INTRODUCTION

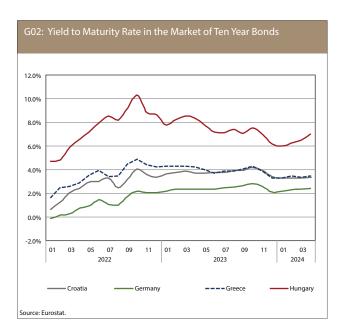

In their April address, the ECB Governing Council announced a less restrictive monetary policy, if dynamics of the achieved inflation continues to be favourable (Graph 1). Expecting the announced decline of the ECB interest rates, the upward trend of yields on ten year bonds of the euro area countries continued, with bank funding costs decreasing at the same time (Graphs 2 and 3). In April, the identical annual inflation rate was recorded in the euro area as in previous month (Graph 4). In BH, a moderate growth of average consumer prices was continued (Graph 5). A significant monthly growth of net collection of indirect tax revenues was seen in April while liabilites based on foreign debt were regularly serviced (Graphs 6 and 7). Revenues from excise duties significantly contributed to the total collection of revenues from indirect taxes in April (Graph 8).

The fourteenth successive month of growth of the total deposits in BH banks started (Graph 09). Lending dynamics has been intensive since the beginning of the year, while the interest rate on loans did not change significantly compared to the previous month (Graph 10). Compared to the previous month, foreign assets increased again mainly impacted by the increase of term deposits with non-residents and investments in securities (Graph 11). At the monthly level, the foreign exchange reserves were lower, mainly resulting from the recorded negative balance of purchase and sale with internal depositors and banks (Graph 12). The decrease of reserve money in April was significantly impacted by the decrease of bank deposits with monetary authorities, while the trend of reserve money in relation to the trend of monetary aggregates resulted in further increase of monetary multipliers (Graph 13). Although the required reserve calculation base increased, due to a significant monthly decrease of excess holdings above required reserve, balances in reserve accounts with the CBBH decreased in the reporting period (Graph 14).

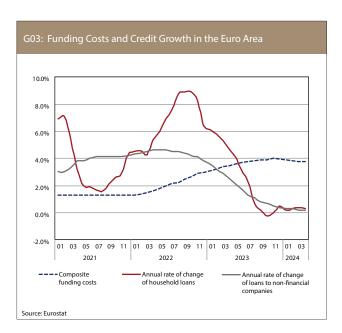

Real growth of retail trade remained very high, being at the level of the last year's average (Graph 15). Industrial output continued to record annual decline (Graph 16). For the first time after thirteen successive months, commodity exports increased, while the strongest negative change in exports was registered in electric energy sector (Graph 17). However, despite the recorded import growth, significantly higher annual import rates resulted in increase of commodity deficit (Graph 18).

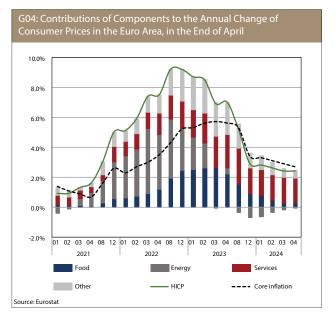

In circumstances of stagnation of annual inflation rates in the USA and the euro area, and the fall of inflation in the United Kingdom, during March and April of 2024, the FED, the ECB and the Bank of England did not change their benchmark rates. In their April address, the ECB Governing Council announced a less restrictive policy, if dynamics of the achieved inflation and the intensity of transmission continue to be favourable. The ECB continues the reinvestment of the principal of bonds due within the PEPP (Pandemic Emergency Purchase Programme) during the first half of 2024. For the second half of the year, the average monthly decrease of this programme portfolio by EUR 7.5 billion is announced, while the full ending of reinvestment is planned to take place in the end of the year. Decrease of the size of Asset Purchase Programme (APP) was progressing at the planned pace.

