SUMMARY

Due to low base values and the growth of prices of transport and food and beverages in July, the upward trend of consumer prices in BH continued at the annual level, which is in accordance with the trends in developed countries and main trade partners (Graphs 01 and 02). No significant changes of nominal and real effective exchange rates in July were recorded at the annual level (Graph 3). Although depreciation was recorded in July compared to December, the euro dollar exchange rate remained above the average value (Graph 04).

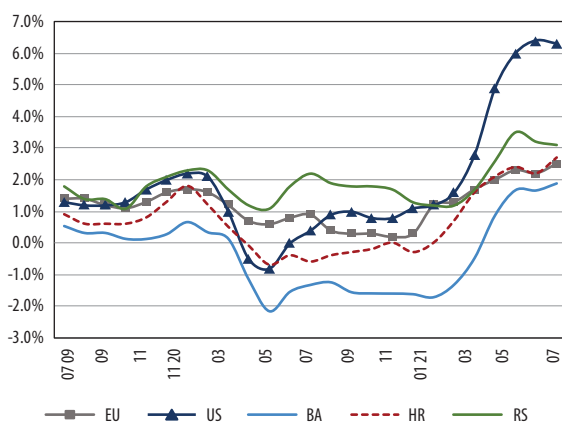

Base effect and high annual growth rates of production and distribution of electric energy and gas, and also manufacturing industry, enabled higher growth rates of industrial production than those in the pre-pandemic period, which contributed also to high growth rates of export value (Graphs 5 and 6). At the same time, significant import growth rates were recorded (Graph 7). The recovery of domestic spending, and the growth of VAT on imports in the first seven months of the current year generated an annual growth of net revenues from VAT (Graph 8). At the monthly level, a decline of net revenues from indirect taxes was recorded, mainly due to significant reimbursement amounts, and there were no significant changes with commercial banks in the level of deposits or debts of the general government sector (Graphs 9 and 10). In BH, as in most countries hit by the pandemic, social payments contributed most to the growth of public spending (Graph 11). The downward trend of the number of the unemployed in BH was stopped in July due to the increase of unemployment in FBH (Graph 12)

The foreign exchange reserves increased in July due to the demand of commercial banks and their customers for the local currency (Graph 13). The upward trend of the total deposits continued (Graph 14). The growth of reserve money continued resulting from the growth of cash outside monetary authorities and banks' deposits with monetary authorities (Graph 15). Compared to the previous month, both required reserve base and excess reserves continued to increase, and after introducing remuneration on required reserve from RR base in foreign currency, applied since 01 June 2021, the decrease of the base in foreign currency was not observed (Graph 16). There are still no signs of recovery of commercial banks' lending, particularly in case of non-financial companies (Graph 17). The value of BIRS in July declined at the monthly level, while all the stock exchange indices on SASE increased (Graph 18).

G01: Contribution to Annual Change in Average Consumer Prices

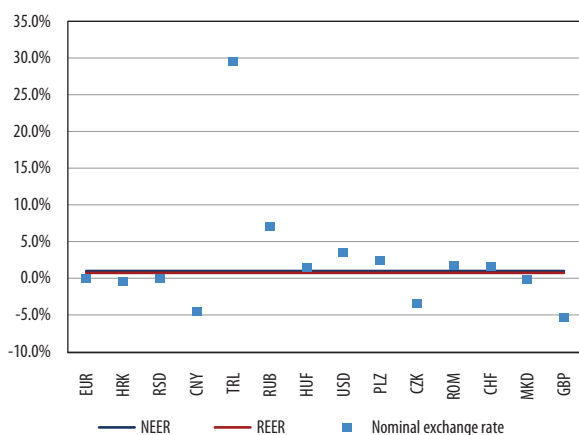

Source: BHAS

In July, for the fourth successive month, an accelerated growth of consumer prices at the annual level was recorded, stimulated by the growth of the prices of transport services, food and beverages. Predominating impact on the growth of consumer prices still came from low values from the base period. On the other hand, clothes and footwear recorded a continuous price downward trend. In the first seven months of the current year, a growth of the average consumer prices of 0.36% was recorded at the annual level, with inflationary pressures still expected in the period ahead, firstly due to the still existing base effect and the growth of prices of production industry on the local market (2.58% annual growth in the first seven months of the current year).

