## INTRODUCTION

The highest inflation was recorded in October in the euro area, and in BH , its main generators being rising global food and energy prices (Graphs 01 and 02). Due to high inflation, leading central banks continued to raise their benchmark interest rates (Graph 03). The growth of key ECB interest rates in October was reflected in the growth of yields on public debt markets of most euro area countries (Graph 04). Republika Srpska continued public debt issues with the same yield rate as in the previous period, while in FBH, two public debt issues were cancelled (Graph 05). The growth of liabilities of the Entity governments towards commercial banks resulted from taken measures related to adjustment of pensions and wages and payments of one-off aid to the poor, due to growing inflationary pressures (Graph 06). The recorded monthly decline of net collection of indirect tax revenues was mainly due to a strong growth of tax refunds over the observed period (Graph 07). During the first ten months of 2022, record high amounts of indirect tax revenues were collected, which has a positive impact on foreign debt repayment sustainability (Graph 08).

Industrial production was declining for the second month, with the key negative contribution to such trends, by main industrial groups, coming from energy (Graph 09). Unlike industry, retail trade increased, with leading sectors being trade in information -communication equipment and trade
in textile, clothes and footwear, and leather products (Graph 10). Import value significantly increased, mainly as a result of the price effect (Graph 11). Export growth rate was on a slow declining trend, the lowest annual growth rate over the previous nineteen months recorded in October (Graph 12). Coverage of imports by exports in trade with the CEFTA countries slightly increased in October, while this indicator had a slow declining tendency with the European Union countries since the beginning of the year (Graph 13). Foreign exchange reserves decreased at the monthly level, mainly under the impact of a negative purchase and sale balance with commercial banks (Graph 14). Decreased required reserve balances with the CBBH in October was brought about by a decrease of banks' holdings above required reserve, as the aggregate base was increasing over the observed period (Graph 15). The largest contribution to the monthly decrease of reserve money came from the decrease of deposits with monetary authorities (Graph 16). Over the observed period, deposits of both households and non-financial private companies increased, the annual growth of the total deposits remaining under a dominating effect of the growth of non-financial private companies' deposits (Graph 17). The total banks' loans increased at the monthly level, consumer non-purpose loans to households still contributing most to the monthly growth of loans of this sector (Graph 18).

G01: Annual Change of Average Consumer Prices in
Selected Countries

G02: Contribution to Annual Changes of Average Consumer Prices

## G03: Key Interest Rates of Leading Central Banks

[^0]The 10.6\% two digit inflation was seen in the euro area in October, representing its record high since the euro area establishment. Food and energy prices remained the main generators of consumer price growth, with the growth of energy price contributing $4.1 \%$ to aggregate inflation. At the annual level, food and utility prices in the euro area increased by $15.5 \%$ and $23.2 \%$, respectively.

In order to ensure the returning of inflation to medium term target of 2\%, the ECB raised its key interest rates in October. The US FED again raised the benchmark interest rates with purpose of mitigating inflationary pressure in November.

The record annual growth of average consumer prices of $17.4 \%$ was seen in October, resulting from continued strong growth of the prices of energy, food and raw materials at the global level. In the first ten months of 2022, inflation of $13.7 \%$ was recorded compared to the same period of the previous year.
The strongest impact on consumer price growth in October was made by food, transport and utility prices, with almost half of aggregate inflation related to the category of food. Food and transport prices recorded annual growth of $25.9 \%$ and $25.8 \%$ respectively, while utility costs recorded a considerable growth at the monthly level as well. Although clothes and footwear prices were on a continuing downward trends at the annual level, a price growth at the monthly level was seen in the mentioned category in October.

Due to strong inflationary pressures, many central banks were tightening their monetary policies in previous months more dynamically than expected. In September and October, the ECB raised its key interest rates by 75 basis points each, while the FED raised its rates by 75 bp in November. Another increase of key interest rates both by the FED and the ECB by 50 or 75 bp is expected in December. Following December meetings, it is expected that both mentioned central banks will wait for a longer period of time before raising interest rates again, and the ECB is likely to be under increasing pressure to start quantitative tightening. Leading central banks expect global inflationary pressures to decrease gradually, which should be also affected by the very effects of monetary policy tightening.

