## INTRODUCTION

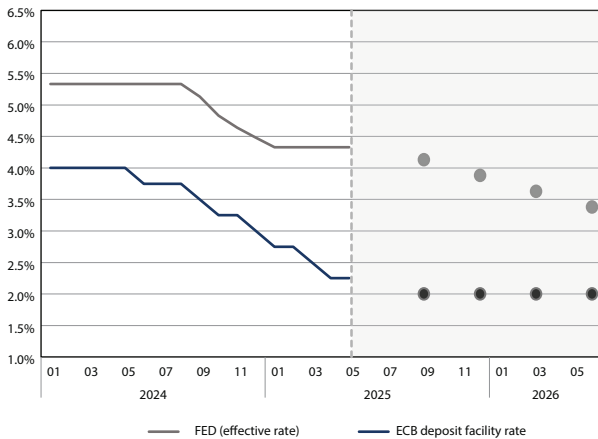

In May, benchmark interest rates of the ECB remained at the April level, while at the same time, a gradual decline of core and headline inflation in the euro area continued (Graphs 01 and 02). In the same month, yields to maturity were stagnating on long-term bonds of the EU countries (Graph 03). According to foreign exchange market trends, KM appreciated in April, measured by the nominal effective exchange rate, resulting from the strengthening of the euro, the peg currency (Graph 04). In May, inflation accelerated in BH, the price growth being mainly stimulated by rising prices of food, electric energy and services, also the effect of the minimum wage increase on the prices in service sector (Graph 05). Regarding real sector, after four successive months of annual decline, a slow increase of real retail trade index was seen in May (Graph 06). At the same time, decline of overall industrial production continued, accompanied by strong decreases in energy sector and mining, while manufacturing industry saw a slow recovery, mainly due to base effect (Graph 07). Foreign trade recorded positive trend, with the strong growth of exports of mineral origin products bringing about a significant annual increase of the total exports, while imports of goods recorded a moderate growth, mainly in the categories of food products, means of transport and base metals (Graphs 08 and 09).

In banking sector, a stable monthly growth of loans was continued while the interest rates remained at roughly the same level as in April (Graph10). At the same time, the total deposits slowly increased, with the strongest contributions of households and private companies (Graph 11). Monthly and annual increases of net liabilities of general government sector towards commercial banks were seen, accompanied by almost unchanged bank exposure to this sector in respect of the share in the total assets (Graph 12). In May 2025, both Bosnia and Herzegovina Entities issued bonds with the maturities of 5, 7 and 10 years (Graph 13).

Regarding fiscal revenues, there was a slight decline of monthly net collection of indirect taxes, with the strongest negative contribution coming from decreased revenues from excise duties (Graph 14). Yet, stable overall collection of indirect tax revenues made possible the undisturbed repayment of BH foreign debt (Graph 15).

The CBBH net foreign exchange reserves recorded a slow decline on monthly basis, while the ratio of currency board coverage stayed on upward trend (Graph 16). The growth of the base for required reserve calculation and slow growth of bank deposits with the CBBH brought about a slow monthly growth of excess holdings above the required reserve (Graph 17). The decline of reserve money at the monthly level and the growth of most other components of monetary aggregates resulted in the growth of monetary multipliers over the observed period (Graph 18).

## G01: Benchmark Rates of Leading Central Banks

Source: ECB, FED, Erste Group Research

Note: Since June 2025, the data refer to the projections of key interest rates of the selected central banks.

According to expectations, the Governing Council of the ECB kept the ECB benchmark interest rates unchanged in May 2025 after the decrease in April. By the end of the second quarter of 2025, further decrease by 25 basis points is expected to the level considered neutral from the view of monetary policy tightening. The Federal Open Market Committee of the US FED in May 2025 decided to keep the key interest rates unchanged. Future decisions on interest rates will largely depend on further development of economic indicators and inflation trends in a challenging economic environment.