G02: Annual Change of Average Consumer Prices in the Selected Countries

Source: Eurostat and BHAS

Inflationary pressures on average consumer prices at the global level were present during the current year and continued in July. The growth of average consumer prices in July in the EU, observed at the annual level, amounted to 2.5%, amounting to 2.2% at the euro area level, significantly exceeding the inflation target level. The annual growth of the average consumer prices in July in USA was even stronger. Expansionary monetary policy of the Federal Reserves, delayed demand from the previous months, and the low base effect from the previous year contributed to the growth of average consumer prices in the USA in July, in the amount of 6.3%.

G03: Annual Changes in Foreign Exchange Rate

Source: CBBH

The nominal effective exchange rate (NEER) in July 2021 appreciated by 0.97% compared to the same month of the previous year. This change in NEER was caused by the nominal change of KM against the currencies of developing countries, as a consequence of the trend of EUR (our anchor currency). The nominal exchange rate of KM, in July, at the annual level, appreciated against Turkish lira by 29.60%, against ruble by 7.10% and against US dollar by 3.52%, while depreciation was recorded in relation to British pound by 5.38%, Chinese yuan by 4.47% etc. The real effective exchange rate of KM (REER) in July, at the annual level, did not show any significant changes.

G04: EUR/USD Foreign Exchange Rate

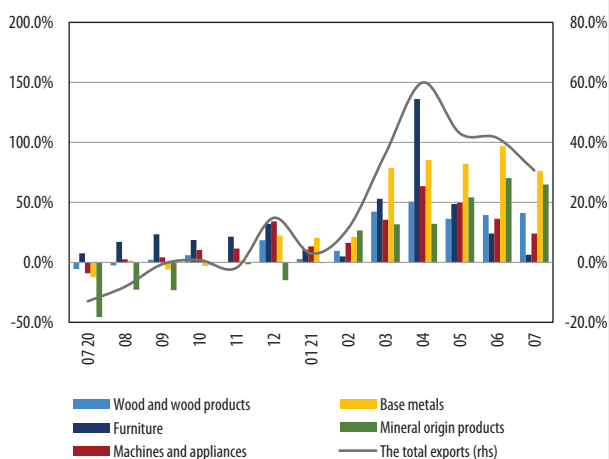

Source: Investing.com

Despite very strong depreciation trends from the beginning of this year, the currency of the euro area remained very strong compared to dollar. The July EURUSD exchange rate of 1,18 was lower by 3.3% compared to December values, still remaining above the average value. The weakening of dollar is a reflection of potential slowdown of the trend of recovery of US economy.

G05: Annual Change of Manufacturing Industry in the First Seven Months

Source: BHAS

Industrial production in the first seven months of the current year increased by 12.66% compared to the same period of the previous year. The high growth rate of industrial production resulted from the low base effect, and also the growth of competitiveness of some activities, as growth was also recorded compared to the same period 2019 (1.15%) Annual growth was recorded in production and distribution of electric energy and gas by 15.7%, as well as in manufacturing industry by 14.5%, while on the other hand, mining recorded the annual decline for the first seven months of 4.7%. In more details, some areas of manufacturing industry, such as production of motor vehicles, trailers and semi-trailers and also finished metal products recorded very high growth rates (40.0% and 39.0% respectively).

G06: Exports by the Main Product Groups, Annual Changes

Source: BHAS

High annual growth rates of the value of exports from BH continued in July. The value of exports from BH in the first seven months amounted to KM 7.63 billion, representing an annual growth of 31.06%. Due to the growth of demand in the countries which are BH main trade partners, due to the industrial production growth, exports of the main export product groups increased. In July, at the annual level, the exports of base metals increased by 76.16%, those of mineral origin products by 64.82%, and those of machines and appliances by 23.91%. In addition to a significant quantity growth of exports in July, the price effect was not negligible either, due to the growth of stock exchange goods prices in the current year compared to the previous year.