## G04: Yield to Maturity Rates in the Market of Ten Year Bonds

Source: BHAS
Note: The survey of five year bond issues does not include the issues in foreign markets.

G06: Liabilities and Deposits of the General Government with Commercial Banks, Monthly Changes

Yields on ten year bonds of almost all the countries in the euro area, having declined in July and August, increased in late October. The growth of the ECB benchmark interest rates from September and October by 75 bp each, was, to a lower or higher extent, reflected on all the euro area countries. Yield to maturity rates on Greek and Italian bonds recorded the highest growth, while those two countries with the highest debt levels in the euro area also recorded the highest yield rates on ten year bonds, 4.9\% and $4.5 \%$ respectively. Over the observed period, the yield rate on ten year bonds of Germany, as the largest euro area economy, amounted to $2.2 \%$, remaining, despite the increase, below the $4 \%$ level for the US ones.

In October, due to the satisfactory budget liquidity level and decreased needs for funding, the Federation of Bosnia and Herzegovina cancelled two public debt issues (one issue of bonds and one of treasury bills). Republika Srpska continued public debt issues. Five year bonds were issued at the same coupon interest rate, the same yield to maturity rate, but lower bid to cover ratio compared to the previous issue. Yield to maturity rates of Republika Srpska compared to the Federation of Bosnia and Herzegovina for the same maturity segment stayed significantly higher.

In October, government sector debt with commercial banks at the monthly level increased by KM 27.9 million, continuing its growth trend, while at the same time, deposits, after a three month long decline, increased by KM 55 million. The growth of liabilities of the Entity governments resulted from taken measures related to adjustments of pensions and wages and payments of one-off aid to the poor, due to growing inflationary pressures. In the end of October, the total liabilities of the general government sector with commercial banks amounted to KM 3.27 billion, which is an annual growth of KM 67.9 million or $2.1 \%$. The banking sector exposure to the general government sector in the end of October was $8.7 \%$ of the total banking sector assets.

G07: Monthly Changes of Indirect Taxes

In October, there was a monthly decline of net collection of indirect tax revenues, mainly due to a strong growth of tax refunds (in October, tax refunds amounted to KM 172.2 million). The amount of refunds paid to tax payors in the first ten months was higher by even KM 522.8 million (48.2\%) compared to the same period of the previous year. The main reason of a strong increase of refunds to tax payors were high growth rates of exports and imports. On the other hand, tax refunds on the basis of international aid projects in the same period were lower by KM 40.7 million (35\%) due to negative impacts of COVID-19 pandemic and the war in Ukraine. Cumulative net revenues from indirect taxes amounted to KM 6.55 billion, which was a growth of KM 861 million (15.1\%) at the annual level, mainly due to inflationary pressures.

During the first ten months of 2022, record high amounts of indirect tax revenues were collected (higher by 15.1\% compared to the same period of the previous year). As government sector foreign debt is repaid from indirect tax revenues, the mentioned growth will have a positive impact on debt repayment sustainability. The total funds in the amount of KM 780.2 million are planned for servicing general government foreign debt in 2022, which is $10.9 \%$ of projected revenues from indirect taxes for 2022. KM 74.5 million was repaid in October, which represents $10.8 \%$ in per cents of indirect tax revenues for the mentioned month.

In October, industrial production declined by 3.7\% at the annual level, with the strongest contribution of a sharp decline of $12.9 \%$ in energy, observed by the main industrial groups. In the first ten months of 2022, a slow growth of $1.8 \%$ for overall industrial production was recorded compared to the same period of the previous year. For the observed period, manufacturing industry increased by $4.7 \%$, while other activities declined. In the end of October, all activities declined at the annual level, while the sharpest annual decline of $12.4 \%$ was seen in production and supply of electric energy and gas.

