INTRODUCTION

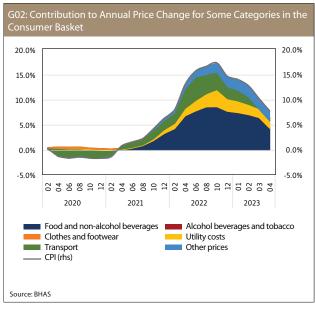

In April 2023, slower rates of price growth were recorded in most countries in the region on an annual basis (Graph 01). In BH, the lowest annual rate of price growth was recorded in the last 14 months, and the food category continues to have the biggest contribution to price growth (Graph 02). Thus, the annual growth of turnover above the average growth rate, recorded for 2022, was recorded in the retail trade of food, beverages and tobacco products (Graph 03). The modest level of economic activity in the euro zone in the first quarter, as well as the drop in the prices of stock exchange goods in the current year compared to the base year, influenced the drop in the value of exports to the main trade partner countries (Graph 04). Due to reduced external demand, the decline in the volume of industrial production continued, which had the greatest impact on the decline in the processing industry (Graph 05). From the aspect of international trade, BH achieves the highest rate of coverage of imports by exports in the trade of base metals (Graph 06). The annual decline in the value of exported goods is partly a consequence of high values from the base period, but also a consequence of the decline in exports of traditionally the most important groups of goods (Graph 07). At the same time, a continued decline in imports was recorded (Graph 08). All types of indirect taxes recorded a monthly decline. The fall in VAT revenue is caused by the drop in imports and exports, while the reduction in excise revenue collection is caused by the continuously reduced fuel consumption (Graphs 09 and 10). The collection of

revenue from indirect taxes is still stable and ensures the sustainability of the repayment of the external debt of the general government sector (Graph 11). The effects of the ECB's restrictive monetary policy, due to the rapid and extremely intense growth of the reference interest rate, were not fully reflected in the deposit interest rates of banks in the European Union (Graph 12). Monetary aggregates M1 and M2 recorded significant monthly and annual growths, which were entirely determined by the significant growth of transferable deposits in domestic currency (Graph 13). Net foreign exchange reserves, after a significant decrease in the first quarter, recorded a monthly growth, and the biggest contribution to such trends was the KM purchase and sale transactions with banks and internal depositors (Graph 14). Since the beginning of the year, there has been a continuous decline in the total holdings in reserve accounts with CBBH, which is entirely caused by the reduction of the excess required reserves (Graph 15). Banks' foreign assets, due to the growth of term deposits with non-residents, continued to grow and reached their historical maximum, while banks' foreign liabilities did not record any significant fluctuations in April (Graph 16). Banks did not significantly change their lending interest rates, and at the same time, a much lower level of newly approved loans was recorded in relation to the previous month (Graph 17). In April, the FBH issued public debt on the Sarajevo Stock Exchange after nine months, while Republika Srpska had no issues in that month (Graph 18).

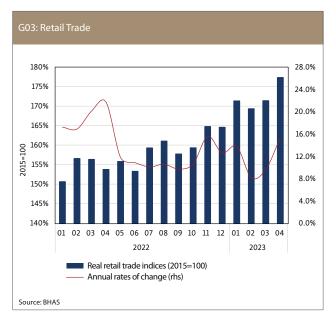

In April 2023, slower price growth rates were recorded in most countries in the region at the annual level. Annual price growth rate in the EU remained the same (8.1%), while the prices in the euro area recorded lower growth rates by 0.4 bp.

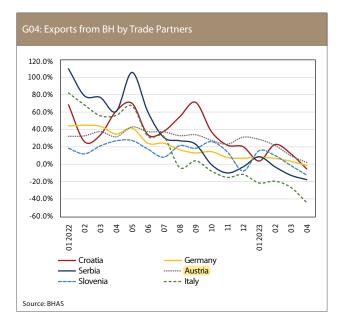

The largest contribution to annual inflation rate in the EU and the euro area was related to the category of food for which the annual inflation rate in April 2023 was 16.6% and 15.1%, respectively. All the EU countries recorded a two digit annual price growth rate for this category of consumer basket. At the same time, price indices for the category of energy recorded significantly lower growth rates for the countries of the EU and the euro area, and even 12 EU countries recorded disinflation trends in this category of consumer basket.

