of industrial production in August, a growth was recorded in the industrial areas of manufacturing industry (9.1%) mining (1.8%), while the production and distribution of electric energy and gas recorded a decline of production (-1.5%).

Annual growth rate of exports in August amounted to 20.3%. The most significant export increase was recorded in the exports of mineral origin products by 57.0%. The exports of the other main product groups also recorded positive and high growth rates. So, the exports of base metals increased by 22.2%, followed by the exports of machines and devices and electric appliances (18.8%), and the exports of furniture 14.3%. The export growth rate in the first eight months was lower amounting to 17,3%.

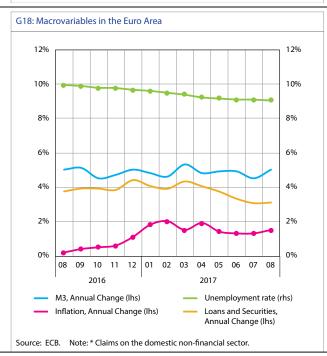

In August, the import growth rate was 15.5%. The highest growth was recorded in the imports of base metals (35.6%), although the other main product groups recorded a significant growth. The imports of machines, appliances and electric devices increased by one quarter, while the imports of means of transport increased by one fifth. Since the beginning of the year, the import growth rate amounted to 12.3%.

The nominal effective exchange rate of KM (NEER) recorded a slow growing trend over the previous two months. In August, KM nominally, at the annual level, appreciated against Turkish lira (24.8%), British pound (6.4%) and US dollar (5.2%). In August, NEER appreciated at the annual level by 1pp.

The real effective exchange rate of KM (REER) measured by consumer prices was much lower compared to the REER measured by the producer prices. The REER measured by consumer prices at the annual level was lower by 13bp, while the REER based on producer prices was lower by 58bp.

Despite a considerable growth of the GDP of the euro area in Q2 2017 in the amount of 2.3% (q/q-4) the unemployment rate in the last three months was almost at the same level. In August 2017, it amounted to 9.05%. The growth rate of banks' claims on the domestic non-financial sector decreased in August. Monetary aggregate M3 increased by 5%, and the inflation recorded a slow growth. In the end of August, inflation was higher by 0.2 pp than in the previous month, but it was still lower by 0.5 pp than the target inflation.

STATISTICAL APPENDIX

- T01: Main Economic Indicators
 T02: Buying and Selling of KM
 T03: Foreign Reserves of CBBH
 T04: Monetary Aggregates
 T05: Monetary Survey
 T06: Balance Sheet of CBBH
- T07: Consolidated Balance Sheet of Commercial Banks in BH
- T08: Total Deposits and Loans of Commercial Banks
- T09: Structure of Deposits and Loans of Commercial Banks by Currency
 T10: Structure of Transferable Deposits with Commercial Banks by Sector
 T11: Structure of Other Deposits with Commercial Banks by Sector
 T12: Structure of Short-terms Loans of Commercial Banks by Sector
 T13: Structure of Long -Terms Loans of Commercial Banks by Sector
- T14: Interest Rates on Loans to Households
- T15: Interest Rates on Loans to Non-financial Companies
- T16: Interest Rates on Deposits of Households and Non-financial Companies

- T23: BH Balance of Payments: Financial Account
- T24: BH Foreign Trade Balance
- T25: Exports by Country of DestinationT26: Imports by Country of OriginT27: Average Middle Exchange Rates
- T28: Foreign Debt Servicing

Note: Brief notes on methodology can be found below each table, while more detailed ones are available at www.cbbh.ba

Notes applicable for tables 4, 5, 7, 8, 9, 10, 11, 12, 13.

The revised data for the period January 2006 – November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.

The data on the "complete" balance sheet, with the included passive sub-balance, are still available at: http://statistics.cbbh.ba:4444/Panorama/novaview/SimpleLogin_bs.aspx

In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM.

Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred on the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, on the liabilities side: decrease of liabilities to non-residents in the amount of KM 624 million, an increase in loan losses provisions by KM 472 million and increase of other liabilities by KM 7 million.