G07: Imports by the Main Product Groups, Annual Changes

Source: BHAS

The growth of domestic demand was continued in July, so some groups of products exceeded the values of imports from the pre-pandemic period. The value of imports to BH in the first seven months of the current year amounted to KM 11.47 billion, representing an annual growth by 20.38%. The effect of low values from the base year retained the strongest effect on high growth rates of imports to BH, although price and quantity effects were not negligible either. The highest growth of the import value in July, at the annual level, was recorded in the imports of base metals by 66.88%, those of mineral origin products by 51.11%, chemical industry products by 18.20% and means of transport by 16.54%.

G08: Revenues from VAT

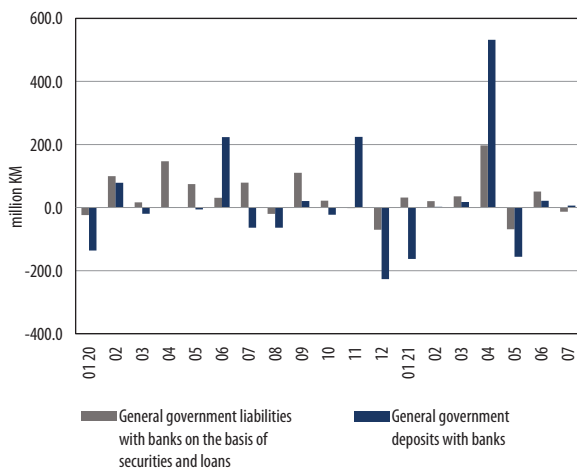

Source: Indirect Taxation Authority

In the first seven months, KM 2.39 billion was collected net on the basis of VAT, which is higher by KM 275 million (13.0%) compared to the same period of the previous year. Positive trends in the collection of VAT resulted from the recovery of domestic spending and the growth of VAT on imports. Regarding reimbursements on VAT, they started to increase since February, which is related to the growth of exports since December 2020.

G09: Monthly Changes of Indirect Taxes

Source: Indirect Taxation Authority

During the first seven months, in cumulative terms, net revenues from indirect taxes amounted to KM 3.76 billion, representing a 10.7% growth at the annual level. The mentioned growth mainly reflected the low base from the previous year, but also private spending recovery, which is indicated by the growth of revenues in the first seven months of 2.1% compared to the same period of the record year 2019. At the monthly level, a decline of net revenues was recorded in July (-3.0%), resulting from a significant amount of reimbursement, amounting to KM 120.6 million. Preliminary data for August indicate a further recovery of revenues from indirect taxes, exceeding the pre-crisis amounts of collection on this basis.

G10: Obligations and Deposits of the General Government with Commercial Banks, Monthly Changes

Source: CBBH

At the end of the July, the total liabilities of the general government sector with commercial banks amounted to KM 3.27 billion, which is an annual growth of KM 293.8 million or 9.9%. There were no significant changes in the levels of deposits and debts of the general government sector with commercial banks in July compared to the previous month. Banking sector exposure to the general government sector in the end of July was 9.2% of the total banking sector assets.

G11: Contributions in Public Spending Change in BH and Countries in the Region in 2020

Source: The World Bank

The COVID-19 crisis had a strong effect on the growth of public spending in the countries worldwide. In order to implement the measures for mitigating social and economic consequences, governments of most countries increased public spending. In the countries of the region, the strongest contribution to public spending growth was related to social payments, which amounted to 21.6% in per cents of GDP in BH.