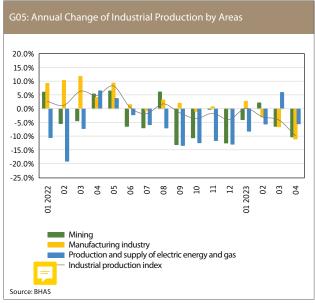

During the first four months of 2023, continuing relaxation of price pressure was evident, while annual price growth in April was 7.86%, representing the lowest growth rate over the last 14 months. Observed on the annual level, in the end of April 2023, the category of utility costs recorded the highest price growth rate (14.6%). The largest contributions to price growth were still those of food and dwelling costs at the levels of 4.34% and 2.17%, respectively. Groceries such as milk and dairy products recorded a high annual growth rate, exceeding 20%, while the price of edible oils recorded a decline of more than 30% at the annual level. Continuing deflation trend stayed in the category of clothes and footwear, where the annual decline of prices by 6.86% was evident. Uncertainty related to trends of food prices and core inflation is still a challenge and burden for economic activity.

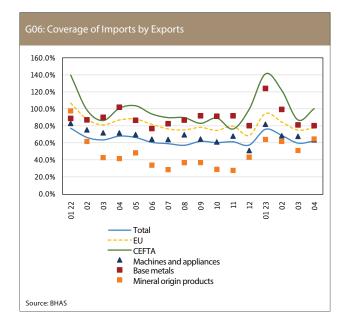

In April 2023, real trade index recorded the highest annual growth rate in 2023 of 15.3%. Growth rate of real trade index over the observed period exceeded the average growth rate recorded for entire 2022 by 1.35 bp, but it was lower than the annual growth rate recorded for the same month of the previous year by 6.41 bp. Annual trade growth exceeding the average growth rate recorded for 2022 was seen in retail trade in food, beverages and tobacco products (16.38%) and retail trade in non-food products (22.04%). At the monthly level, real retail trade index recorded growth from February 2023, while monthly growth in April 2023 was 3.5%.

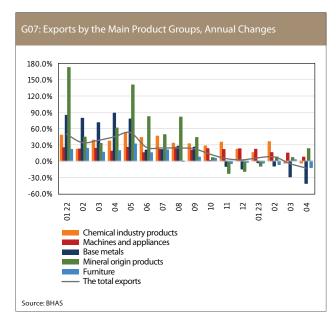

In April 2023, the value of exports of goods from BH declined, both at the annual and monthly levels. Out of six most important trade partners, annual decline of export value was recorded with five. The pattern of the movement of monthly values of exports from BH was in accordance with usual monthly oscillations with obvious downward trend of annual growth rates mainly resulting from high values from the base period. The value of exports to Italy in April declined by 44.2% compared to the same month of the previous year, that to Serbia by 17.9% and that to Slovenia by 12.5%. Also, exports to Croatia recorded annual decline by 5.5% and those to Germany by 1.7%. On the other hand, over the observed period, only the value of exports to Austria recorded annual growth (1.9%). A modest level of economic activity in the euro area in the first quarter, and decline of prices of stock exchange goods in the current year compared to the base year indicate that modest values of exports from BH can be expected in the months to come.

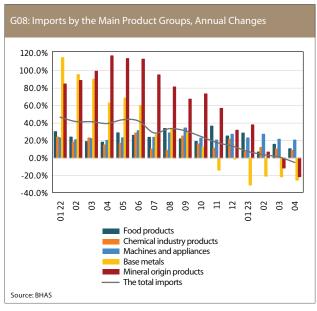

In April 2023, decline of industrial production volume continued, which has been decline for seven successive months with the exception of January when a negligible growth was recorded. The annual decline of industrial production volume was under the strongest impact of a decline in the area of manufacturing industry (11.0%), within which all the most significant activities declined compared to the same period of the previous year. Besides, decreases were recorded in the areas of mining and quarrying and also production and supply of electric energy and gas over the observed period by 10.3% and 5.5%, respectively.

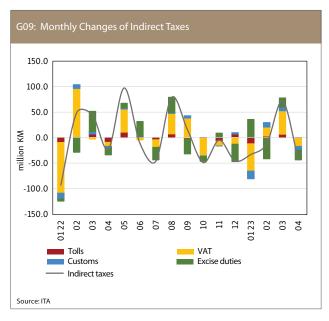

Coverage of imports by exports in BH foreign trade in goods amounted to 62.1% in April, which is higher by 246 basis points than in March. Out of the three most significant product groups, from the view of international trade, BH records the highest coverage rate of imports by exports in trade in base metals. Despite the decreased volume of trade in this kind of products, the coverage of 80.2% was recorded in April with the downward trend present since the beginning of 2023. In trade in mineral origin products in April, the coverage of 64.6% was recorded, while coverage amounted to 63.7% in trade in machines and appliances. By trade partners, imports from CEFTA countries were fully covered by exports to those countries, while in trade with the EU, coverage in April amounted to 77.6%.