## G02: Contributions of Components to the Annual Change of Consumer Prices in the Euro Area

Source: Eurostat

In May, the annual inflation rate of 1.9% was recorded in the euro area, which is lower by 0.3 pp compared to April, mainly resulting from the slowdown of inflation of services. The prices of services recorded annual growth of 3.2%, representing the lowest price growth rate in this category since the beginning of 2022. Therefore, core inflation also recorded the lowest rate (2.3%) since the beginning of the year, staying still higher than the headline inflation rate. The largest contribution to price growth in the euro area came from the category of services, currently accounting for 45.6% of household spending in the euro area. Energy prices recorded an identical decline rate as in the previous month (-3.6%), mainly due to the base effect, while food prices recorded a slightly higher rate of annual growth (3.2%), compared to April.

## G03: Yield to Maturity Rates in the Primary Market of the EU Countries' Ten-Year Bonds

Source: Eurostat

Since the beginning of the year, the spread in relation to yields on German sovereign bonds slightly decreased in larger and highly indebted economies of the euro area. Although public debt is high in most EU countries, so the probability of a stronger economic growth is still low, there was no strong pressure on the growth of long-term interest rates. The highest long-term interest rates are still recorded by the EU countries outside the euro area, resulting from higher risk premiums and more unstable inflation expectations. In May, yields on ten-year bonds in most EU countries either stagnated or recorded a slow growth.

G04: Annual Changes of the Foreign Exchange Rate

Source: BHAS

In April 2025, nominal effective exchange rate appreciated by 1.5% compared to the same month of the previous year. The appreciation of NEER was mainly caused by the trend of EUR, our peg currency, against the currencies of the most significant trading partner countries, with KM appreciating in relation to Turkish lira (26.1%), Chinese yuan (6.5%) and US dollar (6.1%), while depreciating in relation to Swiss franc (4.1%) and Polish zloty (3.0%). Despite a slightly lower inflation rate in BH in April (3.4%) compared to the main trading partner countries, real effective exchange rate, with consumer price index used as a deflator, recorded annual appreciation of 1.1%, mainly resulting from nominal appreciation of KM.

G05: Annual Changes of Average Consumer Prices in BH

Source: BHAS

Note: Core inflation and inflation of services are estimates by the CBBH.

In May 2025, the annual growth of average consumer prices was 3.7%, which is higher by 1.7 pp compared to May 2024. Headline inflation was increasing in May mainly due to a strong growth of prices of food and non-alcohol beverages (the annual growth of 9.9%). In addition, a considerable annual price growth in May was recorded for the category of health services (6.4%), and restaurant and hotel services (6.2%). Inflation growth was also brought about by the growth of electric energy prices, and also a strong growth of average real wages after the minimum wage increase, and its spillover to the growth of service prices. Monthly changes in the levels of the headline and estimated core inflation and inflation in the sector of services are quite equal, also indicating that the growth of electric energy prices and minimum wage had inflation effect, especially in service activities.

G06: Real Retail Trade Index

Source: BHAS

Following the four successive months when annual decline of real retail trade index was recorded, a slow annual growth of 1.0% was recorded in May. Trade in food products reached annual growth of 0.2%, while trade in non-food products recorded annual decline of 0.1%. The highest annual growth was recorded for the activities of retail sale of furniture, lighting equipment and electric appliances for households (35.8%) and retail trade of other household equipment (14.6%). On the other hand, the strongest annual decline in May was recorded in the activities of retail trade outside shops, stalls and markets (9.1%), and retail trade in food, beverages and tobacco products (7.9%).

G07: Annual Changes of Industrial Output by Areas, Source Indices

Source: BHAS

In May 2025, industrial output continued its annual decline (2.0%), for the sixth successive month. The strongest annual decline was recorded for production and supply of electric energy and gas (17.5%), and for mining (7.0%). On the other hand, manufacturing industry recorded annual growth (2.2%), for the first time after six months, mainly due to base effect. Within manufacturing industry, majority of the most significant industries recorded annual growth of output in May, except for the production of rubber products and other non-metal mineral products which recorded annual decline. By the main groups, durable consumer goods recorded a strong annual decline in May (28.1%), while capital products recorded annual growth (21.0%).