G12: The Number of the Unemployed in July

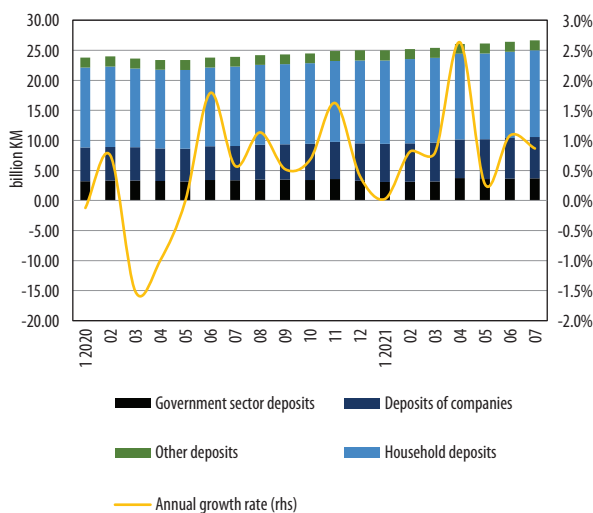

Source: Labour and Employment Agency and EUROSTAT

The continuous downward trend of the number of the unemployed in BH, present from the beginning of the current year, ended in July when 0.41% more unemployed persons were registered compared to the previous month. The increase of the number of the unemployed at BH level resulted from the increase of unemployment in FBH of 0.7% at the monthly level, while unemployment in RS and in Brčko District decreased in July. In the EU, the unemployment downward trend was continued, so the unemployment rate at the end of July amounted to 6.9%, while at the same moment in the USA, it amounted to 5.4%. Despite the continuous decrease of unemployment, the number of the unemployed in the USA in the end of July was higher by 2.7 million persons than in February before the pandemic.

G13: The CBBH Foreign Exchange Reserves

Source: CBBH

Compared to the previous month, during July 2021, the foreign exchange reserves increased by KM 407.95 million, so, in the end of July, the foreign exchange reserves amounted to KM 14.58 billion. During July, components affecting the foreign exchange reserves increased, so KM purchase and sale balance with commercial banks and internal depositors was positive amounting to KM 348.3 million. The foreign debt repayment in July accounted for KM 29.6 million. The position other changes in July increased by KM 59 million. Currency board coverage for May was 106.02%.

G14: The Total Deposits in BH Banking Sector

Source: CBBH

This was the fourteenth month of continuous growth of the total banking sector deposits. Compared to the pre-pandemic period, they were higher by 11.0%, and compared to December 2020, by 7.0%. The monthly growth of the total deposits was mainly contributed by household deposits and deposits of companies. In July, the same as in the previous three months, deposits of companies were increasing much faster than household deposits. High deposit growth was visible also in government sector, these deposits not contributing significantly to the growth of total deposits due to their size. Compared to the pre-pandemic period, the share of government sector deposits in July was not changed (13.0%), while, on the other hand, the share of household deposits (54.0%) decreased by 2 pp, while the share of deposits of non-financial companies (19.4%) increased by 3 pp.

G15: Reserve Money and Monetary Multiplication

Source: CBBH

Reserve money in July recorded a monthly growth of KM 357.41 million. The largest contribution to this growth came from increase of cash outside monetary authorities (KM 203.8 million) and increase of bank deposits with monetary authorities (KM 139.9 million). Reserve money, compared to the same period of the previous year was higher by 13.6%, amounting to KM 13.0 billion in the end of July. The upward trend of monetary aggregate M2 was present in July mainly under the impact of the growth of monetary aggregate M1. Taking into account the trends of money supply components and reserve money, monetary multipliers M1 and M2 did not record any significant oscillations in the end of July.

G16: Reserve Account and RR Implicit Rate

Source: CBBH

Compared to the end of June 2021, the required reserve base increased by KM 175 million, while excess reserves in July amounted to KM 3.2 billion. The required reserve in the end of July amounted to KM 2.88 billion, being higher by almost 8.0% compared to the same period last year. Such growth indicates that the system is stable with depositors' confidence still existing. Compared to June 2021, the implicit rate also increased, amounting to 21.45% in July. After the introduction of remuneration on required reserve for the RR base in foreign currency, with the implementation from 01 June 2021, decrease of the base in foreign currency was not observed. The CBBH has kept the required reserve rate unchanged.