## G11: Imports by the Main Product Groups, Annual Changes

G12: Exports by the Main Product Groups, Annual Changes

Source: BHAS

In October, real index of retail trade turnover increased by $10.3 \%$ compared to the same month of the previous year. The strongest impact on the total turnover increase was registered in retail trade in information-communication equipment ( $44.7 \%$ ), and retail trade in textile, clothes, footwear and leather products (38.7\%). The strongest decline at the annual level in October was recorded in retail trade outside stores, stalls and markets. In the first ten months of the current year, the total retail trade turnover real index increased by $13.7 \%$ compared to the same period of the previous year.

In October, the value of imported goods in BH reached the amount of KM 2.53 billion, which represents an annual growth of $24.8 \%$. The growth of import value remained mainly the consequence of the price effect. Imports of mineral origin products, with the dominating share of mineral fuels and oils, recorded the highest import growth rate in October and the highest share. The growth of import value of this product group was only a consequence of the growth of energy prices in the global market. Imports of machines and appliances recorded annual growth in October of 22.8\%, mainly related to quantity growth. Other import significant product groups also recorded growth, but it was much lower than in previous months.

Exports of goods from BH in October 2022 was realised in the value of KM 1.52 billion, while the recorded annual growth rate of $12.5 \%$ represents the lowest rate in the previous nineteen months. The largest share in the total exports was that of base metal exports, which recorded a modest annual growth rate of $0.5 \%$ (the lowest annual rate over the previous two years). Exports of machines and appliances recorded annual growth rate of $22.6 \%$, while the other product groups recorded much lower growth rates, mainly as a result of the price effect.

## G13: Coverage of Imports by Exports

Source: BHAS

Coverage of imports by exports from BH , speaking of commodity market, in October amounted to 60.2\%, and with small oscillations, a decline of the value of this indicator during 2022 is evident. Out of the three most significant product groups, in respect of international trade, the highest rate of coverage of imports by exports in BH was recorded in trading in base metals ( $91.4 \%$ in October), machines and appliances ( $61.1 \%$ ) and mineral origin products (28.9\%). By trade partners, coverage of imports by exports in trade with the CEFTA countries in October amounted to $89.2 \%$, significantly stimulated by exports of energy sector products and coal - mainly to Serbia. Coverage of imports by exports in trade with the EU countries in October of the current year amounted to $74.6 \%$ with the present downward trend of coverage since the beginning of the year.

In the end of October 2022, net foreign exchange reserves amounted to KM 16.25 billion, and compared to September, they decreased by KM 259 million. The monthly balance of purchase and sale with commercial banks and internal depositors was negative, amounting to KM 267 million, while KM 78.2 million was related to foreign debt repayment. At the annual level, foreign exchange reserves were higher by KM 209 million. Coverage of monetary liabilities with the CBBH foreign exchange reserves in the end of the observed period amounted to $102.82 \%$. In the period to come, other changes and expected measures of the leading central banks would influence the value of the invested foreign exchange reserves of the CBBH.

In October, for the first time after March 2022, balances in banks' reserve accounts decreased at the monthly level. Although average account balances were increasing in the third quarter of this year, exceeding the amount from the end of the previous year, their decline in late October was evident. Average required reserve balances in the end of October amounted to KM 6.85 billion. This was completely under the effect of a decrease of excess holdings above RR, as the aggregate base was increasing over the observed period. The aggregate base for required reserve calculation, in the end of October, amounted to KM 30.86 billion and it was higher than the average balance in the end of September by KM 101 million. Change of account balances was inevitably reflected in the implicit required reserve rate, which, at the system level, recorded a more considerable decrease in October.

## G16: Reserve Money and Monetary Multiplication

Source: CBBH

## G17: Annual Growth Rates of BH Banks' Deposits

Source: CBBH

## G18: Annual Growth Rates of Loans in Bosnia and Herzegovina

The strongest contribution to the monthly decrease of reserve money came from decrease of deposits with monetary authorities in the amount of KM 283.17 million, while cash with monetary authorities did not record any significant oscillations. Reserve money was higher than in the same period of last year by KM 855 million. Due to changes in reserve money and monetary aggregates recorded during October, monetary multipliers increased. The upward trend of monetary aggregate M 2 was present in October mainly under the impact of growth of other deposits in the local currency and transferable deposits in foreign currency.