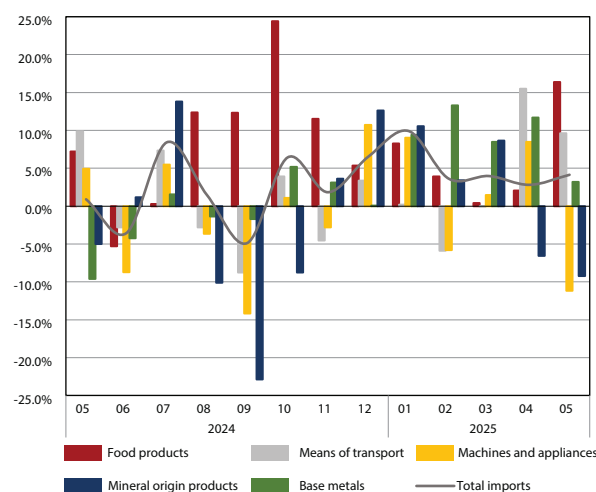

G08: Exports by the Main Product Groups, Annual Changes

Source: BHAS

Exports of goods from BH in May 2025 reached the value of KM 1.45 billion, representing annual growth of 9.9%. The high annual growth rate is mainly the result of base effect due to low values from the same month of the previous year. The highest annual growth of export value was recorded for the exports of mineral origin products (73.5%), out of it, the largest part was related to the exports of electric energy, and mainly resulting from low values in the base period. Also, the exports of machines and appliances recorded annual growth of 3.9%, furniture 3.7% and base metals 0.3%, while the exports of chemical industry products recorded annual decline of 7.3%. In cumulative terms, exports of goods in the first five months recorded annual growth of 6.4%.

G09: Imports by the Main Product Groups, Annual Changes

Source: BHAS

The value of imported goods in BH in May of this year amounted to KM 2.49 billion, representing annual growth of 4.2%. The annual growth of import value resulted from the increased value of imports of food products (16.4%), means of transport (9.6%) and base metals (3.2%). On the other hand, imports of machines and appliances, and products of mineral origin (mainly oil and oil derivatives) recorded annual decline of 11.2% and 9.2%, respectively. In the period January - May of this year, imports of goods increased by 4.7% compared to the same period of the previous year, mainly caused by the high growth recorded in January.

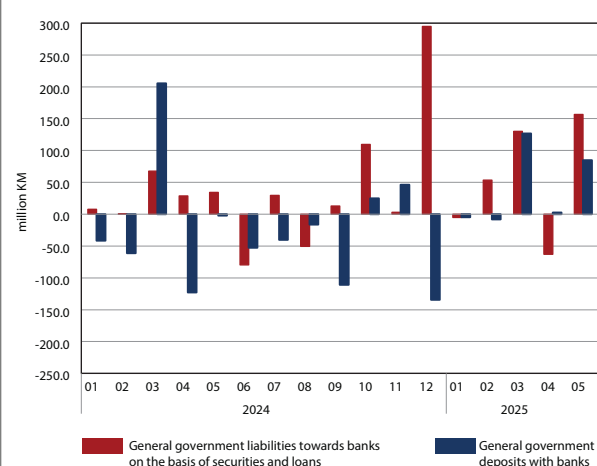

**G10: Interest Rates on Loans and Contribution to the Annual Change of the Total Loans**

The total loan balance in May increased by 1% compared to April, while the annual growth rate amounted to 10.1%, which is in line with the average for the first five months of 2025. The interest rates on loans to households in May remained at the April level, while a small decline was seen in those for loans to non-financial companies. The average weighted interest rate was 5.4% for loans to households, and 4.45% for loans to non-financial companies. Similar to April, the monthly growth of the total credit portfolio was mainly a result of growth of loans to households and loans to private non-financial companies.

**G11: Contributions to the Annual Change of the Total Deposits and Interest Rates on Newly Contracted Deposits**

Annual deposit growth in May remained stable and rather high, with pace and structure similar to those from earlier months. The annual growth rate amounted to 7.6%, which is roughly at the level of the average achieved during the previous year.