G17: The Total Loans in BH Banking Sector

Source: CBBH

The level of the total loans in July was almost the same as in June. The main reason of stagnation in lending were loans to private non-financial companies, the value of which in July decreased by 0.6% compared to the previous month. The main generator of monthly credit growth were loans to households, which increased by 0.6%. As in the previous months, in July, housing loans (1.1%) were increasing faster than loans for other purposes (0.4%). Compared to the pre-pandemic period (February 2020), the July level of housing loans was higher by 12.4%, while that of loans for other purposes was higher by 1.9%.

G18: Stock Market Indices on BH Stock Exchanges

Source: BLSE and SASE

In July, the Entities did not issue securities, all the trading being related to secondary trading, while the trends on stock markets continued. The value of BIRS, after three months of stagnation, declined and was lower by 3.0% compared to the previous month. All stock exchange indices on SASE increased in July, with the broadest stock exchange index SASX 30 increasing for the third consecutive month. At the annual level, a large difference is evident in the Entity stock market performances. BIRS (Banja Luka stock exchange) lost 9.0% of the value in a year, while SASX 30 value increased by 17.0%.

Notes applicable for tables 4, 5, 7, 8, 9, 10, 11, 12, 13.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

The revised data for the period January 2006 – November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.

The data on the „complete“ balance sheet, with the included passive sub-balance, are still available at: http://statistics.cbbh.ba:4444/Panorama/novaview/SimpleLogin_bs.aspx

In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM.

Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards applied in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred at the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, at the liabilities side: decrease of liabilities to non-residents in the amount of KM 624 million, an increase in loan loss provisions by KM 472 million and other liabilities increased by KM 7 million.

In February 2011, one bank from BH Federation reclassified deposits in the amount of around KM 80 million, from the deposits of public companies to the Entities' governments deposits, in line with the IMF recommendations.

By order of the FBH Banking Agency, in June 2010, one bank made a reclassification of about KM 300 million of claims based on securities on domestic institutional sectors to the claims on non-residents. In December 2010, the same bank made this reclassification, retroactively, in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease in other items net.

One bank from FBH made a reclassification of financial instruments in the foreign assets amounting to about KM 40 million for the period January - August 2010. Claims on non-residents based on loans were reclassified in claims on non-residents on the basis of securities, which resulted in changes in the short- term and long-term foreign assets.

By order of the Banking Agency of Republika Srpska, one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, i.e. decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively in the appropriate amounts, by months, ranging from KM 50 - 150 million.

According to new regulations of the RS Banking Agency, published in the Official Gazette of RS no.136/10, which have defined a new way of recording claims classified in category "E", accounting and recording of interest on non-performing assets and calculation of general and special provisions, RS banks, in the data for December 2010 implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to KM 180 million within the capital account.

Notes:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.

Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).

Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M1 and QM.

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports and in accordance with the recommendations of the IMF Manual and Guidelines for the 2016 compilation of monetary and financial statistics.

Monetary data updated according to the MMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006.

The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH - monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. According to new methodology, Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey.

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports and in accordance with the recommendations of the IMF Manual and Guidelines for the 2016 compilation of monetary and financial statistics.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government). Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

Note:

Monetary data updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006.

The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in the CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of the CBBH for the extended long-term loans and claims on commercial banks on the basis of settlement accounts.

Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the Central Bank (monetary authorities) and cash outside commercial banks. The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Accounts 1 and 2).

Deposits of central government with the CBBH are transferable and other deposits of BH Institutions, Entity Governments, Entity Social Security Funds and those of Brčko District in the local currency. Shares and other equity comprise the equity, current year result, general and special reserves and adjustment/revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets.

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports and in accordance with the recommendations of the IMF Manual and Guidelines for the 2016 compilation of monetary and financial statistics.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH and it represents consolidation of mutual claims and liabilities among the commercial banks. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.

Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments, Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors).

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports and in accordance with the recommendations of the IMF Manual and Guidelines for the 2016 compilation of monetary and financial statistics.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non-financial enterprises, private non-financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors). Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added.

Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment / revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

By order of FBA in March 2010, loans to households with currency clause with one bank were reclassified, from loans in EUR to loans in KM.

Notes:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Deposits of domestic institutional sectors represent liabilities of commercial banks towards all institutional sectors. Deposits on the BH level represent deposits with commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH Banja Luka. Sight deposits represent liabilities of commercial banks related to transaction accounts and sight deposits in domestic and foreign currency.

Notes:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Loans to domestic institutional sectors represent claims of commercial banks on all institutional sectors. Loans at the BH level include loans extended by commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH Banja Luka. The total of claims on all levels of government and funds (short-term and long-term) are shown in Table of short-term loans (columns 3,4,5,6,7) in total amount, because source data do not provide a maturity structure of claims for governments and funds. Short-term loans represent claims of commercial banks on all domestic institutional sectors up to one year, in domestic and foreign currency.

Notes:

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

* Interest rates in table for revolving loans and credit cards and their amounts refer to the outstanding amounts.

IRF – initial rate fixation

... insufficient data to be published

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

No data for interest rates on loans in foreign currency on the basis of credit cards and overdrafts to non-financial corporations.

Notes:

From July 1st, 2016 the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10.0%.

From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts: in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to 50.0% of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank. Since May 1st, 2015 the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:

-on the reserve requirement amount – the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero.
-on the amount of the funds exceeding the reserve requirement – zero rate of compensation.

The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value.

From September 1st, 2014 the remuneration rate has been calculated on the basis of the weighted average interest rate which was earned by the Central Bank of BH on the market in the same period on deposits invested up to a month and 70.0% is calculated on the amount of required reserve or minimum 0, while 90.0% of the mentioned rate is calculated on the amount of excess reserves or minimum 0.

From August 1st, 2011 the remuneration rate is calculated by the weighted average interest rate which were earned by the Central Bank on deposits invested up to a month in the same period. 70.0% of this rate is calculated on the amount of required reserves while 90.0% of the same rate is calculated on the amount of excess reserves.

From February 1st, 2011 the required reserves rate on deposits and borrowed assets with contracted term of maturity up to one year was declined from 14.0% to 10.0%, while the required reserves rate on deposits and borrowed assets with contracted term of maturity over one year is not changed.

From July 1st, 2010 remuneration rate on the amount of required reserves is changed and calculated as an average of interest rates, which were earned by the Central bank on overnight deposits in the same period, while remuneration rate on the amount of excess reserves is not changed.

From May 1st, 2009 the required reserves rate is 7.0% on deposits and borrowed assets with contracted term of maturity over one year.

From April 1st, 2009 remuneration rate is calculated as:

-On the amount of required reserve is 0,5%.

-On the amount of excess reserves on the rate calculated as an average of interest rates, which were earned by the Central bank on deposits invested up to one month.

From January 1st, 2009 the required reserves rate is 14.0% on deposits and borrowed assets with contracted term of maturity up to one year and 10.0% on deposits and borrowed assets with contracted term of maturity over one year.

From October 11th, 2008 required reserves rate was declined from 18.0% to 14.0%.

From January 1st, 2008 required reserves rate was increased from 15.0% to 18.0%.

*The base for calculation of required reserves includes deposits and borrowed funds in domestic (in KM and KM with the currency clause) and other currency expressed in KM.

Notes:

Criteria for presenting country is the share of export of the country in total three-year BH export (2016,2017,2018).

Thus, all countries with share higher than 3.0% are separately presented, while the other countries are presented as sum in the column Other countries.

Notes:

Criteria for presenting country is the share of import of the country in total three-year BH import (2016,2017,2018).

Thus, all countries with share higher than 3.0% are separately presented, while the other countries are presented as sum in the column Other countries