In the reporting period, deposits of non-financial private companies continued to grow at high rates. On the other hand, household deposits only slightly increased at the monthly level ( $0.2 \%$ ), their annual decline still being registered for the seventh consecutive month. In maturity and foreign exchange structure of household deposits, there were no changes compared to the previous month. The monthly growth of the total deposits ( $0.7 \%$ ) was under the dominating impact of the growth of non-financial private companies' deposits (contribution of 0.5 pp ), with the growth of foreign exchange deposits of this sector being crucial. Annual growth of the total deposits (6\%) was roughly at the level of average in the first year of the pandemic.

Annual growth of lending (4.5\%) was at the semi-annual average level, staying low compared to exceptionally high inflation. At the monthly level, following three successive months of identical growth ( $0.2 \%$ ), the monthly growth of bank loans in October was $0.4 \%$. Besides household sector and sector of non-financial private companies, loans to the sector of non-financial public companies also contributed to the monthly credit growth in October. Monthly growth of loans to this sector was $7 \%$. The largest contribution to the growth of loans to household sector came from consumer non-purpose loans, but it did not significantly change the structure of loans to household sector.

## STATISTICAL APPENDIX

T01: Main Economic Indicators ..... 13
T02: Buying and Selling of KM ..... 14
T03: Foreign Reserves of CBBH ..... 15
T04: Monetary Aggregates ..... 16
T05: Monetary Survey ..... 17
T06: Balance Sheet of CBBH ..... 19
T07: Consolidated Balance Sheet of Commercial Banks in BH ..... 20
T08: Total Deposits and Loans of Commercial Banks ..... 22
T09: Structure of Deposits and Loans of Commercial Banks by Currency ..... 23
T10: Structure of Deposits with Commercial Banks by Sector ..... 24
T11: Structure of Loans of Commercial Banks by Sector ..... 25
T12: Interest Rates on Loans to Households ..... 26
T13: Interest Rates on Loans to Non-financial Corporations ..... 27
T14: Interest Rates on Deposits of Households and Non-financial Companies ..... 28
T15: Average Reserve Requirements ..... 29
T16: Industrial Production Index ..... 30
T17: Consumer Price Index for BH ..... 31
T18: BH Balance of Payments ..... 32
T19: International Investment Position (IIP) ..... 33
T20: BH Foreign Trade Balance ..... 34
T21: Exports of goods by Country of Destination ..... 35
T22: Imports of goods by Country of Origin ..... 36
T23: Average Middle Exchange Rates of KM ..... 37
T24: Foreign Debt Servicing ..... 38

## Notes applicable for tables 4, 5, 7, 8, 9, 10, 11, 12 i 13.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

The revised data for the period January 2006 - November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.

The data on the "complete" balance sheet, with the included passive sub-balance, are still available at: http://statistics.cbbh. ba:4444/Panorama/novaview/SimpleLogin_bs.aspx

In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM.

Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards applied in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred at the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, at the liabilities side: decrease of liabilities to
non-residents in the amount of KM624 million, an increase in loan loss provisions by KM 472 million and other liabilities increased by KM 7 million.

In February 2011, one bank from BH Federation reclassified deposits in the amount of around KM 80 million, from the deposits of public companies to the Entities' governments deposits, in line with the IMF recommendations.

By order of the FBH Banking Agency, in June 2010, one bank made a reclassification of about KM 300 million of claims based on securities on domestic institutional sectors to the claims on non-residents. In December 2010, the same bank made this reclassification, retroactively, in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease in other items net.

One bank from FBH made a reclassification of financial instruments in the foreign assets amounting to about KM 40 million for the period January - August 2010. Claims on non-residents based on loans were reclassified in claims on non-residents on the basis of securities, which resulted in changes in the short- term and longterm foreign assets.

By order of the Banking Agency of Republika Srpska, one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, i.e. decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively in the appropriate amounts, by months, ranging from KM 50-150 million.