Unlike April, when there were no significant changes, the interest rates on household deposits increased in May, while the rates on non-financial companies' deposits decreased by roughly 30 basis points.

**G12: Liabilities and Deposits of General Government with Commercial Banks, Monthly Changes**

In May, a monthly increase of general government liabilities towards commercial banks amounted to KM 156.7 million. At the end of May, the total liabilities of general government sector towards commercial banks amounted to KM 4.15 billion, which is annual growth of KM 592.0 million or 16.7%. At the same time, monthly growth of general government deposits was also recorded in the amount of KM 84.8 million.

Banking sector exposure to general government sector did not change significantly compared to the previous period, amounting to 9.1% of the total banking sector assets at the end of May.

G13: Primary Market of Ten-Year Bonds of Republika Srpska

Source: www.blberza.com

Note: Dates of auctions are noted, while bid to cover ratio is a ratio of the realised and planned amounts of the issue

In May, the Entities in Bosnia and Herzegovina issued bonds with maturities of 5, 7 and 10 years, and all the issues were successful. Republika Srpska, in addition to the regular issue of five-year bonds, issued ten-year bonds for the first time after two and half years, with the average yield to maturity rate of 5.95%. Yield rate on five-year bonds remained at the level from the previous two issues amounting to 5.5%. Demand for the issue exceeded by more than two times the planned amount of KM 50 million, so the total of KM 110 million was issued.

In the market of seven-year bonds of the Federation of Bosnia and Herzegovina, the received bids were higher by almost three times than the planned issue amount, so the realised yield to maturity rate amounted to 3.15%.

G14: Monthly Changes of Indirect Taxes

Source: ITA

During the first five months of 2025, a stable collection of indirect taxes revenues was recorded at the monthly level. In May, a slight monthly decline of net collection of indirect revenues was seen (2.5%), mainly due to a higher base from the previous month, but also because of significant payments of VAT refunds, amounting to KM 183.2 million in May. The largest monthly decline of net revenues came from the net collection of revenues from excise duties (KM 11.8 million). Cumulative net revenues from indirect taxes in the first five months amounted to KM 3.79 billion, representing the growth of KM 167.8 million (4.6%) at the annual level.

G15: Foreign Debt Repayment

Source: CBBH, ITA

Stable collection of indirect tax revenues in nominal amounts was continued, both at the monthly and annual levels. Stable collection of indirect tax revenues ensures the sustainability of foreign debt repayment. In the five months of the current year, KM 587.7 million was allocated for servicing foreign debt of general government sector, representing 15.5% of the total amount of revenues from indirect taxes collected in the first five months of the current year. In May, KM 82.0 million was repaid, which is 10.5% in per cents of indirect tax revenues for the mentioned month.

G16: The Foreign Exchange Reserves and Currency Board Coverage

Source: CBBH

The foreign exchange reserve balance at the end of May 2025 amounted to KM 16.93 billion. Compared to the same month of the previous year, the net foreign exchange reserves were higher by KM 1.16 billion. In May 2025, the foreign exchange reserves recorded the monthly decline by KM 149.9 million, mainly resulting from a negative balance of KM purchase of sale with banks in the amount of KM 168.4 million. BH foreign debt repayment in May 2025 was KM 82 million, out of it 53.3 million was related to the principal, while KM 28.3 million was related to interest payment. Despite the decrease of the foreign exchange reserves in May 2025, a stronger relative decline of monetary liabilities brought about the increase of currency board coverage ratio by 23 basis points at the monthly level. At the end of May, the currency board coverage ratio was 110.50%

G17: Average Holdings in Reserve Accounts with the CBBH and the Implicit Required Reserve Rate

Source: CBBH

Base for required reserve calculation at the end of May 2025 amounted to KM 36.62 billion, being higher compared to the balance in the same period of the previous year by KM 2.81 billion. Compared to the end of April 2025, base for required reserve calculation increased by KM 404.5 million. According to the recorded trends in reserve account and base for required reserve calculation, the monthly growth of excess holdings above required reserve was recorded in the amount of KM 18.2 million. The implicit required reserve rate at the end of May amounted to 15.44%. Remuneration rate calculated in reserve accounts with the CBBH and also required reserve rate were not changed in the observed period.