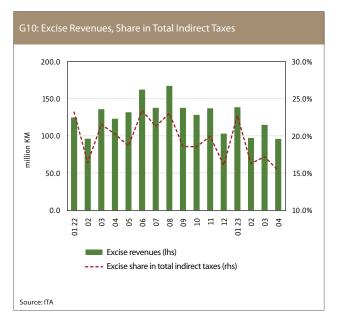

The value of exported goods in April 2023 amounted to KM 1.40 billion, which is an annual decline of 13.1%. Annual decline of the value of exported goods resulted partly from high values from the base period, but is also a consequences of decline of exports of traditionally most important commodity groups. Exports of base metals due to decreased demand in countries which are the main trading partners, recorded annual decline of export value of 41.2%. Also, a decline of the value was recorded in exports of furniture (12.2%) and chemical industry products (3.6%). On the other hand, imports of mineral origin products and machines and equipment in April recorded annual growth of 22.7% and 7.2%, respectively.

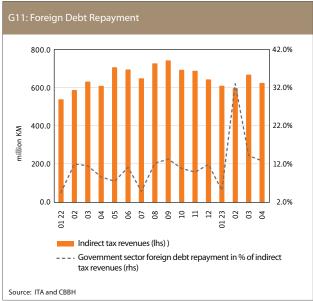

In April 2023, goods in the value of KM 2.25 billion were imported in BH, representing a decline of 5.0% compared to the same period of the previous year. Continuing decline in processing base metals impacted demand for this group of products, so in April, imports of base metals recorded annual decline of 25.2%. Imports of mineral origin products also recorded decline of the value of 21.5%, mainly resulting from significantly higher prices of oil and oil derivatives in the base period compared to April of this year. On the other hand, annual growth was recorded in imports of machines and appliances (20.7%), food products (10.7%) and chemical industry products (8.7%).

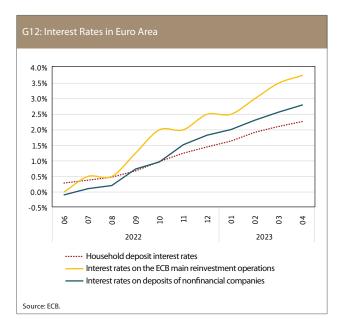

In April, a monthly decrease in the net collection of indirect tax revenues was recorded, primarily due to a decrease in imports, which was reflected in the reduction of VAT on imports. Although there was a reduction in refunds paid to taxpayers due to a decrease in imports and exports, in the first four months of the current year, refunds were higher by KM 64.0 million (9.8%) compared to the same period of the previous year. Cumulatively, for the first four months, net revenues from indirect taxes amounted to KM 2.49 billion, which represents an increase of KM 133.5 million (5.7%) at the annual level.

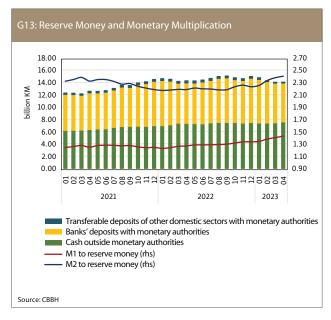

Revenues from excise taxes recorded a decline in April, both monthly and annually. In the first four months, cumulatively, a net amount of KM 444.7 million was collected based on excise duties, which is KM 33.6 million (7.0%) less compared to the same period of the previous year. The main cause of the decline in excise revenue is the negative trends related to reduced fuel consumption, whose negative trends from the previous year spilled over into the current year. In the first three months of 2023, an 8.7% drop in the collection of excise duties on petroleum products was recorded.

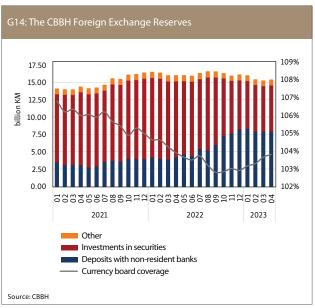

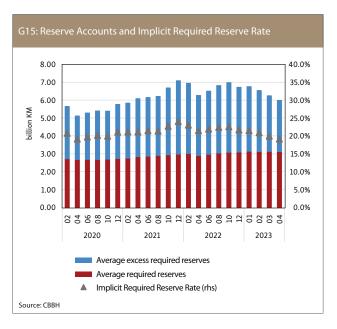

For servicing the external debt of the general government sector in 2023, total funds in the amount of KM 1.19 billion are planned, which is 14.6% of projected revenues from indirect taxes for 2023. In April, KM 79.3 million was repaid, which is 12.7 expressed as a percentage of revenues from indirect taxes for that month. Stable collection of revenues from indirect taxes ensures the sustainability of debt repayment.