In February 2011, one bank from the Federation of BH made the reclassification of approximately KM 80 million of deposits, from deposits of public enterprises to entity government deposits, in accordance with IMF recommendations.

By order of the Federal Banking Agency in June 2010 one bank has made a reclassification of about KM 300 million claims based on securities on domestic institutional sectors to the claims on non-residents. In December 2010 the same bank made this reclassification retroactively in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease of other items net.

One bank from the Federation of BH made a reclassification of financial instruments in the foreign assets for the period January -August 2010 amounting to about KM 40 million. Claims on non-residents based on loans were reclassified into claims on non-residents based on securities, which resulted in changes in the short- term and long- term foreign assets.

By order of the Banking Agency of Republika Srpska, one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, i.e. decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively in the appropriate amounts, by months, ranging from KM 50 - 150 million.

In accordance with new regulations of the RS Banking Agency, published in the Official Gazette of RS no.136/10, which have defined a new way of recording claims classified in category "E", accounting and recording of interest on non-performing assets and calculation of general and special provisions, RS banks, in the data for December 2010 implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to KM 180 million within the capital account.

 $Monetary\ data\ have\ been\ updated\ according\ to\ the\ IMF\ methodology\ (Monetary\ and\ Financial\ Statistics\ Manual,\ 2000)\ from\ January\ 2006.$

Nots: Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes: The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.

Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).

Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M1 and QM.

Monetary data updated according to the MMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006.

Notes: The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH -monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes: Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government). Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes: The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of CBBH for the long-term loans and claims on commercial banks on the basis of settlement accounts. Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Account 1 and 2). Deposits of central government with CBBH are transferable and other deposits of BH Institutions, Entity governments, Entity social security funds and those of Brčko District in domestic currency. Shares and other equity are comprised of equity, current year result, general and special reserves and revaluation/adjustment. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes: Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko District (from July 2001 until November 2002), NBRS (until December 1998) and the NBBH (until November 2002). Mutual claims and liabilities among the commercial banks have been consolidated. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.

Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments, Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors). Balance sheets of commercial banks of Federation of BH in addition to active sub-balance sheets include data from passive sub-balance sheets as well. Passive sub-balance sheets include liabilities arising from foreign loans and frozen foreign currency deposits of citizens, which occurred until 31 March 1992. These liabilities will be taken over, in the process of privatisation, by Ministry of Finance of Federation of BH in accordance with the entity Law on Opening Balance Sheets of Enterprises and Banks and Law on Privatisation.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes: Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non-financial enterprises, private non- financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors). Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added.

Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment /revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes

By order of FBA in March 2010, loans to households with currency clause with one bank were reclassified, from loans in EUR to loans in KM. From September 2004, change in structure of loans by currency is result of implementation of recommendations of IMF Mission for monetary and financial statistics in BH from May 2004. According to that, all loans in KM which include currency clause (indexed to euro), should be classified as loans in KM (domestic currency).

Data on structure of deposits and loans by currency in Republika Srpska until September 1999 are not available, so for this period the total amount of deposits and loans in RS is included in the column Total.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes: Deposits of domestic institutional sectors represent liabilities of commercial banks towards all institutional sectors. Deposits on the BH level represent deposits with commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko Branch (from July 2001 until November 2002), deposits with NBBS (until December 1998), deposits with NBBH (until November 2002) and deposits with the Payment Bureaus Sarajevo and Mostar (until November 1999). Sight deposits represent liabilities of commercial banks related to transaction accounts and sight deposits in domestic and foreign currency.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Notes:Loans to domestic institutional sectors represent claims of commercial banks on all institutional sectors. Loans at the BH level include loans extended by commercial banks covered by Main Unit Sarajevo, Main Unit Mostar, Main Bank RS, Brčko Branch (from July 2001 until November 2002), loans with NBRS (until December 1998) and NBBH (until November 2002). The total of claims on all leves of government and funds (short-term and long- term) are shown in Table of short-term loans (columns 3,4,5,6,7) in total amount, because source data do not provide a maturity structure of claims for governments and funds. Short – terms loans represent claims of commercial banks on all domestic institutional sectors up to one year, in domestic and foreign currency.