G18: Reserve Money and Monetary Multiplication, Monthly Changes

Source: CBBH

In May 2025, decrease of reserve money amounted to KM 181.2 million at the monthly level, which was mainly caused by a decline of bank deposits with monetary authorities of KM 190 million. In the same month, cash outside monetary authorities increased by KM 25.2 million. Compared to the same period of the previous year, reserve money increased by KM 632.6 million. Growth was seen in all categories of deposits except in the category of other deposits in foreign currency which brought about a slight monthly increase of monetary aggregate M2 in the amount of KM 58.6 million. The recorded trend of reserve money and trends of monetary aggregates resulted in increase of monetary multipliers, amounting to 2.71 and 1.67 at the end of May for M2 and M1 respectively.

## Notes applicable for tables 4, 5, 7, 8, 9, 10, 11, 12 i 13.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

The revised data for the period January 2006 – November 2015 are based on the active sub-balance of the banks with majority state owned capital from the Federation of BH, with the passive sub-balance excluded. Through such supplement of statistics, the users are provided with higher analytical usefulness of data and objective indicators on the current operations of banks in BH. Passive sub-balance includes the liabilities based on foreign loans and old foreign exchange savings of citizens until 31 March 1992 and it does not reflect the current operations of the bank, so this sub-balance in the privatization process will be taken over by the Ministry of Finance of FBH according to the Law on Initial Balance Sheets of Banks and the Law on Privatization, as it has been done for the previously privatized banks. The performed revision mainly influenced the decrease of loans to public companies in a foreign currency, decrease of foreign liabilities, decrease of other items of assets and liabilities on the basis of old foreign exchange savings, and in considerably lower amounts, on items of loans to the Entity Government, fixed assets, non-residents' deposits, shares and capital.

The data on the „complete“ balance sheet, with the included passive sub-balance, are still available at: [http://statistics.cbbh.ba:4444/Panorama/novaview/SimpleLogin\\_bs.aspx](http://statistics.cbbh.ba:4444/Panorama/novaview/SimpleLogin_bs.aspx)

In November 2014, two banks have realized the sale and transfer of part of the loan portfolio which resulted with increase in reserves with monetary authorities in the amount of 64 million KM and a decrease in the following items: claims of non-financial private enterprises 260 million KM, foreign liabilities 101 million KM and other items (net) 95 million KM.

Due to the application of International Accounting Standards (IAS) and the International Financial Reporting Standards applied in BH Federation banks and the transfer of money flows in December 2011 data, the following changes have occurred at the assets side: decrease of loans by KM 155 million, an increase in other assets by KM 10 million, at the liabilities side: decrease of liabilities to non-residents in the amount of KM 624 million, an increase in loan loss provisions by KM 472 million and other liabilities increased by KM 7 million.

In February 2011, one bank from BH Federation reclassified deposits in the amount of around KM 80 million, from the deposits of public companies to the Entities' governments deposits, in line with the IMF recommendations.

By order of the FBH Banking Agency, in June 2010, one bank made a reclassification of about KM 300 million of claims based on securities on domestic institutional sectors to the claims on non-residents. In December 2010, the same bank made this reclassification, retroactively, in the respective amounts for the period from August 2009 when the error occurred, until May 2010. The above reclassification was reflected in the increase in foreign assets and decrease in other items net.

One bank from FBH made a reclassification of financial instruments in the foreign assets amounting to about KM 40 million for the period January - August 2010. Claims on non-residents based on loans were reclassified in claims on non-residents on the basis of securities, which resulted in changes in the short- term and long- term foreign assets.