The effects of the ECB's restrictive monetary policy in the form of extremely fast and extremely intensive growth of the reference interest rate were not fully reflected in the deposit interest rates of banks in the European Union. From the end of June 2022 to the end of April this year, the interest rate on the ECB's main refinancing operations increased by 375 bp, and the interest rate on household deposits and nonfinancial companies by 198 bp. and 289 bp, respectively. The slow transfer of the monetary policy of the ECB to the liabilities of the banks caused a decrease in bank deposits, a slowdown in their growth, and then a drop in their value for a few months. Resident sectors in the euro area increased the demand for assets with higher yields. Debt securities and shares in money market funds increased in the balance sheets of European banks.

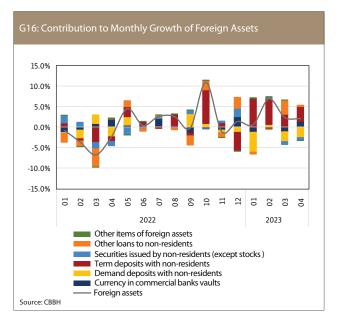

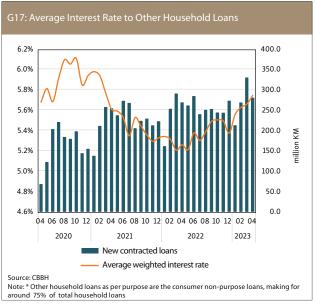

In April 2023, reserve money did not record significant fluctuations on a monthly basis, while compared to the same period of the previous year, a decrease in reserve money by KM 210.3 million was recorded. The biggest contribution to the annual reduction of this component was the reduction of bank deposits and deposits of other domestic sectors with monetary authorities by KM 269.6 million and KM 193.5 million, respectively. At the same time, in the observed period, the growth of cash outside the monetary authorities was recorded. Monetary aggregates M1 and M2 have recorded significant monthly and annual growth, and monetary multipliers M1 and M2 have consequently seen continuous monthly growth since the beginning of 2023. The annual growth of the monetary aggregate M1 was entirely determined by the significant growth of transferable deposits in local currency of KM 1.7 billion. On the other hand, the biggest contribution to the annual growth of the monetary aggregate quasi-money (QM) was the growth of transferable deposits in foreign currency (KM 538.4 million).

After a consecutive three-month decrease, net foreign exchange reserves in April 2023 recorded a monthly growth of KM 121.6 million and amounted to KM 15.32 billion. The biggest contribution to the monthly growth of net foreign exchange reserves was made by KM purchase and sale transactions with banks, which after a three-month negative balance in April were positive and amounted to KM 180.2 million. KM 81.0 million was related to the repayment of external debt in April. At the same time, at the annual level, at the end of April, net foreign exchange reserves are lower by KM 625.9 million and are lower than the monthly balance recorded throughout 2022. At the end of the observed period, the coverage ratio increased to 103.79% due to the reduction of monetary liabilities. Observed at the annual level, the structure of foreign exchange reserves in April 2023 did not record significant changes, and the trend of growth of deposits with non-resident banks continued.

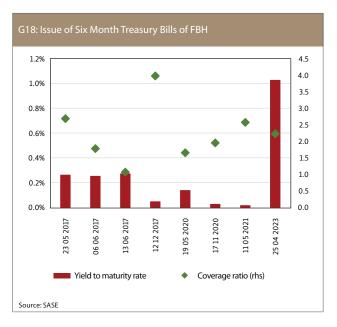

In the first four months of 2023, a continuous decline in total funds on the accounts with CBBH was recorded, which was entirely caused by the reduction of the excess required reserves. Annually, the excess required reserves are lower by KM 493.04 million, while the monthly decrease at the end of April amounted to KM 253.84 million. Consequently, the implicit rate of RR recorded a decreasing trend from the beginning of 2023. The required reserves at the end of April amounted to KM 3.12 billion, thus being higher than the average required reserves for the same month of the previous year by KM 216.72 million. At the annual level, all categories of the currency structure of the RR calculation base recorded the growth. In the first four months, CBBH did not change the RR policy in the RR rate segment. The new remuneration policy for RR and excess RR is in effect from 1 January 2023.