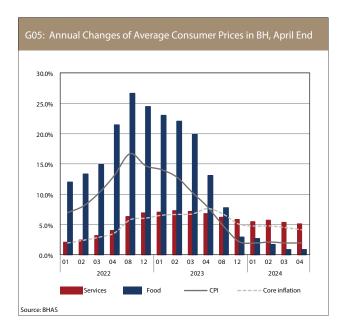

The upward trend of yield to maturity rates in the ten year bond market continued, having started in January this year. In the group of highly indebted euro area countries, the monthly growth of yields above average (12 bp) was registered in France and Greece, while over the average growth was seen in East Europe countries. The downward trend of spread in yields compared to German bonds was halted, having increased in April compared to March in most highly indebted countries of the euro area. Yield on German ten year bonds of 2.45% in April exceeded by 35 bp that in the end of the previous year.

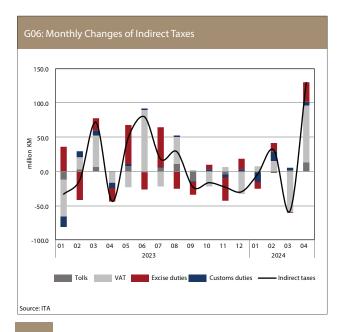

Expectations regarding a decline of the ECB benchmark interest rates were included in the composite funding costs of the euro area banks as early as since December last year, when they decreased for the first time after 23 months of continuing growth. The decline, accompanied by the lowest rates of credit growth in the current financial cycle, continued in April, confirming the expectations on the change of the ECB monetary policy direction to take place soon. The average interest rate on non-purpose consumer loans, housing loans and loans to non-financial companies of the euro area was 7.9%, 3.8% and 5% in the end of April, respectively. There are large deviations from the average value in the euro area member countries.

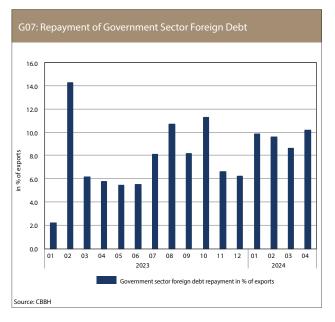

In April 2024, the identical inflation rate (2.4%) was recorded in the euro area as in March 2024. Food prices in April recorded a slightly higher annual growth rate (1.9%) compared to the growh rate from the previous month (1.7%). Yet, the recorded growth rate of food prices was lower by 13.2 pp in April compared to the same month of the previous year. The largest contribution to the overall price growth in the euro area came from the category of services, with the services recording a slightly lower price growth rate in April (3,7%), compared to the previous five months, when the identical price growth rate of 4.0% was recorded. In April, the growth rate of service prices exceeded the growth of headline and core inflation by 1.3 pp and 1.0 pp, respectively. Core inflation in the euro area was at the lowest value since January 2022, staying still higher than the overall price growth rate.

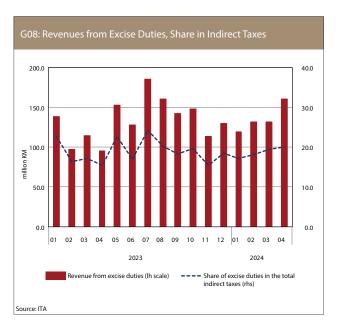

In April, a moderate growth of average consumer prices was continued, the recorded annual price growth amounting to 2%. The highest annual price growth, in April, was seeen for the categories of restaurant and hotel services (8.8%), other products and services (5.7%), and recreation and culture. Core inflation in April was 4.2%, which is still above the headline inflation rate, indicating an increasing growth of local prices. Food prices recorded an annual growth of 0.9% in April, which is lower by even 12.1 pp compared to the growth rate from the same month of the previous year. The inflation of services recorded an annual growth rate of 5.1%, which is higher by 3.1 pp compared to the headline inflation rate.