By order of the Banking Agency of Republika Srpska one bank made a reclassification of financial instruments on the liabilities side, for the period of September 2008 - November 2010, .i.e.. the decrease in time and savings deposits of non-bank financial institutions and government sector, and the increase in loans from the same sectors, respectively, in the appropriate amounts, by months, ranging from 50 - 150 million KM.

In accordance with new regulations of the RS Banking Agency, published in the Official Gazette of RS, no.136/10, which has regulated a new manner of recording receivables classified in category "E", accounting and bookkeeping of interest on non-performing assets and calculation of general and special provisions, RS banks, in the data for December 2010, implemented the mentioned regulations, by transferring these items from off-balance records into balance sheet. The correction was reflected on the assets side, as increase of loans in the amount of about KM 144 million, and increase of due interest in the amount of KM 36 million, and on the liabilities side, as increase in provisions for loan losses amounting to about KM 180 million within the capital account.

**Notes:**

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Gross foreign reserves consist of balance sheet positions of short-term foreign assets of the CBBH (gold, CBBH SDR holdings, foreign exchange in the CBBH vault, transferable deposits in foreign currency with non-resident banks and other) and investment in securities according to the CBBH Investment Committee Decision from July 2006. Net foreign reserves represent a difference between gross foreign reserves and liabilities to non-residents. Monetary liabilities of the CBBH include money outside monetary authorities and deposits of residents with monetary authorities. Net foreign assets of CBBH represent a difference between net foreign exchange reserves and monetary liabilities of the CBBH.

**Notes:**

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

The currency outside monetary authorities is taken from the CBBH Balance Sheet and it consists of cash outside the central bank (monetary authorities). Deposits of commercial banks are commercial banks' funds in accounts at the CBBH. Transferable deposits of other domestic sectors with monetary authorities are deposits of other domestic sectors (except central government deposits). The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. Social security funds on Entity level (from Federation of BH: Pension Fund, Health Care Fund of FBH, Employment Fund of FBH, and from Republika Srpska: Pension and Disability Insurance Fund of RS, Health Care Fund of RS, Employment Fund of RS and Fund for Child Protection of RS) are classified on the central government level.

Cash outside banks is taken over from the CBBH Balance Sheet (Table 6) and represents cash in circulation outside the central bank (monetary authorities) and cash outside commercial banks. Transferable deposits in the domestic currency are taken from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors). Other deposits in the domestic currency, transferable and other deposits in foreign currency are taken over from the Monetary Survey (Table 5). They consist of deposits of non-central government (cantons and municipalities), deposits of public and private companies, other financial institutions and deposits of other domestic sectors (households, non-profit institutions and other unclassified sectors).

Reserve money (primary money or monetary base) is entirely taken from the CBBH Balance Sheet (Table 6). It consists of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for deposits of the central government) with monetary authorities. According to national definition, money supply comprises all transferable and other deposits of domestic nonbank and nongovernment sectors, as well deposits of local government in domestic and foreign currency. Deposits of entity Social Security Funds are included into the central government on Entity level and by that they are excluded from money supply or monetary aggregates. Monetary aggregate M1 comprises cash outside banks and transferable deposits in domestic currency of all domestic sectors (except for deposits of the central government). Monetary aggregate QM is defined in the same way as the corresponding item in the Monetary Survey (Table 5). It consists of other deposits in domestic currency, transferable and other deposits in a foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, M1 and QM.

## Notes:

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data updated according to the MMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006

The Monetary Survey presents the consolidated data from the Balance Sheet of CBBH - monetary authorities (Table 6) and the Consolidated Balance Sheet of Commercial Banks of Bosnia and Herzegovina (Table 7). Foreign assets (net) represent the difference between total foreign assets of the CBBH - monetary authorities and commercial banks of BH and total foreign liabilities of the CBBH -monetary authorities and commercial banks of BH. Domestic loans represent commercial banks' claims on all domestic sectors, but it should be noted that claims on central government are presented in net amounts, i.e. they are reduced by the deposits of central government with the CBBH and with BH commercial banks. The central government consists of BH Institutions, Entity governments, Entity Social Security Funds and those of Brčko District. According to new methodology, Social Security Funds are classified on the central government level as Entities' off-budget funds, which has a direct impact on the data about net claims on the central government in Monetary Survey.