According to new regulations of the RS Banking Agency, published in the Official Gazette of RS no.136/10, which have defined a new way of recording claims classified in category " E ", accounting and recording of interest on non-performing assets and calculation of general and special provisions, RS banks, in the data for December 2010 implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to KM 180 million within the capital account.

## Note:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.
Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to nonresidents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

## Note：

Since January 2019，the currency structure of financial instruments（loans，deposits，securities）presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports，being in accordance with the recommendations from the IMF and the 2016 Manual and Guide to the Compilation of Monetary and Financial Statistics．
Monetary data have been updated according to the IMF methodology（Monetary and Financial Statistics Manual，2000）from January 2006.
The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank（monetary authorities）． Deposits of commercial banks are commercial banks＇funds in accounts at the CBBH．Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors（except central government deposits）．The central government consists of BH Institutions，Entity governments，Entity Social Security Funds and those of Brčko District．Social security funds on Entity level（from Federation of BH：Pension Fund，Health Care Fund of FBH，Employment Fund of FBH，and from Republika Srpska：Pension and Disability Insurance Fund of RS，Health Care Fund of RS，Employment Fund of RS and Fund for Child Protection of RS）are classified on the central government level．
Cash outside banks is taken over from the CBBH Balance Sheet（Table 6）and represents cash in circulation outside the central bank（monetary authorities） and cash outside commercial banks．Transferable deposits in the domestic currency are taken from the Monetary Survey（Table 5）．They consist of deposits of non－central government（cantons and municipalities），deposits of public and private companies，other financial institutions and deposits of other domestic sectors（households，non－profit institutions and other unclassified sectors）．Other deposits in the domestic currency，transferable and other deposits in foreign currency are taken over from the Monetary Survey（Table 5）．They consist of deposits of non－central government（cantons and municipalities），deposits of public and private companies，other financial institutions and deposits of other domestic sectors（households，non－profit institutions and other unclassified sectors）．
Reserve money（primary money or monetary base）is entirely taken from the CBBH Balance Sheet（Table 6）．It consists of cash outside monetary authorities， deposits of commercial banks and deposits of other domestic sectors（except for deposits of the central government）with monetary authorities．According to national definition，money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors，as well deposits of local government in domestic and foreign currency．Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates．Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors（except for deposits of the central government）．Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey（Table 5）．It consists of other deposits in domestic currency，transferable and other deposits in a foreign currency of all domestic sectors（except for deposits of the central government）．Money supply M2 comprises monetary aggregates， M 1 and QM ．

## Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports, being in accordance with the recommendations from the IMF and the 2016 Manual and Guide to the Compilation of Monetary and Financial Statistics.

Monetary data updated according to the MMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006
The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH -monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. According to new methodology, Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey.

## Note:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.
Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.
Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government). Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors ( except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

## Note:

Monetary data updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006.
The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in the CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of the CBBH for the extended long-term loans and claims on commercial banks on the basis of settlement accounts.
Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the Central Bank (monetary authorities) and cash outside commercial banks.

The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Accounts 1 and 2).
Deposits of central government with the CBBH are transferable and other deposits of BH Institutions, Entity Governments, Entity Social Security Funds and those of Brčko District in the local currency. Shares and other equity comprise the equity, current year result, general and special reserves and adjustment/revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets.

## Note:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports, being in accordance with the recommendations from the IMF and the 2016 Manual and Guide to the Compilation of Monetary and Financial Statistics.
Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.
Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH and it represents consolidation of mutual claims and liabilities among the commercial banks. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to nonresidents, securities of non-residents in foreign currency, and other claims on non-residents.
Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments,Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors).