In April, after several consecutive months of decline, the balance of banks' foreign liabilities remained unchanged. On the other hand, banks' foreign assets continued to grow and reached their historical maximum. Faster growth of interest rates in the euro area compared to interest rates in Bosnia and Herzegovina is one of the possible determinants of the multi-month growth of term deposits with non-residents and the resulting change in the structure of banks' foreign assets. If we look at the term structure, at the end of April the share of non-resident time deposits in foreign assets was 37%, while a year earlier they made up 15% of foreign assets. The share of time deposits increased at the expense of demand deposits with non-residents, whose share in foreign assets decreased from almost a third (9/2022) to 14% in April.

In the observed period, banks did not significantly change their active interest rates, and one of the reasons is certainly the significant level of domestic sources with low interest rates. In addition, relatively low demand for loans in an inflationary environment contributed to the stagnation of interest rates. During the first four months, the average interest rates on other loans to households (they make up 75% of total loans to households) increased slightly compared to the end of last year, by about 40 bp. In April, interest rates on household loans and interest rates on loans to non-financial companies were approximately at the level of December last year. April's average interest rate on other loans, housing loans to households and loans to non-financial companies was 5.7%, 3.7% and 4.0%, respectively.

In April, the Federation of Bosnia and Herzegovina (FBH) issued public debt on the Sarajevo Stock Exchange for the first time in nine months. The issue of six-month treasury bills with a nominal value of KM 40 million was carried out at the rate of yield to maturity (1.03%), which was one percentage point higher than the rate of yield to maturity on the penultimate issue of six-month treasury bills from May 2021. A high level of demand for FBH public debt was maintained and demand exceeded supply by 2.2 times. Republika Srpska (RS) did not issue bonds during April, and both Entities planned public debt issues in May. The rise in the yield to maturity rate is the expected consequence of the ECB's restrictive monetary policy, not the growth of Entities' public debt.

STATISTICAL APPENDIX

Note: Brief notes on methodology can be found below each table, while more detailed ones are available at www.cbbh.ba

Notes applicable for tables 4, 5, 7, 8, 9, 10, 11, 12 i 13.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

The revised data for the period January 2006 – November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this subbalance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.

The data on the "complete" balance sheet, with the included passive sub-balance, are still available at: http://statistics.cbbh.ba:4444/Panorama/novaview/SimpleLogin_bs.aspx

In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM.

Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards applied in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred at the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, at the liabilities side: decrease of liabilities to non-residents in the amount of KM624 million, an increase in loan loss provisions

by KM 472 million and other liabilities increased by KM 7 million.

In February 2011, one bank from BH Federation reclassified deposits in the amount of around KM 80 million, from the deposits of public companies to the Entities' governments deposits, in line with the IMF recommendations.

By order of the FBH Banking Agency, in June 2010, one bank made a reclassification of about KM 300 million of claims based on securities on domestic institutional sectors to the claims on non-residents. In December 2010, the same bank made this reclassification, retroactively, in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease in other items net.

One bank from FBH made a reclassification of financial instruments in the foreign assets amounting to about KM 40 million for the period January - August 2010. Claims on non-residents based on loans were reclassified in claims on non-residents on the basis of securities, which resulted in changes in the short- term and long- term foreign assets.

By order of the Banking Agency of Republika Srpska one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, .i.e.. the decrease in time and savings deposits of nonbank financial institutions and government sector, and the increase in loans from the same sectors, respectively, in the appropriate amounts, by months, ranging from 50 - 150 million KM.

In accordance with new regulations of the RS Banking Agency, published in the Official Gazette of RS, no.136/10, which has regulated a new manner of recording receivables classified in category "E", accounting and bookkeeping of interest on non-performing assets and calculation of general and special provisions, RS banks , in the data for December 2010, implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of about KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to about KM 180 million within the capital account.

Note:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.

Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non- central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).

Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M1 and QM.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

 $Monetary\ data\ updated\ according\ to\ the\ MMF\ methodology\ (Monetary\ and\ Financial\ Statistics\ Manual,\ 2000),\ from\ January\ 2006.$

The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH -monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. According to new methodology, Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government). Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

Monetary data updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006.