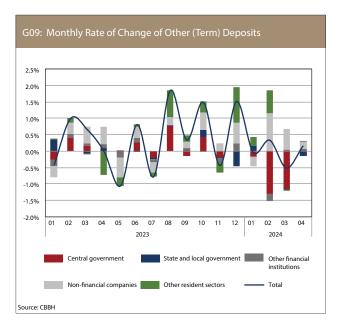

A significant monthly growth of net collection of indirect tax revenues (19.1%) was seen in April. The mentioned growth resulted mainly from the recorded imports (imports have a strong impact on the growth of collection of VAT and customs duties), but also the low base in the previous month, and also lower amounts of refunds which were lower in April by 15.4% compared to the prevous month. The monthly growth of net revenues came from all the categories of indirect taxes. The strongest monthly growth of revenues was seen for the main kind of taxes, VAT (KM 83.4 million). Cumulative net revenues from indirect taxes for the four months of the current year amounted to KM 2.91 billion, which is a growth of KM 420.5 million (16.9%) at the annual level.

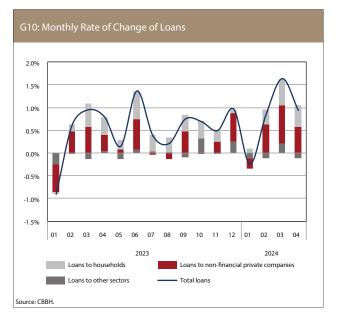

General government sector foreign debt repayment is done from indirect tax revenues. Revenues on this basis have recorded continued stable collection, so the government debt repayment, in medium-term, is stable. Also, foreign debt repayment, in per cents of exports, is within usual monthly oscillations, amounting to 10.2% of exports in April.

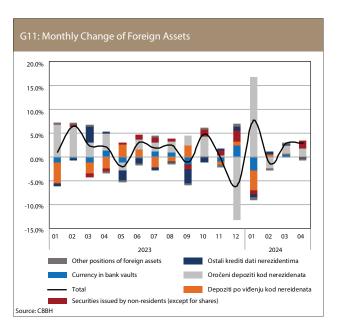

Revenues from excise duties in April increased significantly at the monthly level (21.8%). Monthly collection rates of excise duties oscillate mainly as a result of changes in the excise collection schemes due to the implementation of other excise payment regime for tobacco products, and also due to oscillation trends of retail prices of oil derivatives, where the consumption of derivaties is affected by the trends in global energy market. In the first four months, the cumulative net amount of KM 542.4 million was collected on the basis of excise duties, which is higher by KM 97.7 million or 22.0% more compared to the same period of the previous year.

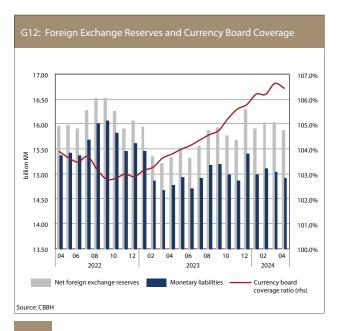

The fourteenth successive month of the total deposit growth was registered in April. For the first time after several months, contributions of the sectors of Entity governments and Cantonal governments to the total deposit growth were positive. Household sector generated most of deposit growth, while deposits of sector of non-financial companies were declining for the second successive month (after ten months of continuing growth). On the other hand, term deposits kept the slow growth tendency, mainly due to the decrease of term deposits in government sector and the stagnation of these deposits in the household sector. On the average, in the last three months, sector of non-financial companies had the largest contribution to other deposit growth. During the last four months, interest rate on term deposits did not change significantly.

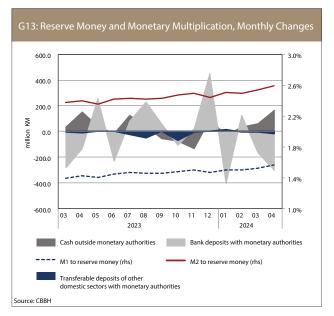

After seasonal decline in January, loans were growing by April at the average monthly rate of 0.9%, with the highest credit growth rates at the monthly level recorded in the household sector and the sector of non-financial private companies. In other sectors, the monthly net change of loans was negative. In April, credit growth was 8.4% at the annual level. Interest rate on loans did not change significantly compared to the previous month.