**Notes:**

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Money M1 comprises currency outside banks, transferable deposits in the domestic currency of all domestic sectors (except for deposits of central government). Quasi money QM comprises other deposits in the domestic currency, transferable and other deposits in foreign currency of all domestic sectors (except for deposits of the central government). Money supply M2 comprises monetary aggregates, money M1 and quasi money QM. Other liabilities include securities, loans, shares and other equity and other items (net). According to a new methodology, loans are presented as separate financial instruments on the side of liabilities (with which the calculated interest is added), and also shares and other equity. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Other items (net) also comprise restricted deposits, counter-items of funds and government lending funds.

**Note:**

Monetary data updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000), from January 2006.

The CBBH (monetary authorities) foreign assets comprise gold, foreign currency in the CBBH vault, foreign currency deposits with foreign banks, SDR holdings, foreign securities and other. Claims on domestic sectors consist of claims on employees of the CBBH for the extended long-term loans and claims on commercial banks on the basis of settlement accounts.

Reserve money (primary money or monetary base) is comprised of cash outside monetary authorities, deposits of commercial banks and deposits of other domestic sectors (except for the central government) with monetary authorities. Cash outside banks represents cash in circulation outside the Central Bank (monetary authorities) and cash outside commercial banks.

The CBBH foreign liabilities are comprised of short-term liabilities towards non-residents, deposits of non-residents and other short-term liabilities towards non-residents and liabilities towards the IMF (Accounts 1 and 2).

Deposits of central government with the CBBH are transferable and other deposits of BH Institutions, Entity Governments, Entity Social Security Funds and those of Brčko District in the local currency. Shares and other equity comprise the equity, current year result, general and special reserves and adjustment/revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets.

**Note:**

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Consolidated balance sheet of commercial banks includes consolidated balance sheets of commercial banks covered by Main Unit Sarajevo, Main Unit Mostar and Main Bank of Republika Srpska CBBH and it represents consolidation of mutual claims and liabilities among the commercial banks. Banks' reserves consist of cash in the banks' vaults and banks' deposits with the Central Bank of Bosnia and Herzegovina. Foreign assets of commercial banks include: foreign currency in the vaults, transferable and other deposits with non-residents in foreign currency, loans to non-residents, securities of non-residents in foreign currency, and other claims on non-residents.

Claims on general government include claims on all levels of government: the central government (BH Institutions, Entity governments, Entity social security funds and Brčko District) and non-central governments (canton and municipality governments). Claims on other domestic sectors include claims on public non-financial enterprises, private non-financial enterprises, other financial institutions and claims on other domestic sectors (households, non-profit institutions and other unclassified sectors).

**Notes:**

Since January 2019, the currency structure of financial instruments (loans, deposits, securities) presented originally in KM and indexed in foreign currency has been reclassified from local currency positions to foreign currency positions in monetary statistics reports.

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Central government deposits include transferable and other deposits in domestic and foreign currency of BH Institutions, Entity governments, Entity social security funds and those of Brčko District. Transferable and other deposits of other domestic sectors in domestic and foreign currency represent banks liabilities towards non-central government (canton and municipality governments), public non-financial enterprises, private non-financial enterprises, other financial institutions and other domestic sectors (households, non-profit institutions and other unclassified sectors). Foreign liabilities of commercial banks include banks liabilities to non-residents based on transferable and other deposits, loans, securities, trade loans and advance payments and other accounts payable. According to a new methodology, loans are presented as a separate financial instrument on the side of liabilities, with which the calculated interest is added.

Shares and other equity include equity, retained earnings, current year result, general and special reserves and adjustment /revaluation. Other items (net) are unallocated items of liabilities reduced by the unallocated items of assets. Restricted deposits are also included in other items (net).

**Notes:**

Monetary data have been updated according to the IMF methodology (Monetary and Financial Statistics Manual, 2000) from January 2006.