## Note：

Since January 2019，the currency structure of financial instruments（loans，deposits，securities）presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports，being in accordance with the recommendations from the IMF and the 2016 Manual and Guide to the Compilation of Monetary and Financial Statistics．

Monetary data have been updated according to the IMF methodology（Monetary and Financial Statistics Manual，2000）from January 2006.
Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions，Entity governments， Entity social security funds and those of Brčko District．Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non－central government（canton and municipality governments），public non－financial enterprises，private non－ financial enterprises，other financial institutions and other domestic sectors（households，non－profit institutions and other unclassified sectors）． Foreign liabilities of commercial banks include banks liabilities to non－residents based on transferable and other deposits，loans，securities，trade loans and advance payments and other accounts payable．According to a new methodology，loans are presented as a separate financial instrument on the side of liabilities，with which the calculated interest is added．
Shares and other equity include equity，retained earnings，current year result，general and special reserves and adjustment／revaluation．Other items（net）are unallocated items of liabilities reduced by the unallocated items of assets．Restricted deposits are also included in other items（net）．

## Note:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports, being in accordance with the recommendations from the IMF and the 2016 Manual and Guide to the Compilation of Monetary and Financial Statistics.
Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006. By order of FBA in March 2010, loans to households with currency clause with one bank were reclassified, from loans in EUR to loans in KM.

## Note:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006. Deposits of domestic institutional sectors represent liabilities of commercial banks towards all institutional sectors. Deposits on the BH level represent deposits with commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH Banja Luka.

## Note:

From July 1st, 2016, the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10\%. From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts : in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to $50 \%$ of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank.
Since May 1st, 2015, the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:
-on the reserve requirement amount - the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero, -on the amount of the funds exceeding the reserve requirement - zero rate of compensation.
The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value. From September 1st, 2014, the remuneration rate has been calculated on the basis of the weighted average interest rate which was earned by the Central Bank of BH on the market in the same period on deposits invested up to a month ; and $70 \%$ is calculated on the amount of required reserve or minimum 0 , while $90 \%$ of the mentioned rate is calculated on the amount of excess reserves or minimum 0 .
From February 1st, 2011 the required reserves rate on deposits and borrowed assets with contracted term of maturity up to one year was declined from $14 \%$ to $10 \%$,while the required reserves rate on deposits and borrowed assets with contracted term of maturity over one year is not changed. From August 1st 2011. the remuneration rate is calculated by the weighted average interest rate which were earned by the Central Bank on deposits invested up to a month in the same period; $70 \%$ of this rate is calculated on the amount of required reserves while $90 \%$ of the same rate is calculated on the amount of excess reserves.
From July 1st, 2010 remuneration rate on the amount of required reserves is changed and calculated as an average of interest rates, which were earned by the Central bank on overnight deposits in the same period, while remuneration rate on the amount of excess reserves is not changed. From January 1st, 2009 the required reserves rate is $14 \%$ on deposits and borrowed assets with contracted term of maturity up to one year and $10 \%$ on deposits and borrowed assets with contracted term of maturity over one year.From April 1st, 2009 remuneration rate is calculated as:- On the amount of required reserves is $0,5 \%$,- On the amount of excess reserves on the rate calculated as an average of interest rates, which were earned by the Central bank on deposits invested up to u month. From May 1st, 2009 the required reserves rate is $7 \%$ on deposits and borrowed assets with contracted term of maturity over one year.
From January 1st, 2008 required reserves rate was increased from $15 \%$ to $18 \%$.
From October 11th, 2008 required reserves rate was declined from $18 \%$ to $14 \%$.
*The base for calculation of required reserves includes deposits and borrowed funds in domestic (in KM and KM with the currency clause ) and other currency expressed in KM.

## Note:

International investment position (IIP) for BH is compiled in accordance with the latest International Monetary Fund Methodology for compilation of Balance of payments (BOP) and International investment position statistics, sixth edition (BPM6). Compilation of the International investment position includes also the regular revision of previously published data for the three years backwards in accordance with most recent available source data. Shortened versions of the applied methodological approach for the compilation of BH IIP statistics are available on the CBBH website.

Note:
Criteria for presenting country is the share of export of the country in total three-year BH export $(2016,2017,2018)$,
Thus, all countries with share higher than 3,0\% are separately presented, while the other countries are presented as sum in the column Other countries.

## Note:

Criteria for presenting country is the share of import of the country in total three-year BH import $(2016,2017,2018)$.
Thus, all countries with share higher than 3,0\% are separately presented, while the other countries are presented as sum in the column Other countries.