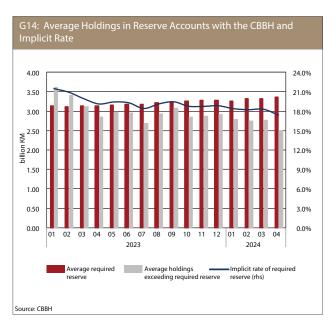

Since July 2022, when the ECB started increasing the interest rates, the share of term deposits with non-residents increased by 30 pp, while all the other balance sheet positions of foreign assets decreased. Compared to the previous month, foreign assets increased again mainly impacted by the increase of term deposits with non-residents and investments in securities. In accordance with the trends of foreign assets and foreign liabilities of banks, the registered value of net foreign assets in April was KM 4.96 billion.

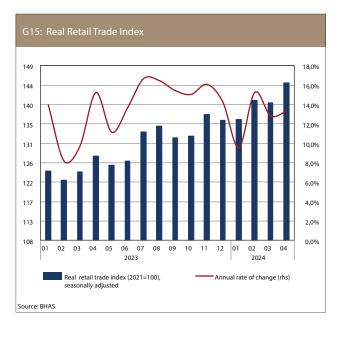

The foreign exchange reserves at April end amounted to KM 15.87 billion, being higher by KM 545 million at the annual level. At the monthly level, the foreign exchange reserves were lower by KM 160 million, mainly resulting from the recorded negative balance of purchase and sale with internal depositors and banks in the amount of KM 148.4 million. Foreign debt repayment in April accounted for KM 149.11 million. Due to the trend of monetary liabilities in relation to the recorded decrease of the foreign exchange reserves, currency board coverage ratio decreased at the monthly level, amounting to 106.42% at April end.

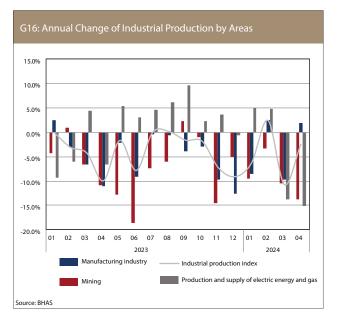

The decrease of reserve money in April was significantly impacted by the decrease of bank deposits with monetary authorities in the amount of KM 301.2 million. At the same time, cash outside monetary authorities increased by KM 163.5 million, this being insufficient to offset the recorded monthly decrease of reserve money in the amount of KM 156.9 million. Compared to the same period of the previous year, reserve money was higher by KM 118.24 million. Due to continuing growth of transferable deposits in the local currency, but also that of transferable deposits and other deposits in foreign currency, a monthly increase of monetary aggregate M2 in the amount of KM 317.8 million was seen. The recorded trend of reserve money and the trend of monetary aggregates resulted in further increase of monetary multipliers in April 2024.

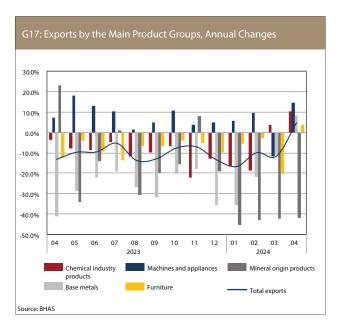

The required reserve calculation base at April end was KM 33.7 billion exceeding the balance related to the same period of the previous year by KM 2.43 billion. Due to a significant monthly decrease of excess holdings above required reserve, balances in reserve accounts with the CBBH decreased in the reporting period. According to the trends seen in reserve accounts, implicit required reserve rate decreased as well, amounting to 17.41% at April end. Remuneration rate in reserve accounts and required reserve rate did not change in the observed period.

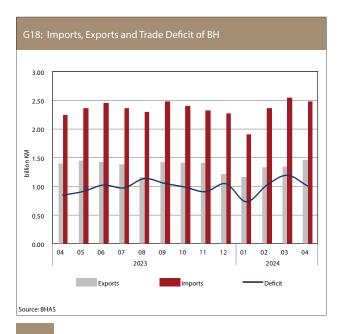

In April 2024, real retail trade index increased significantly at the annual level (13.3%). The real growth rate of trade index over the observed month was roughly equal to the average growth rate recorded for entire 2023 (13.8%), and lower than the annual growth rate for the same month of the previous year by 1.95 pp. The highest annual growth was recorded for retail sale of textiles, clothing, footwear and leather goods (29.2%), retail trade not in stores, stalls and markets (27.6%), and retail sale of sporting equipment, games and toys (25.8%). In April, retail sale of books, newspapers, music and video recordings saw a strong annual decline of 23.6%.