Total deposits represent liabilities of commercial banks of BH towards all domestic institutional sectors in domestic and foreign currency. Total loans represent claims of commercial banks of BH on all institutional sectors, in domestic and foreign currency.

**Notes:**

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

\* Interest rates in table for revolving loans and credit cards and their amounts refer to the outstanding amounts.

IRF – initial rate fixation

... insufficient data to be published

The interest rate on the revolving loans and credit cards, includes data on credit cards with loan facility. Considering that credit cards with loan facility imply an interest free deferred payment (0% ir), they are not published.

No data for interest rates on loans in foreign currency on the basis of credit cards and overdrafts to non-financial corporations.

	05	36,617,862	3,661,786	5,653,079	1,991,293

**Notes:**

The Central Bank of Bosnia and Herzegovina (CBBH) made a Decision on increase of remuneration paid to commercial banks on required reserve, with purpose of harmonisation with the European Central Bank (ECB) policy and mitigating the impact of the ECB benchmark interest rate growth on bank operations in BH. According to this Decision, commercial banks will be remunerated at the rate of 50 basis points (0.50%) on required reserve holdings with the base in local currency KM, and at the rate of 30 basis points (0.30%) on required reserve holdings with the base in foreign currencies and local currency with currency indexation. Remuneration will not be paid for holdings exceeding reserve requirement. When making a CBBH decision on required reserve, all relevant factors were considered, including decisions of the ECB, and trends of key macroeconomic and financial sector indicators, taking care primarily of the currency board stability. The Decision will be applied from 01 July 2023.

Since 01 July 2017, the status change of the merger of subsidiary company UniCredit Leasing d.o.o. Sarajevo to the company Unicredit Bank d.d. Mostar has taken place. Accordingly, Unicredit Leasing d.o.o. Sarajevo has stopped existing as of 30 June 2017 and the data on the merged company are presented within the report on UniCredit Bank d.d. Mostar, starting from the report for July 2017.

From 1 July 2016, the required reserves rate applied by the CBBH to the base for calculation of required reserves is 10%. From 1 July 2016, the CBBH applies the new rates for the calculation of fees to the funds in the banks' reserves accounts : in the accounting period, the Central Bank does not charge a fee on the amount of required reserves in commercial banks' reserves accounts, and on the amount of excess reserves, the CBBH charges the fee at the rate equal to 50% of the rate applied to commercial banks' deposits (deposit facility rate) by the European Central Bank.

Since 01 May 2015, the Central Bank has calculated the compensation for a bank on the amount of the bank's funds in the reserve account with the Central Bank in the calculation period, as it follows:

- on the reserve requirement amount – the average of EONIA recorded in the same period on the market reduced by 10 basis points, or minimum zero,
- on the amount of the funds exceeding the reserve requirement – zero rate of compensation.

The zero rate of compensation on the reserve requirement is applied in case the average EONIA decreased by 10 basis points has a negative value.

\*The base for calculation of required reserves includes deposits and borrowed funds in domestic (in KM and KM with the currency clause ) and other currency expressed in KM.

**Note:**

International investment position (IIP) for BH is compiled in accordance with the latest International Monetary Fund Methodology for compilation of Balance of payments (BOP) and International investment position statistics, sixth edition (BPM6). Compilation of the International investment position for the fourth quarter includes the regular revision of previously published data for current year in accordance with most recent available source data. Shortened versions of the applied methodological approach for the compilation of BH IIP statistics are available on the CBBH website.

**Notes:**

Criteria for presenting country is the share of export of the country in total three-year BH export (2016, 2017, 2018).

Thus, all countries with share higher than 3,0% are separately presented, while the other countries are presented as sum in the column Other countries.

**Notes:**

Criteria for presenting country is the share of import of the country in total three-year BH import (2016, 2017, 2018).

Thus, all countries with share higher than 3,0% are separately presented, while the other countries are presented as sum in the column Other countries.

**T23: Average Middle Exchange Rates of KM**