The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in the CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of the CBBH for the extended long-term loans and claims on commercial banks on the basis of settlement accounts.

Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the Central Bank (monetary authorities) and cash outside commercial banks.

The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Accounts 1 and 2).

Deposits of central government with the CBBH are transferable and other deposits of BH Institutions, Entity Governments, Entity Social Security Funds and those of Brčko District in the local currency. Shares and other equity comprise the equity, current year result, general and special reserves and adjustment/revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets.

Note

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH and it represents consolidation of mutual claims and liabilities among the commercial banks. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.

Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments, Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors).

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non-financial enterprises, private non-financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors). Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added.

Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment /revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006. By order of FBA in March 2010, loans to households with currency clause with one bank were reclassified, from loans in EUR to loans in KM.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

IRF – initial rate fixation

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

No data for interest rates on loans in foreign currency on the basis of credit cards and overdrafts to non-financial corporations.

 $^{^{*}}$ Interest rates in table for revolving loans and credit cards and their amounts refer to the outstending amounts.

^{...} insufficient data to be published.

Note:

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

 $No\ data\ for\ interest\ rates\ on\ loans\ in\ foreign\ currency\ on\ the\ basis\ of\ credit\ cards\ and\ overdrafts\ to\ non-financial\ corporations.$

^{*} Interest rates in table for revolving loans and credit cards and their amounts refer to the outstending amounts. IRF – initial rate fixation

^{...} insufficient data to be published

Note

From July 1st, 2016, the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10%. From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts: in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to 50% of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank.

Since May 1st, 2015, the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:

- -on the reserve requirement amount the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero,
- -on the amount of the funds exceeding the reserve requirement zero rate of compensation.

The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value.

From September 1st, 2014, the remuneration rate has been calculated on the basis of the weighted average interest rate which was earned by the Central Bank of BH on the market in the same period on deposits invested up to a month; and 70% is calculated on the amount of required reserve or minimum 0, while 90% of the mentioned rate is calculated on the amount of excess reserves or minimum 0.

From February 1st, 2011 the required reserves rate on deposits and borrowed assets with contracted term of maturity up to one year was declined from 14% to 10%, while the required reserves rate on deposits and borrowed assets with contracted term of maturity over one year is not changed. From August 1st 2011, the remuneration rate is calculated by the weighted average interest rate which were earned by the Central Bank on deposits invested up to a month in the same period; 70% of this rate is calculated on the amount of required reserves while 90% of the same rate is calculated on the amount of excess reserves.

From July 1st, 2010 remuneration rate on the amount of required reserves is changed and calculated as an average of interest rates, which were earned by the Central bank on overnight deposits in the same period, while remuneration rate on the amount of excess reserves is not changed.

From January 1st, 2009 the required reserves rate is 14% on deposits and borrowed assets with contracted term of maturity up to one year and 10% on deposits and borrowed assets with contracted term of maturity over one year. From April 1st, 2009 remuneration rate is calculated as:- On the amount of required reserves is 0,5%,- On the amount of excess reserves on the rate calculated as an average of interest rates, which were earned by the Central bank on deposits invested up to u month. From May 1st, 2009 the required reserves rate is 7% on deposits and borrowed assets with contracted term of maturity over one year.

From January 1st, 2008 required reserves rate was increased from 15% to 18%.

From October 11th, 2008 required reserves rate was declined from 18% to 14%.

*The base for calculation of required reserves includes deposits and borrowed funds in domestic (in KM and KM with the currency clause) and other currency expressed in KM.

International investment position (IIP) for BH is compiled in accordance with the latest International Monetary Fund Methodology for compilation of Balance of payments and International investment position statistics, sixth edition (BPM6). Compilation of the International investment position includes also the regular revision of previously published data for the three years backwards in accordance with most recent available source data. Shortened versions of the applied methodological approach for the compilation of BH IIP statistics are available on the CBBH website.

Criteria for presenting country is the share of export of the country in total three-year BH export (2016, 2017, 2018).

 $Thus, all \ countries \ with share \ higher \ than \ 3,0\% \ are \ separately \ presented, while \ the \ other \ countries \ are \ presented \ as \ sum \ in \ the \ column \ Other \ countries.$

Criteria for presenting country is the share of import of the country in total three-year BH import (2016, 2017, 2018).

 $Thus, all \ countries \ with share \ higher \ than \ 3,0\% \ are \ separately \ presented, while \ the \ other \ countries \ are \ presented \ as \ sum \ in \ the \ column \ Other \ countries.$