Industrial output, in April 2024, recorded annual decline of 2.4%, resulting from decreased production output in mining (13.7%) and production and supply of electric energy and gas (15.2%).On the other hand, manufacturing industry in April recorded annual growth of 2.0%. Observing the most significant areas within manufacturing industry, production of food products in April saw the highest annual growth (13.0%). On the other hand, production of base metals and production of furniture recorded a significant annual decline of 13.5% and 12.9%, respectively. During the first four months of the current year, compared to the same period of the previous year, industrial output declined by 4,4%.

Exports of goods from BH in April 2024 recorded annual increase of the value of 4.9%, for the first time after thirteen months. The growth of the value of commodity exports resulted from the growth of exports of the most significant export groups. Machines and appliances recorded annual growth of the value of exports by 11.9%, chemical products by 10.4%, base metals by 8.3% and furniture by 3.6%. On the other hand, exports of mineral origin products, mainly electric energy, recorded annual decline of the value of 41.9%, mainly as a consequence of decline of prices in international market, and also decreased demand.

Foreign trade commodity deficit of BH in April 2024 amounted to KM 1.01 billion representing an increase of 18.6% at the annual level. The deficit growth is a consequence of BH position as a net importer in international commodity market and also significantly higher annual growth rates of imports (10.1%) compared to exports of goods (4.9%). Coverage of imports by exports in the reporting month was 59.2%. The largest part of commodity deficit (KM 406.0 million) was recorded in international trade with the EU, our most significant trade partner, while the deficit in trade with the CEFTA countries amounted to KM 42.9 million. Coverage of imports by exports in the trade with the EU and the CEFTA countries in April was 72.5% and 84.9%, respectively.

STATISTICAL APPENDIX

| T01: Main Economic Indicators | 13 |
|---|----|

Note: Brief notes on methodology can be found below each table, while more detailed ones are available at www.cbbh.ba

Notes applicable for tables 4, 5, 7, 8, 9, 10, 11, 12 i 13.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

The revised data for the period January 2006 – November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.

The data on the "complete" balance sheet, with the included passive sub-balance, are still available at: http://statistics.cbbh. ba:4444/Panorama/novaview/SimpleLogin_bs.aspx

In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM.

Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards applied in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred at the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, at the liabilities side: decrease of liabilities to non-residents in the amount of KM624 million, an increase in loan loss provisions by KM 472 million and other liabilities increased by KM 7 million.

In February 2011, one bank from BH Federation reclassified deposits in the amount of around KM 80 million, from the deposits of public companies to the Entities' governments deposits, in line with the IMF recommendations.

By order of the FBH Banking Agency, in June 2010, one bank made a reclassification of about KM 300 million of claims based on securities on domestic institutional sectors to the claims on non-residents. In December 2010, the same bank made this reclassification, retroactively, in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease in other items net.

One bank from FBH made a reclassification of financial instruments in the foreign assets amounting to about KM 40 million for the period January - August 2010. Claims on non-residents based on loans were reclassified in claims on non-residents on the basis of securities, which resulted in changes in the short- term and long- term foreign assets.

By order of the Banking Agency of Republika Srpska one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, .i.e.. the decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively, in the appropriate amounts, by months, ranging from 50 - 150 million KM.

In accordance with new regulations of the RS Banking Agency, published in the Official Gazette of RS, no.136/10, which has regulated a new manner of recording receivables classified in category "E", accounting and bookkeeping of interest on non-performing assets and calculation of general and special provisions, RS banks, in the data for December 2010, implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of about KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to about KM 180 million within the capital account.