Claims on BH Institutions have been reclassified since April 2010.

T13: Structure of Long-terms Loans of Commercial Banks by Sector - end of period, KM million -

LOANS TO DOMESTIC INSTITUTIONAL SECTORS

| Year | Month | Loans to BH Institutions | Loans to Entity Governments | Loans to Cantonal Governments | Loans to Municipal Governments | Loans to Social Security Funds | Loans to Other Financial Institutions | Loans to Non- financial Public Enterprises | Loans to Non-financial Private Enterprises | Loans to Non-profit Organizations | Loans to Households | Other Loans | Total |

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting

from the report for July 2017.

* Interest rates in table for revolving loans and credit cards and their amounts refer to the outstending amounts.

IRF – initial rate fixation

^{...} insufficient data to be published

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

No data for interest rates on loans in foreign currency based on credit cards and overdrafts to households.

Notes:
Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place.
Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

* Interest rates in table for revolvong loans and credit cards and their amonuts refer to outstanding amounts.

IRF – initial rate fixation

... insufficient data to be published
The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free

deferred payment (0% ir), they are not published.

No data for interest rates on loans in foreign currency on the basis of credit cards and overdrafts to non-financial corporations.

T16: Interest Rates on Deposits of Households and Non-financial Companies - percentages per annum -

Notes:

From 1 July 2016, the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10%. From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts: in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to 50% of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank. Since 01 May 2015, the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it

-on the reserve requirement amount - the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero,

-on the amount of the funds exceeding the reserve requirement – zero rate of compensation.

The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value.

From 1 September 2014, the remuneration rate has been calculated on the basis of the weighted average interest rate which was earned by the Central Bank of BH on the market in the same period on deposits invested up to a month; and 70% is calculated on the amount of required reserve or minimum 0, while 90% of the mentioned rate is calculated on the amount of excess reserves or minimum 0.

From August 1st 2011. the remuneration rate is calculated by the weighted average interest rate which were earned by the Central Bank on deposits invested up to a month in the same period; 70% of this rate is calculated on the amount of required reserves while 90% of the same rate is calculated on the amount of excess reserves.

From February 1st, 2011 the required reserves rate on deposits and borrowed assets with contracted term of maturity up to one year was declined from 14% to 10%, while the required reserves rate on deposits and borrowed assets with contracted term of maturity over one year is not changed.

From July 1st, 2010 remuneration rate on the amount of required reserves is changed and calculated as an average of interest rates, which were earned by the Central bank on overnight deposits in the same period, while remuneration rate on the amount of excess reserves is not changed.
From May 1st, 2009 the required reserves rate is 7% on deposits and borrowed assets with contracted term of maturity over one year.

From April 1st, 2009 remuneration rate is calculated as:- On the amount of required reserves is 0,5%,- On the amount of excess reserves on the rate calculated as an average of interest rates, which were earned by the Central bank on deposits invested up to u month.

From January 1st, 2009 the required reserves rate is 14% on deposits and borrowed assets with contracted term of maturity up to one year and 10% on deposits and borrowed assets with contracted term of maturity over one year.

From October 11th, 2008 required reserves rate was declined from 18% to 14%.

From January 1st, 2008 required reserves rate was increased from 15% to 18%.

^{*}The base for calculation of required reserves includes deposits and borrowed funds in domestic and other currency expressed in KM.

Notes:

The share of BH exports to the country in total BH exports for 2010 was used as a criterion for presenting the country of exports. Thus, all countries with higher share of exports than 4% of the total BH exports for 2010 are separately presented, while the other countries are presented in the column "Other Countries".

^{*} Until February 12, 2007, the data on exports to Serbia and Montenegro were presented as exports to Serbia, but since then Serbia and Montenegro have been presented separately.

Notes:

The share of BH imports from the country in total BH imports for 2010 was used as a criterion for presenting the country of imports. Thus, all countries with higher share of imports than 3% of total BH imports for 2010 are separately presented, while the other countries are presented in the column "Other Countries".

^{*} Until February 12, 2007, the data on imports from Serbia included imports from Montenegro as well, while since then imports from Montenegro has been included in the column "Other Countries".