Notes:

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.

Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non- central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).

Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M1 and QM.

Monetary data updated according to the MMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006

The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH -monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. According to new methodology, Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey.

Notes:

Revised data for period December 2023 - February 2024.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government). Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are $presented \ as \ separate financial \ instruments \ on the \ side \ of \ liabilities \ (with \ which \ the \ calculated \ interest \ is \ added), \ and \ also \ shares \ and \ other \ equity.$ Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

Monetary data updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006.

The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in the CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of the CBBH for the extended long-term loans and claims on commercial banks on the basis of settlement accounts.

Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the Central Bank (monetary authorities) and cash outside commercial banks.

The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Accounts 1 and 2).

Deposits of central government with the CBBH are transferable and other deposits of BH Institutions, Entity Governments, Entity Social Security Funds and those of Brčko District in the local currency. Shares and other equity comprise the equity, current

Note:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH and it represents consolidation of mutual claims and liabilities among the commercial banks. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.

Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments, Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors).

Revised data for period December 2023 - February 2024.

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non-financial enterprises, private non-financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors). Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added.

Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment /revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

By order of FBA in March 2010, loans to households with currency clause with one bank were reclassified, from loans in EUR to loans in KM.

Notes:

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

 $No \ data \ for interest \ rates \ on \ loans \ in \ for eign \ currency \ on \ the \ basis \ of \ credit \ cards \ and \ overdrafts \ to \ non-financial \ corporations.$

^{*} Interest rates in table for revolving loans and credit cards and their amounts refer to the outstending amounts.

IRF – initial rate fixation

From July 1st, 2016, the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10%. From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts: in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to 50% of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank. Since May 1st, 2015, the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:

-on the reserve requirement amount – the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero, -on the amount of the funds exceeding the reserve requirement – zero rate of compensation.

The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value. From September 1st, 2014, the remuneration rate has been calculated on the basis of the weighted average interest rate which was earned by the Central Bank of BH on the market in the same period on deposits invested up to a month; and 70% is calculated on the amount of required reserve or minimum 0, while 90% of the mentioned rate is calculated on the amount of excess reserves or minimum 0.

From February 1st, 2011 the required reserves rate on deposits and borrowed assets with contracted term of maturity up to one year was declined from 14% to 10%, while the required reserves rate on deposits and borrowed assets with contracted term of maturity over one year is not changed. From August 1st 2011, the remuneration rate is calculated by the weighted average interest rate which were earned by the Central Bank on deposits invested up to a month in the same period; 70% of this rate is calculated on the amount of required reserves while 90% of the same rate is calculated on the amount of excess reserves.

From July 1st, 2010 remuneration rate on the amount of required reserves is changed and calculated as an average of interest rates, which were earned by the Central bank on overnight deposits in the same period, while remuneration rate on the amount of excess reserves is not changed. From January 1st, 2009 the required reserves rate is 14% on deposits and borrowed assets with contracted term of maturity up to one year and 10% on deposits and borrowed assets with contracted term of maturity over one year.

From April 1st, 2009 remuneration rate is calculated as:- On the amount of required reserves is 0,5%,- On the amount of excess reserves on the rate calculated as an average of interest rates, which were earned by the Central bank on deposits invested up to u month. From May 1st, 2009 the required reserves rate is 7% on deposits and borrowed assets with contracted term of maturity over one year.

From January 1st, 2008 required reserves rate was increased from 15% to 18%.

From October 11th, 2008 required reserves rate was declined from 18% to 14%.

*The base for calculation of required reserves includes deposits and borrowed funds in domestic (in KM and KM with the currency clause) and other currency expressed in KM.

International investment position (IIP) for BH is compiled in accordance with the latest International Monetary Fund Methodology for compilation of Balance of payments (BOP) and International investment position statistics, sixth edition (BPM6). Compilation of the International investment position for the fourth quarter includes the regular revision of previously published data for current year in accordance with most recent available source data. Shortened versions of the applied methodological approach for the compilation of BH IIP statistics are available on the CBBH website.
